Here are some ideas — the first step towards a neat laundry area that saves time and becomes a feel-good factor in your home.

Laundry room

Do you take a deep breath before opening the door to your laundry room? Then you might need a new storage system. The key to making washing, drying, folding and ironing large amounts of clothes less of a chore is to have the right tools — stylish and practical workstations with all you need nearby. Don't know where to start? No worries, this guide will help you choose a laundry solution that suits your needs perfectly. Let's make life at home better together!

Behind closed doors

Hide the laundry chores behind closed doors with a dedicated spot for a washing machine and dryer as well as storage possibilities. Create a functional solution with open and closed storage, and everything you need at an arm's length.

Lighting for ENHET

Good lighting is an essential part of any laundry. That's why we offer integrated lighting series perfectly dimensioned to fit our ENHET laundry solution. Having integrated lighting in your laundry is a great way to be able to check your clothes before putting them in the washing machine and see if they need to be treated before.

You can also dim your light if you see the need, all you need is TRÅDFRI wireless dimmer. Or, use the DIRIGERA hub and IKEA Home smart app to control every beam of light with your smartphone. We call it IKEA Smart lighting.

SKYDRAG series

Lighting creates atmosphere in homes and makes everyday life easier. This LED lighting strip is specially designed for the ENHET series, but is of course just as easy to install in other areas of the home, except humid areas like the bathroom. You can use the lighting strip under ENHET wall cabinets and open wall frames as work lighting — or use it to create a cozy light inside the open wall frames.

You can connect as many LED lighting strips as you like, as long as the total wattage of the products does not exceed the maximum wattage of the connected driver(s). If you connect the lighting strip to TRÅDFRI driver and wireless dimmer, you can easily turn on, turn off and dim your lighting as needed. The LED light source consumes up to 85% less energy and lasts up to 20 times longer than incandescent bulbs.
