

4 STEPS TO YOUR NEW KITCHEN

Planning guide 2015

4 steps to your new kitchen

This brochure is your guide to measuring, planning, ordering and installing your IKEA kitchen. Inside you'll find out what you need and the direction to follow.

1 MEASURE IT

2 PLAN IT

Here's what you need. Ready for you at your local IKEA store.

Our kitchen brochure is one of your best sources for ideas and inspiration.

Our three buying guides. Inside you'll find detailed information about our kitchen range, easy comparisons between products and help to choose exactly what you need.

3 ORDER IT

4 INSTALL IT

IKEA online IKEA.my is one of your biggest resources. Here you'll find our Home Planner and information on our complete range of kitchen products and services.

Our kitchen installation guide gives you tips and information about installing your kitchen right.

1 MEASURE IT

Measuring your kitchen isn't hard to do, but it's important you get it right because your measurements will be the basis for all your planning. Give yourself plenty of time to measure precisely (we've included grid paper to record your dimensions). Here's how you do it.

MEASURING SERVICE

Almost all kitchen spaces have an awkward corner. But if you measure first, most issues can be sorted out. If you need help measuring, just contact your local IKEA store and we'll help you get the measuring done correctly.

Start by measuring from the floor to the ceiling, then the distance between walls, and from the corners to the doors.

Measure each window and their distance from the floor, the ceiling and the corners of your room. Do the same for the door(s).

Mark down anything that sticks out into the room such as radiators, ventilation shafts and pipes.

Note the position of your drains and water supply. If you are planning to relocate these, mark their new positions.

Measure and note the position of existing power outlets and light switches. Mark where you would like new ones to be.

My Kitchen Measurements

Be sure to make your measurements in millimetres. So your new kitchen fits your space right.

2 PLAN IT

Planning your kitchen is when your dreams and ideas take shape. There are lots of things to think about, like where to put the fridge or how many drawers you need. That's why we have tools that'll help you decide. And, if you want some expert advice we have Kitchen Planners ready in the store to help.

PLANNING SERVICE

If you want some expert advice we have kitchen planners in the store to help.

Think about how you use your kitchen and what feels comfortable for you. Consider what you like about your existing kitchen and what you would change. It can be helpful to make a list of the things you'd like to keep and what you'd like to replace.

Most kitchens work best divided into work zones. These are split into storage (fridge/freezer/pantry), washing (sink/dishwasher) and cooking (oven/cooktop). Work zones give your kitchen a practical structure.

How you position your work zones and the distance between them is often called a working triangle. A good working triangle helps you move quickly and easily from task to task in your kitchen.

The ultimate goal is a kitchen that works for you. Design your kitchen to fit your home and your lifestyle. It's your kitchen after all.

Single-line kitchens are perfect when space is limited. They're simple, streamlined and look great.

Adding an island to your kitchen gives you extra storage, lots of work space plus it's a great social point. Give yourself 120 cm between your island and other cabinets.

Parallel kitchens are great if you have many people cooking at the same time. There is lots of room for food preparation and storage too.

L - shaped kitchens make the most out of a corner. They're ideal if you want to add a small dining table or kitchen island too.

If you have a large room the U-shaped layout is ideal. It gives you maximum space and plenty of storage options.

Important measurements and things to think about while you're planning.

The best place for preparing food is the work surface between the hob and the sink.

Make sure that the distance between opposite rows of cabinets is wide enough so your doors on both sides can be opened at the same time.

Plan the height of the wall cabinets so that they don't block the view over the worktop.

Make space so you can take hot pans off the hob and put them on a pot stand.

For safety and functionality, mount the extractor hood/fan at the recommended height above the hob. Ask at the store if you have questions.

Keep your utensils and pots and pans near the oven/hob and everything will be at your fingertips.

Placing your hob and oven in separate locations makes cooking more efficient, especially if more than one person is cooking. An elevated oven means you won't have to bend down to reach it.

Place the dishwasher close to the sink and dish drainer to make loading and unloading easier and to avoid spills on the floor.

Finding things in your kitchen is easy when your groceries and utensils are in smooth-running, fully-extendable drawers and pull-out pantry. They give an overview of what's inside and you can reach right in and take things out.

Place a 5 cm filler piece between the cabinet and the wall to ensure there is enough room to open drawers and doors fully. This is especially important if you have pull-out wire baskets and if the wall is not perfectly straight.

Secure the kitchen island with the supporting brackets and fasten it to both the floor and the cabinets.

For an overhang of less than 25 cm, no extra support is needed.

Sinks by windows are nice when washing up. If your windows open inwards however, they can be blocked by the tap.

Placing a sink by a wall or at the end of a row of cabinets disrupts work flow by limiting available workspace.

Placing an oven by the wall disrupts work flow by limiting available workspace, puts your walls at risk from heat and cooking stains.

Positioning appliances like ovens, dishwashers and extractor hoods in corners often blocks cabinets and drawers from opening fully.

Design your new kitchen with the IKEA Home Planner

Use the IKEA Home Planner with your measurements to design, experiment and create your kitchen in 3D. You can find the link in the Kitchen & Appliances section of the IKEA website. The first time you start you'll need to install a plug-in.

Just follow the instructions on the "Plan your kitchen" page to get started.

If at any stage you need a hand, drop by your local IKEA store and our kitchen experts can help you.

Start here.

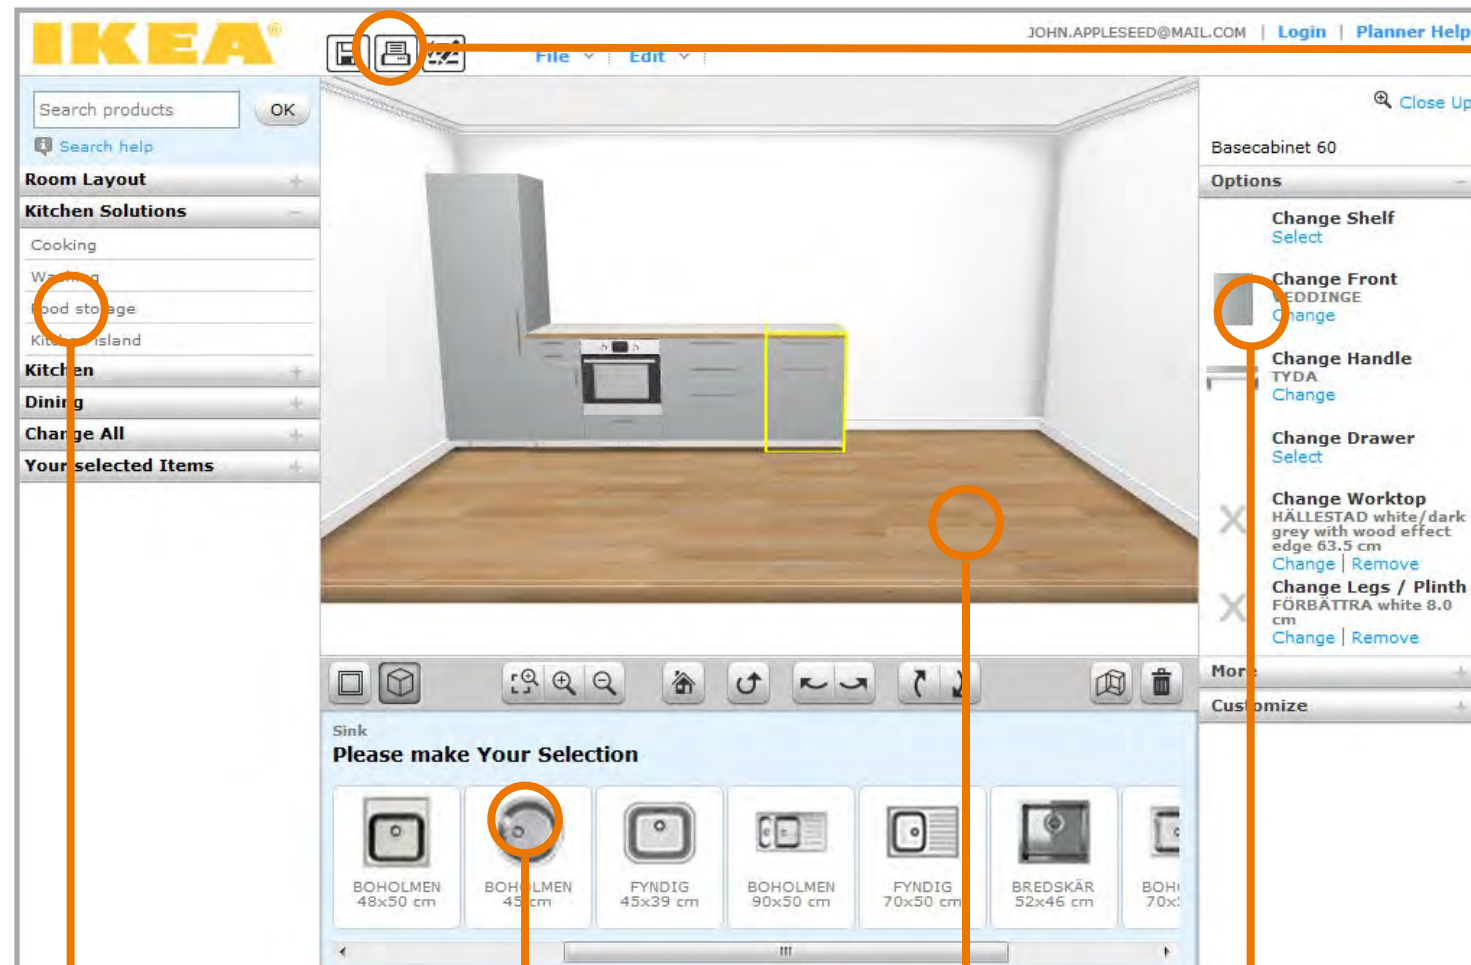

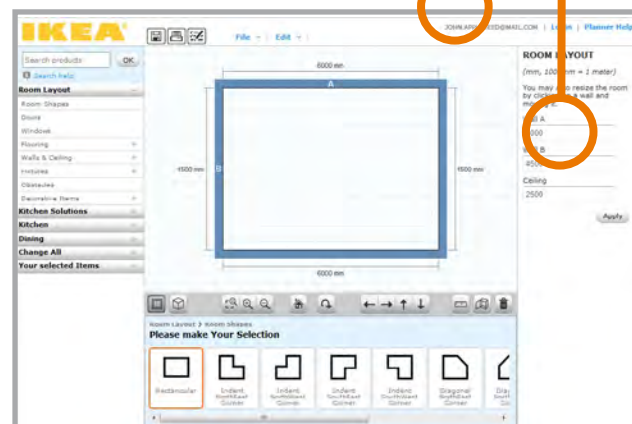

Begin by clicking on "Log in" in the top right corner. Here you can create an account. You need to create an account so that you can save your plan, and come back to it whenever you're using the IKEA Home Planner. You'll also need it later on when you're ready to order at your IKEA store.

Once you've clicked on "Login" click "Sign up now" to get started. Before you begin we recommend you take 5-10 minutes to read the planner help. This will give you useful tips to help you use the planner.

You can see you've registered successfully when your user name appears here.

Plan your kitchen

Work with options

Fill in your measurements.

Use the measurements you've recorded on your grid paper earlier to recreate your room on the planner. You can choose a room layout here and customise it to your space by adding fixtures, doors and windows. Just select from the menu on the left and click the "Apply" button when you're done.

Select category

Start by clicking on the Kitchen Solutions or Kitchen tab on the left hand menu. Here you can choose what category to work with. You can choose from a selection of that category in the bottom menu. A quick click is all that's needed to drop it into the room.

Work with options.

From the right hand menu, you can work with the options available for the product you've chosen from the bottom menu. Here you can adjust things like the colour and material. Or add extras like handles and knobs.

Complete your room.

Complete your kitchen with worktops, flooring, dining furniture and even plants. You can even paint the walls and ceiling to really customise it to your look. Select from the "Dining" and "Decoration" tabs on the left hand menu.

Prices and ordering.

When you're ready you can choose to print either your current view, or all collected views of your design. You can also print out a list of your selected items and a price list. Just click on the printer icon.

Make sure to record your username and password for accessing the Kitchen Planner. You'll need them to access your saved design and to take to the store.

Your Password

3 ORDER IT

When you're satisfied with your planning, drop by your local store to visit our kitchen experts. They will go over your kitchen plan with you, and help you with anything you're not sure about. When you're ready you can order and we can help with delivery and other services too.

Checklist

You'll need to bring

- ☐ Your kitchen measurements
- ☐ Your IKEA Home Planner log in details

It's good if you've considered

- ☐ Cabinets, drawers and fronts
- ☐ Doors and handles
- ☐ Worktops
- ☐ Sinks
- ☐ Taps
- ☐ Oven
- ☐ Microwave oven
- ☐ Hob
- ☐ Hood
- ☐ Fridge/freezer
- ☐ Dishwasher

Think about services too

- ☐ Measure
- ☐ Installation
- ☐ Picking and delivery
- ☐ Delivery

DELIVERY SERVICE

Most of our products are designed and packaged so that you can take them home yourself. But if you prefer, we can deliver your purchases directly to your home or office.

FINANCE

IKEA has flexible payment options from as low as RM500 to make it easy and affordable to get the home you dream of. Simply inform the cashier that you would like to put your purchases on Instalment Payment Plan (IPP).

4 INSTALL IT

IKEA kitchens are designed to be installed by you, but we're here to help as much as you'd like along the way. You can start by picking up the kitchen installation guide, which shows you how to do it yourself, step by step. Or check out the different installation services we offer, all performed by our skillful certified kitchen installers.

INSTALLATION

Our certified kitchen installers guarantee to have your new kitchen in place. They'll connect all the appliances, sinks and taps and install the rest of the kitchen down to the handles and knobs. And, of course, the job isn't done until they take away all the packaging to be properly disposed of.

The kitchen installation guide gives you tips and information about installing your kitchen right.

OUR COMPLETE INSTALLATION SERVICE INCLUDES:

- Assembly and installation of all cabinets
- Installation of worktops, including cut-outs for the sink/hob
- Installation and connection of sink, tap, and siphon
- Installation and connection of IKEA electric and gas appliances
- Installation and connection of IKEA worktop lighting
- Installation of side panels, handles, and interior fittings (shelves, baskets, etc.)
- All packaging is taken away (unless customer wishes to keep it)

Talk to your local IKEA store for details. Charges applies.

You can do it yourself but you don't have to.

Sometimes a little help is all you need to turn a dream into reality. Which is why we offer a wide range of services to help you along the way. Maybe you just need a little help, or perhaps someone to do the whole job for you. Either way we're here to help, and are happy to put together a service package that's just right for you. Of course, the more you do yourself, the lower the price will be. And the more you ask us to do for you, the more you can sit back and relax!

MEASURE SERVICE

Not confident in your measuring skills? We can help. One of our experienced professionals will come to your home and take all the essential measurements and notes. Then they'll put the information into the IKEA Home Planner so you'll be one step closer to your dream kitchen.

PLANNING SERVICE

If you want some expert advice we have kitchen planners in the store to help.

DELIVERY SERVICE

Our kitchens are designed and packaged so you can take them home yourself. But if you prefer, we can deliver them directly to your home or office. Prices are based on distance. You choose the delivery date after you have completed your purchase.

INSTALLATION SERVICE

When you buy an IKEA kitchen you can save valuable time with professional installation, especially when it comes to the hard stuff like electricity, appliances and carpentry work. You have the choice of complete or partial installation.

FINANCE

IKEA has flexible payment options from as low as RM500 to make it easy and affordable to get the home you dream of. Simply inform the cashier that you would like to put your purchases on Instalment Payment Plan (IPP).

* Applies to total purchase value of minimum RM500 in a single receipt. Applicable for VISA and MASTERCARD from selected banks only. Terms and conditions apply.
