- Laminated with wood or solid acrylic edges.
- Acrylic, granite, and quartz are sold with measuring, delivery, and installation services included.
Ask our kitchen co-workers for details.

ACCESSORIES & PRICES
For use with all types of countertops from IKEA.

CAPITA bracket, 2-pack. Can be combined with a counter-top/bartop to build a bar. Stainless steel.
Height 6½" (16 cm). 403.99.96 49.99

QUALITY TESTING:
Our laminated countertops have to cope with hot pans (180°C) and shrug off spilled wine, oil and hot drinks. We also make sure that edges and glue-lines can withstand steam without lifting.

CARE & CLEANING:
The wood countertops have been factory-treated with one coat of oil. To ensure that the countertop retains its durable surface for many years to come, it should be treated with BEHANDLA wood treatment oil 3–5 times a year.

ENVIRONMENTAL INFORMATION:
BEHANDLA wood treatment oil contains mostly linseed oil and water. That way we avoid solvents that can harm the environment. There's no strong smell from the oil when you are using it.

When your kitchen work surfaces are as attractive to look at as they are practical to work on, you can be certain you have a kitchen that will please you for years to come.

It is the countertop, sink and kitchen mixer tap that complete your kitchen. They should do more than contribute to the look and style of your kitchen; they should also make your work in the kitchen easier. With us, you never have to choose between form and function – we have a wide range with many combination possibilities. Everything in high quality materials that have been tested and approved.

Choosing a countertop for your kitchen is important, because the surface has to put up with a lot for many years. We have countertops in a wide choice of colours and materials. Select from laminated, wood, acrylic, and natural stone like granite or quartz. Do you want a countertop that matches the color scheme in the rest of the kitchen? Or do you like exciting contrasts? All countertops are available in standard sizes, but you can also order made-to-measure countertops in different sizes and shapes.
There is a wide choice of colours and patterns among both the solid wood countertops and those in a laminate finish. NUMERÄR, PRONOMEN and PRÄGEL countertops come in standard lengths. PERSONLIG countertops are made-to-measure to your requirements. If you choose the made-to-measure alternative, you can also choose the shape of the edge and edging strip, from a selection of materials like laminated, wood, acrylic, granite and quartz.

Choose a sink – with one, one and a half or two bowls in stainless steel. There are different sizes, with or without a drainer. A large sinktop with a drainer is for example useful if you wash a lot of dishes by hand, as it helps to keep water off the countertop. You can also choose single and double sinks in white porcelain. Last, but not least, make sure the sink fits in the base cabinet underneith.

Kitchen mixer taps come in several models with single-lever or dual-control functions, pull-out spout and even a handy spray fitting for rinsing pots and pans.

When planning your kitchen remember, it’s the little details that create a practical, attractive finished product.

COUNTERTOPS IN WOOD

Wood is a natural, living material that adds a warm, welcoming feel to a kitchen. Wood will last for many years provided that it is oiled regularly. Oiling protects the countertops from marks, cracks and stains, and prevents water from penetrating the surface and damaging the wood fibres.

After mounting use fine sandpaper to sand the top and treat it with the wood treatment oil BEHANDLA.

BEHANDLA wood treatment oil prolongs the life of your countertop and gives the surface a beautiful sheen. This wood oil is specially approved for contact with food. Treat countertops three to five times a year. A 0.75 litre can contains sufficient oil to treat 10–12 m² (107–129.2 sq.ft.).

$9.99

COUNTERTOPS IN LAMINATE

Laminated countertops are available in a choice of different colours and patterns. Laminates are resistant to chemicals, liquids, scratches and even heat (up to 180°C).

These countertops are therefore extremely practical to use and very easy to clean.

• Available in pre-cut length and made-to-measure.

COUNTERTOPS IN ACRYLIC

With a made-to-measure acrylic countertop you can also choose matching bowls in the same material. Everything is in one piece, with no visible seams, and you can choose between different colours. The work surface may be less scratch-resistant than laminate or stone countertops, but the smooth, poreless surface is easy to keep clean. And if you want to remove small scratches and stains, you can sand it with fine sandpaper.

• Available only as made-to-measure countertops and include measuring, delivery, and installation services.

COUNTERTOPS IN STONE

If you choose a stone countertop you’ll get a work surface that’s extremely durable, scratch resistant and able to withstand high temperatures. The top layer of a quartz countertop is a moulded stone composite powder. This makes the surface, unlike a solid stone countertop, non-porous, smooth and easy to keep clean.

It’s also stain resistant, and doesn’t require any impregnation. The surface always looks the same, which is good to know if you want several countertops in your kitchen.

• Available only as made-to-measure countertops and include measuring, delivery, and installation services.

Material: Laminate, Thickness: 1 1/2" (3.8 cm). Depth: 2 5/8" (65 cm). Available in 3 lengths. 2 extra laminated edging strips are included for you to cut to length. Rounded front edge.

Length x Depth (cm) $12.99
49⅝x25⅝ (126x65) 901.537.19
73¼x25⅝ (186x65) 901.537.20
96⅞x25⅝ (246x65) 901.537.21

$79.99

Material: Stainless steel. There are different sizes, with or without a drainer. A 30 cm wide sinktop with a drainer is for example useful if you wash a lot of dishes by hand, as it helps to keep water off the countertop. You can also choose single and double sinks in white porcelain. Last, but not least, make sure the sink fits in the base cabinet underneith.

Kitchen mixer taps come in several models with single-lever or dual-control functions, pull-out spout and even a handy spray fitting for rinsing pots and pans.
