

A guide to buying IKEA appliances

IKEA Appliances

All our appliances are developed to fit perfectly in any IKEA kitchen, and come equipped with a variety of functions to make your life easier. All of our products are energy-saving, to support you in living a more sustainable life at home. We also have sets of appliances coordinated for style and function to help you pick those that are best for you.

Ovens

Whatever cooking (or kitchen) style you have, we have an oven for you. Offering a wide range of functions—everything from basic warming to steam cooking—our ovens are developed to fit perfectly in your IKEA kitchen. Simply choose the functions that suit the way you cook, and we will meet you with a matching look.

When choosing an oven, consider:

1

How often do you use your oven, and for what kind of food?

We have a selection of ovens—from simple and easy-to-use, to more advanced ovens with many different functions.

2

How much food do you cook at the same time?

Our ovens come in sizes from 56 to 72 litre capacity.

3

What style do you prefer?

No matter if your kitchen has a modern or classic style, we have ovens that will match perfectly.

5

Our appliances are made to last, and come with a 5-year guarantee (except for TILLREDA and LAGAN, which have a 2-year guarantee).

Tips

Did you know that telescopic rails make cooking simpler and safer? Loading and unloading food without getting burned is easy when using oven gloves to help you get a better grip on ovenware —and it'll be a snap to pull out the food to stir or check the temperature.

Did you know that you can clean the oven and keep it as new with little effort on your part? With the self-cleaning pyrolytic function you heat up the oven to burn all grease and food residue to ashes. All you have to do is to wipe it out afterwards.

Types

Conventional ovens

Ideal for those who want an easy-to-use oven. These ovens include top and bottom heat, and all the basic functions you need for cooking and baking.

Fan-forced ovens

Ideal for those who love to cook. A fan spreads the heat quickly and evenly, letting you cook different dishes at the same time without mixing flavours.

Fan-forced ovens with self-cleaning/ pyrolytic function

Ideal if you love to cook, but not the clean-up. These ovens have all the functions of fan-forced air ovens, plus they're easy to keep clean. Just press a button to burn grease and food residue to ash, and wipe it out with a clean cloth.

Fan-forced ovens with steam function

Ideal for those who love cooking healthy food. This type of oven has the same functions as fan-forced ovens, but with the addition of a steam function. The combination of steam and heat retains more taste and nutrients, while keeping food on the inside and crisp and brown on the outside.

Key features

Spacious inner dimensions with up to five cooking levels ensure you have plenty of room for your food. IKEA ovens have volumes ranging from 55 to 72 litres.

Telescopic rails let you load and unload food without getting burned, as you get a better grip on the ovenware—making it easier to pull the food out to stir, or check the temperature.

Get the roast just right every time using the integrated **meat thermometer** with temperature sensor.

A built-in **digital clock** is ideal for keeping an eye on the time while you're cooking.

IKEA ovens have **touch controls** which are easy to use and keep clean, and add a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless steel surface sparkling clean.

With **pre-set cooking programs** you can choose the best setting for different food, dishes and recipes—and get the same yummy result every time.

Our oven doors have a **child-safety lock** to make it safe for children to be in the kitchen and take part in all the activities.

Functions

Top and bottom heating is ideal for cooking dishes with a crispy finish, and for slow cooking of casseroles.

The **fan-forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes simultaneously without flavours spreading between them.

The special **pastry** function can help you to get the perfect result on your baked cookies and pies.

Thaw your food seven times faster using the **quick defrost** function.

With the **steam function** you combine steam and hot air to get optimal humidity and heat levels, keeping food soft on the inside, and crisp and brown on the outside.

With the **grill function** that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, as well as a nice golden-brown colour on your gratins.

The **warming program** enables you to keep food warm without it becoming burnt or overcooked.

The **direct steam function** gives the bread you are baking a golden-brown crispy surface and makes it soft inside, and the food you cook ends up being more juicy.

Full-steam function helps retain vitamins, minerals and nutrients of food. Moisture is not lost, and the flavours are locked in.

Combined steam cooking keeps the food's taste and colour, while retaining the maximum of nutrients, minerals and vitamins. When you combine steam and hot air you get optimal humidity and heat levels, which keeps food soft and moist on the inside, crisp and brown on the outside.

The **self-cleaning pyrolytic function** makes it easier for you to clean the oven. Grease and food residue are reduced to ash that you can easily wipe out with a cloth.

The **bread/pizza baking function** gives your food a more intense brown outside and a mouth-watering crispy base.

The **quick pre-heat** function warms up the oven quickly.

Turbo grill allows you to grill, brown and cook larger dishes and meat all the way through.

Microwave ovens

Modern microwaves have a range of functions that let you grill, bake, steam and crisp your food, in addition to defrosting and reheating. Our microwave combi ovens use a combination of fan-forced air and microwaves to reduce both cooking time and energy consumption. Being a microwave and regular oven in one, they are a practical choice for smaller kitchens, or if you cook a lot of food and need an extra oven.

When choosing a microwave oven, consider:

1

How often do you use your microwave, and for what kind of food?

We have a selection of microwaves—from basic to more advanced microwaves/microwave combi ovens with many different functions.

2

How much food do you cook at the same time?

With a microwave combi oven you can have all in one or get an extra oven when the big family comes to visit.

3

What style do you prefer?

No matter if your kitchen has a modern or classic style, we have microwave ovens that will match perfectly.

5

Our appliances are made to last, and come with a 5-year guarantee (except for TILLREDA and LAGAN, which have a 2-year guarantee).

Sustainability

Oven cooking doesn't have to take ages, or use lots of energy. With our microwave combi ovens, you get a fan-forced air oven and microwave oven all in one. It means faster baking, grilling and roasting, as well as quick defrosting and warming. Less time waiting

around and more time enjoying great home cooking with the people you love. Less cooking time saves you electricity too, for smaller bills and a more sustainable life at home.

Tips

Did you know that cooking time is significantly reduced if you combine the microwave function with fan-forced air in a microwave combi oven, compared to a conventional oven? The combination allows you to get a perfect result every time, while saving both time and energy.

Did you know that placing a built-in microwave in a high or wall cabinet is a smart use of space, and also a way to create an ergonomic and smooth workflow that's just right for you.

Types

Microwave ovens

Ideal if you want to heat up or thaw food and beverages quickly and easily. Some of our models also include a crisp function which allows you to bake and fry food.

Microwave combi ovens

This is a microwave oven and fan-forced oven in one, ideal if you don't have the space for two conventional ovens. You can use it as a microwave oven for quick warming or defrosting, and as an oven for grilling, baking and roasting. You can combine both to save time and energy, without compromising on taste.

Key features

A built-in **digital clock** is ideal for keeping an eye on the time while you're cooking. Use the timer when you want total control over the cooking time.

IKEA microwaves have **touch controls** which are easy to use and keep clean, and add a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless steel surface sparkling clean.

Our oven doors have a **child-safety lock** to make it safe for children to be in the kitchen and take part in all the activities.

Microwave functions

The **crisp function** allows you to bake pizza, pie and other dishes faster than in an ordinary oven. This function is also useful for frying food such as eggs, bacon, sausages and hamburgers.

The **grill function** distributes heat evenly, so you get that tasty, finger-licking surface on meat and vegetables, and a golden-brown colour on your gratins.

In a hurry? Use the **quick start function** to heat up food and beverages in a jiffy.

Thaw your frozen food faster. The **defrost function** is ideal for meat and poultry, fish, vegetables and bread.

Oven functions

Top and bottom heating is ideal for cooking dishes with a crispy finish, and for slow cooking of casseroles.

The special **pastry function** can help you to get the perfect result on your baked cookies and pies.

The **fan-forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes simultaneously without flavours spreading between them.

The **warming program** enables you to keep food warm without it becoming burnt or overcooked.

The **bread/pizza baking function** gives your food a more intense brown outside and a mouth-watering crispy base.

With **pre-set cooking programs** you can choose the best setting for different food, dishes and recipes—and get the same yummy result every time.

A time and energy saving combo

KULINARISK
Combination microwave/
fan-forced oven. 104.196.29

The combination of fan-forced air and microwaves in our microwave combi ovens reduces both cooking time and energy consumption.

Cooktops

A cook's best friend, the cooktop, is central to everyday cooking. Our energy-saving induction cooktops deliver fast and precise cooking results, are easy to use and include all the functions you need. Each has its own unique features and a variety of sizes—choose between one to several flexible zones—to perfectly suit your kitchen and your cooking style.

When choosing a cooktop, consider:

1

How often do you use your cooktop?

We have everything from portable single-zone cooktops to high-end gas and induction.

2

How much food do you cook at the same time?

You can choose to have a small cooktop with one or two zones, or extra-wide cooktops for large pots and pans.

3

What type of chef are you?

If you like total control while cooking, choose an induction or gas cooktop. You can also choose cooktops with flexible zones which adapt to the shape of the pot or pan.

5

Our appliances are made to last, and come with a 5-year guarantee (except for TILLREDA and LAGAN, which have a 2-year guarantee).

Sustainability

Save time and energy while you cook

Like to cook but don't always have enough time? Induction cooktops heat up your pots and pans in a super-efficient way. That means faster cooking and more time to sit and enjoy great home-cooked meals with family or friends. Because induction cooktops only heat your cookware, they use less electricity and they're safer.

Types

Induction cooktops

Induction cooktops are up to 50% faster and 40% more energy efficient. With just one touch you can select features and regulate the heat in an instant.

Gas cooktops

Gas cooktops are more than a professional-looking feature for ambitious cooks—they provide quick heat control needed for searing and frying.

Key features

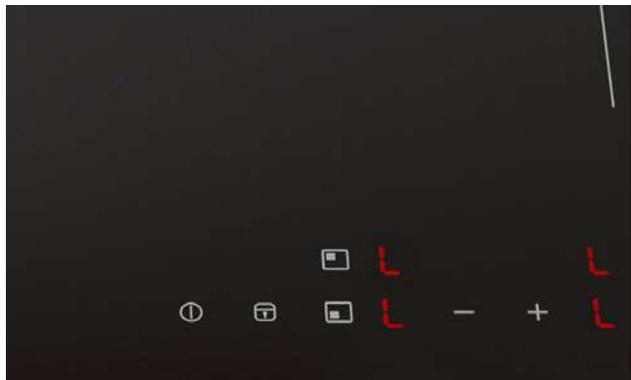

A **portable** cooktop is perfect for smaller kitchens or when you need an extra cooking zone. It's easy to move around and can be stowed away when not in use to free up counter space. Just plug it in wherever you need it.

Depending on your needs and how much food you cook at the same time, choose a cooktop with **enough cooking zones**. We have cooktops with 1, 2, 3, 4 and 5 zones. Also think about the width of the cooktop: the bigger it is, the more space you'll have for pots and pans.

When you press the **pause** function, all activated zones are paused—and when you press the pause button again, the zones will come back to the same temperature as before. That way you can suspend the cooking process if you're interrupted, and re-start in an instant.

When you press and hold the **child lock** button, you can't start the cooktop or change the temperature. To unlock the cooktop, press the child lock button again for four seconds. This is a good function to use when you're cleaning the surface of the cooktop and don't want to switch on any zones accidentally.

Get excellent control when you cook with the **individual timers** allowing you to time each zone separately. Ideal for boiling eggs, rice or pasta.

The **touch and press control panel** allows you to regulate the heat easily and precisely by just touching the + and - symbols.

Just slide your finger on the **touch and slide control panel** and the heat will adjust accordingly. With just one touch you can select features and regulate the heat in an instant.

Functions

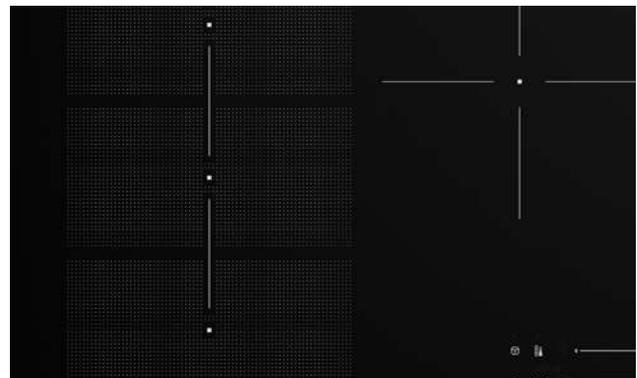

The **bridge** function gives you the flexibility to use larger and different pots for special recipes, as it allows you to connect two cooking zones into one large one when needed.

Vary the cooking surface by using the **flexible heating zones**. You can use them together or separately, and adapt them to pots and pans of different shapes and sizes.

The **power booster** delivers additional power to a single cooking zone, perfect for boiling water. The booster can be set with just one touch.

If you like cooking, you'll love the **pre-set cooking mode**. Adjust to low, medium or high heat simply by moving the pot or pan on the multi-flex zone. The cooktop will remember the power settings next time you activate the function.

Induction cooktops

TILLREDA

Portable induction cooktop

1 zone

White. 404.935.09

Rangehoods

A rangehood helps keep your kitchen air clean and free from smells, steam and grease. Our rangehoods come with different air extraction capacities, which means they have been optimised to only extract the air that needs to leave the house, while keeping warm or cool air inside. And since a rangehood is also an important visual element in any kitchen, we have a range of wall-mounted, built-in, or ceiling-mounted models to suit different styles and needs.

When choosing a rangehood, consider:

1

How wide is your cooktop?

The width of the rangehood should be at least as wide, or wider than your cooktop.

2

What does your kitchen look like?

If you have an open plan kitchen/dining area, make sure to choose a rangehood with a low noise level.

3

Valve or charcoal filter?

Find out if you can connect the rangehood to a valve that ducts the air out of the building. If not, you will need to connect the rangehood to a charcoal filter, which removes the grease and odour from the air, and releases the filtered air back into the room.

5

Our appliances are made to last, and come with a 5-year guarantee (except for TILLREDA and LAGAN, which have a 2-year guarantee).

Sound levels

Sound levels for appliances are measured in decibels (dB). Our appliances have been tested to measure this.

For rangehoods the operating speed or installation type can influence sound levels.

Decibel levels are listed in the product information. Compare decibel levels and choose the rangehood that's suitable for your needs and comfort.

Tips

Did you know that turning on the rangehood five minutes before you start cooking will make it work more efficiently? Turning it on will circulate the air and allow the rangehood to more effectively catch

cooking odour and draw it directly into the fan. It is also a good idea to let the rangehood run for 10 to 15 minutes after cooking, to allow it to absorb any residual particles in the room.

Types

Built-in rangehoods

If you want a completely uniform and streamlined kitchen, choose a built-in rangehood with a front that matches the rest of your kitchen.

Wall-mounted rangehoods

Our wall-mounted rangehoods come in many shapes, styles and sizes. Choose a statement style or one that matches your kitchen and the rest of your appliances. Make sure the rangehood is the same size or wider than your cooktop for optimal performance.

Ceiling-mounted rangehoods

A ceiling-mounted rangehood is the perfect solution if you have the ability to cook food on a kitchen island.

Key features

All our rangehoods have energy-efficient **LED lighting**. This type of lighting normally lasts as long as the rangehood does, and it illuminates the entire cooktop to make cooking easier.

When you cook a lot of food and the smoke is thick in your kitchen, the **booster function** will come to your rescue. It boosts the maximum speed of the rangehood, and can be turned on for six minutes to dissolve heavy cooking fumes.

With **dimmable lighting** you decide how strong the light over your cooktop should be. Choose a stronger light when cooking, and cosy mood light when eating.

An easy to use and keep clean **touch control** adds a modern touch to your kitchen.

Built-in rangehoods

LAGAN

Wall-mounted rangehood
White. 704.013.96

A rangehood with LED lighting and all the basic functions you need. Can be mounted in a wall cabinet for a uniform look in the kitchen. Combine with LAGAN oven and LAGAN cooktop.

Fridges and freezers

An IKEA fridge or freezer keeps your food fresh for longer, but they do so much more to help make your life a little nicer. There are plenty of features for storing and enjoying your food in the best way possible—like a chill mode for glass bottles, fan cooling for consistent temperatures, electronic displays for settings and functions, and fast freezing, to name a few. All IKEA fridges and freezers are energy efficient, rated 1 to 6 stars.

When choosing a fridge and freezer, consider:

1

How much food do you normally store in your fridge/freezer?

How many of you are there in the family?
How often do you shop?
We have different sizes and capacities to suit your needs.

2

Do you need any specific functions or accessories to simplify storing and organising your fridge/freezer?

We can offer interiors for every need.

3

What style do you prefer, and what works in your kitchen?

Choose between free-standing appliances to create a design statement in your kitchen; or integrated appliances to create a more streamlined look.

5

Our appliances are made to last, and come with a 5-year guarantee (except for TILLREDA and LAGAN, which have a 2-year guarantee).

Sustainability

Did you know that we throw away approximately 25% of all the food we buy? That's like dumping one bag of groceries in every four straight into the bin! IKEA fridges and freezers are full of smart ideas to help you keep food fresh, for longer. Wasting less food saves you money, and time at the shops.

Tips

Did you know that you can keep your food fresh for longer with an in-built fan? The fan circulates the cool air and keeps the temperature consistent throughout the fridge. And as the temperature is the same everywhere, you can store your food and drinks exactly where you want them.

Did you know that defrosting and scraping ice is nothing but a bad memory? The no-frost function automatically regulates the humidity levels in the fridge, and prevents ice and frost from spreading.

Key features

A built-in **cooling fan** circulates the air and maintains a consistent temperature throughout, allowing you to make use of the entire space and store all types of food and drinks anywhere.

You'll never have to defrost or scrape ice again! The **no-frost function** automatically regulates the humidity levels to prevent frost and ice spreading on food or in the fridge.

The **touch control panel** makes it easy to select the right functions and temperature settings, whether you are cooling dessert, freezing fresh vegetables or going on vacation.

Integrated **LED light** technology illuminates every corner. The light source is maintenance-free, lasts the lifetime of the appliance and makes it easier for you to see what food and drinks you have.

Functions

Vacation mode allows you to keep the empty fridge closed while you're away without a bad odour forming.

Fast cooling mode allows you to quickly cool down fresh food and drinks—perfect after a large grocery shop.

With **fast freeze** you can quickly reduce the temperature to lock in the freshness and nutrients of food, even with large quantities.

With **bottle chill mode** an alarm sounds at the end of the cool down time. Perfect if you want to chill glass bottles or to cool food.

If the door of the appliance is not properly closed the **door alarm** will make a sound to remind you to close it.

The **temperature alarm** warns you if there is a sudden temperature increase caused by a malfunction.

Interior accessories

Don't forget all the snacks at the back of the fridge! This storage turntable pulls out and revolves, so you can see and reach the smallest jars hiding in the back. A clever addition to your fridge or cabinet.

SNURRAD storage turntable, transparent

RIBBENAS fridge/freezer comes with a 5-year guarantee.

Dishwashers

Compared to hand-washing, a dishwasher can save both water and energy. Our integrated dishwashers are designed to be fitted with your choice of door to match the rest of your kitchen. They come with tall interiors with space for lots of dishes; and features like the automatic door opener function—towards the end of the program, the door opens and stays ajar, letting the dishes dry quickly. All our dishwashers are energy efficient, so you can save money and live a more sustainable life at home.

When choosing a dishwasher, consider:

1

How much space do you have available, and how many of you are there in your family?

We have dishwashers in different sizes and volumes to suit your needs.

2

Are there any specific functions that are important to you?

Perhaps you need a dishwasher with three levels of storage, to increase the storage space? That way you can get more dishes out of the way and enjoy a clean kitchen.

5

Our appliances are made to last, and come with a 5-year guarantee (except for TILLREDA and LAGAN, which have a 2-year guarantee).

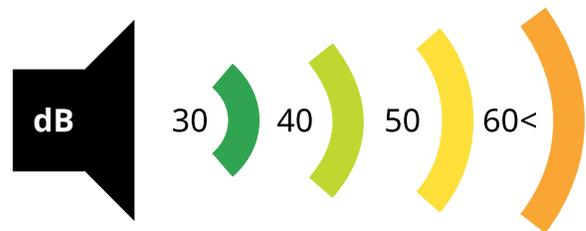

Sound levels

Sound levels for appliances are measured in decibels (dB). Our appliances have been tested to measure this.

For dishwashers the operating program or installation type can influence sound levels.

Decibel levels are listed in the product information. Compare decibel levels and choose the dishwasher that's suitable for your needs and comfort.

Tips

Did you know that all of our dishwashers are integrated? They are designed to be fitted with your choice of door to match the rest of your kitchen and create a uniform look.

Did you know that you can dry dishes faster while using less energy? It's called Auto Open. At the end of the washing program, the dishwasher door is automatically opened and the dishes dry better.

Key features

With our **water-efficient** dishwashers, lots of dishes will be sparkling clean with just a small amount of water.

All our dishwashers are **fully integrated** to match the rest of your kitchen.

You can choose dishwashers with **two or three levels** (three levels hold more).

With **adjustable baskets** you can make room for plates and glasses of different sizes.

Soft plastic spikes and **clever holders** keep glassware in place and reduce the risk of breakages. Cutlery baskets that let you stand utensils up mean better cleaning and easier sorting and putting away.

Towards the end of the program, the **auto open** function automatically opens the door so that the dishes dry as quickly as possible.

The **delayed start** function allows you to run the dishwasher when you want. Our dishwashers have delay options from three up to 24 hours.

LED lighting in the dishwasher provides a convenient light when you put in and take out the dishes.

With the **beam on floor** function, a beam of light shines on your floor when the dishwasher is running.

The **time beam on floor** function projects a beam of light on the floor telling you the remaining time of the washing program.

Programs

Auto

For all types of loads—crockery, cutlery and pots and pans.

Eco wash

A more sustainable, water-saving option, for normally dirty crockery and cutlery.

Rapid wash

Perfect if you're in a hurry or have a lot of dishes. Ideal for recently used crockery and cutlery.

Intensive wash

For all types of loads—crockery, cutlery and pots and pans—when they're really dirty!

Normal wash

Great for normally dirty crockery and cutlery.

Silent wash

Extra quiet—ideal for open plan homes or when your dishwasher is close to where you eat. For normally dirty crockery and cutlery.

Wineglass wash

For delicate crockery and glassware that's not too dirty.

Pre-wash

This is a pre-wash program for very dirty crockery.

Machine care

This program performs dishwasher maintenance by cleaning the interior of the dishwasher using hot water.

Optional features

Dry plus

A higher temperature during the final rinse and an extended drying phase ensure the drying performance, even for plastics.

Extra hygiene

A higher temperature (70°C) for at least ten minutes during the last rinse provides an increased hygienic and disinfecting result.

Save time

Shortens the washing time by up to 66 percent, depending on the program you choose.

Save energy

Reduces water and energy consumption.

Intensive zone

Extra intensive washing in the lower basket, perfect for very dirty dishes such as pans and baking dishes.

Half load

Use this program with small loads. The running time is shortened, energy and water consumption are reduced. It is recommended to add less detergent than with a full load.
