# Why buy a mattress from IKEA

---

## We know a thing or two about mattresses

When it comes to mattresses, one size doesn't fit all. People are built differently and sleep differently. Which is why our range of mattresses offers you a wide choice of sizes, materials and support. We provide all this

while making sure it doesn't cost the earth or your wallet, since sleep is essential for your health. So yes, we know a thing or two about mattresses and all the other things you need for a good night's sleep.

# A great day starts with a good nights sleep

---

If you wake up feeling refreshed you know you've found the right mattress. It can be a little daunting, so we'll guide you through some key points to help you.

When you get the right balance of support and firmness, it just feels right. This is because your spine is in its natural alignment and the mattress supports your body weight, sleeping position and body shape – so your body can relax for restful and calm sleep.

## Balanced comfort and support

A well-balanced mattress provides support where needed, allowing heavier body parts to sink into the mattress, not too much or too little.

The mattress moulds itself to your body with little or no gaps between you and the mattress. The spine enjoys a natural and comfy alignment, helping you to relax – and sleep soundly.

## Too firm – too much pressure on the body

A mattress is too firm when you feel as if you lie on top of it.

Shoulders and hips don't sink into the mattress, it doesn't mould itself to your body and you may find gaps between your body and the mattress, causing an unbalanced feel. This increases pressure on the body, and the spine doesn't align correctly, causing disrupted sleep.

## Too soft – no support for the body

A mattress is too soft when the feeling is that the entire body sinks into it without support for shoulders and hips.

The spine doesn't align correctly, and it can be difficult to change sleeping position. This means the muscles have to work to get comfortable as you sleep, making it difficult to relax fully, and you'll wake up not feeling refreshed.

# Better spine alignment with comfort zones

## What are comfort zones?

A mattress with comfort zones will have different levels of firmness in different parts of the mattress. Comfort zones are beneficial to some since they are designed to provide targeted support and pressure relief to different parts of your body as you sleep.

## What is good spine alignment?

Good alignment when lying down is that your spine is similar in posture as when standing, a straight and natural position that does not feel forced or uncomfortable.

Our engineers and comfort lab have designed mattresses based on data from sleep simulations to create targeted areas that support the body in a good way for spine alignment and relaxed sleep.

Generally softer areas around the heavier parts of the body (hips and shoulders) to enable them to sink into the mattress optimally. Shoulders can sink in as much as they need while the weight of the hips is distributed

better. Firmer areas where the body is lighter will keep the mattress close to the body, helping to promote healthy spine alignment.

Look for this symbol for mattresses with comfort zones

# How to choose your mattress

There is no need to be an expert when choosing the right mattress, we're all for making things easy. Look for a mattress that supports your body and keeps the spine in its natural position, similar to when you stand up.

Three characteristics to consider are body weight, sleeping position and body shape. Learning a little more about these will help guide you to the right mattress.

We have an online comfort guide that will help you through these steps.

## Body weight

When choosing the right mattress, body weight can affect the level of support and comfort that you need. Take a look at the table to the right to get an understanding of which firmness matches your body weight.

| Position | <65 kg | 65–85 kg   | >85 kg     |
|----------|--------|------------|------------|
| Back     | Firm   | Extra firm | Extra firm |
| Side     | Firm   | Firm       | Extra firm |
| Stomach  | Firm   | Extra firm | Extra firm |

## Sleeping position

Your sleeping position can also affect the type of mattress that's right for you. Different positions place different amounts of pressure on the body, and this can affect the type of mat-

tress and pillow that is right for you. Read more below about different sleeping positions.

### Sleeping on your back

Generally, a mattress without comfort zones benefits back sleepers, promoting freedom of movement and a natural spine alignment.

A mattress with comfort zones can be beneficial for heavier back sleepers. A softer mattress is more suitable for those with lighter body weight.

You'll need the support of a firmer pillow when sleeping on your back

### Sleeping on your side

A mattress with comfort zones that allow hips and shoulders to sink in more while the rest of the body is supported is ideal.

Generally, a softer mattress is a good choice, but for heavier body weights, a firmer one can be more suitable.

A higher/firmer pillow helps to keep the neck and spine aligned when sleeping on your side.

### Sleeping on your stomach

A firmer mattress that helps the spine maintain its natural shape and reduce pressure on the spine (no banana shape) as much as possible is ideal.

A low pillow or no pillow is preferred to secure head and spine alignment for a stomach sleeper

## Body shape

Narrow hips, wide shoulders or narrow hips and shoulders? We're all different, and it's important to keep this in mind when choosing a mattress that supports your body shape. Read more below.

**Wide shoulders, regular to wider hips**

Larger solid build  
Generally more robust, solid, heavy person

**Wide shoulders, narrow hips**

Athletic build  
Shoulders wider than hips, slender person

**Narrow shoulders, narrow hips**

Smaller build  
Hips and shoulders same width, slender light person

**Narrow shoulders, wide hips**

Small/medium build  
Hips/thighs wider than shoulders, smaller curvy person

Generally, for those with wider hips and/or shoulders, a mattress with comfort zones is recommended. For those with a narrower body type most mattresses are suitable

## Personal preference and needs

### Temperature regulation:

For those who prefer a cooler sleeping environment, spring mattresses allow air to flow, and latex is made with holes to help air movement. High-resilience foam has more of an "on top" feel, potentially providing a cooler experience. Also look for cooling mattresses or mattress pads, they have a special layer that stays cooler as you drift off to sleep.

For those who prefer warmer sleep environment, foam mattresses or pads are generally warmer, as air flow is more restricted. A thicker duvet will also keep the heat in.

### Discomfort:

If you experience pain or discomfort, especially in your back or neck, you may need a mattress with specific support in those areas. A mattress with comfort zones supports the body and helps it to relax more, depending on the body type. Don't forget that a pillow can support your neck too.

A mattress pad is a good way of customising comfort needs, both memory foam and latex are good for reducing tension in muscles, helping them to relax.

If you don't move much during sleep but have discomfort, memory foam is a good choice. If you move around during sleep but feel discomfort, latex, plush foam and high resilience foam are good options.

### Calm or active sleep:

Most of us move around during sleep, if it's either a little (calm sleepers), or a lot (active sleepers) we have materials that will allow you to move without waking up.

Calm sleepers will benefit from memory foam as it hugs you as you sleep and responds slowly and consistently to your movements.

Latex, high resilience foam, plush foam and standard foam are more responsive to movement, making them ideal for active sleepers.

### Comfort guide

Try out our comfort guide!

# Take your sleep to another level

---

Once you've decided on the right mattress, it's possible to add more to your sleep experience, small additions can make a big difference. Also read about the complete sleep experience for more ways to create the perfect conditions for a good nights sleep.

## Mattress pads

Everyone sleeps in their own way, so why not make your sleep more personal with a mattress pad? Adding a mattress pad to your bed is an easy and affordable solution that can meet your needs while improving the overall comfort and hygiene – provided that the mattress is in good condition. We have pads both for those who sleep still and those who move around during the night. It's easy to remove the cover for airing or washing.

## Pillows

To find the pillow for your perfect night's sleep, start with your favorite sleeping position (on your back, side or stomach) and then look for specific benefits and features for your individual needs. We have different pillow materials to choose from such as polyester, natural and ergonomic pillows. Also, if you often feel warm while sleeping then choose a pillow with a cooling function which can add that extra comfort to your sleeping environment.

## Duvets

You can curl up and slumber comfortably in our wide range of duvets. Choose a synthetic or a natural material duvet that suits you. They come in a range of warmth levels to help you choose the best duvet that feels right for you, and the time of year. You can machine-wash them, so they're easy to keep clean and fresh. Add a duvet cover of your choice to customise the look.

## Mattress and pillow protector

An easy way to keep your mattress/mattress pad or pillow in top condition is with a protector. Choose one that meets your needs, comes with temperature regulation or is waterproof. They're also easy to toss in the washing machine when they need a refresh.

# The complete sleep experience

---

## Six ways to enjoy better sleep

Tired and slow or alert and energised. Good or poor sleep makes all the difference to a day. How long people need to sleep varies, but deep undisturbed sleep is always invigorating. Here are six things to keep in mind to enjoy better sleep.

### Comfort

It should of course feel comfy to crawl into bed. The trick is to have the right duvet, a mattress that suits you and your way of sleeping and a pillow that helps you find a good position. And then it's good night sleep tight!

### Temperature

A cool bedroom is almost always best, around 16–17°C is usually the recommendation. Also remember to choose a duvet that suits the season and the temperature you are most comfortable with.

### Sound

Loud, sudden or other disturbing noises affect sleep negatively. In a perfect world, it's absolute silent where you sleep, but it's also possible to dampen the sound with things like soft furniture, hefty curtains and thick carpets.

### Air quality

Good air quality is even more important in the bedroom than in other rooms, since we spend a lot of time in bed. A fan, air purifier or air conditioner makes a big difference, but green plants can also have a positive effect on air quality.

### Light

As dark as possible, that's the obvious recommendation. Blackout curtains keep out both sunlight and city lights, otherwise an eye mask will help. Before going to sleep, warm dimmed light is best, as it prepares the brain for sleep.

### Home furnishing and decluttering

Calm colours like blue, green and yellow are preferred in the bedroom. Keep the decor simple and try to organise your things so the bedroom doesn't feel cluttered. The less clutter, the more likely it is that you will sleep well.

# Our mattresses

---

For over 50 years our teams have been designing mattresses. We use our in-house comfort lab and knowledge from our development partners to create mattresses for different body types – to help you get a good night's sleep. There are several different materials we use, and we'll describe some of their features.

## Mattress firmness

It's important to note that the firmness level of a mattress can be subjective, meaning that what one person considers medium firm, another may find too soft or too firm. To determine

which firmness level you prefer, it's recommended to try out different mattresses and gauge your comfort level.

### Medium firm

A medium-firm mattress is a very weight-sensitive mattress that can follow the body's shape to give support in different sleeping positions and for certain body weights.

### Firm

A firm mattress is suitable for mid to heavier weight sleepers. It supports by following the natural shape of the body while allowing free movement during sleep.

### Extra firm

An extra-firm mattress provides firmness with a little sink-in effect and sturdy support when lying on the mattress. Sleepers of heavier weights may benefit from this firmness.

Even when you've found the right mattress, you may find it can take a few weeks for the body and mattress to adjust properly. If there are no health issues to consider, you should wake feeling refreshed and without pain.

## Mattress sizes

You won't have any trouble finding a mattress in a size that perfectly fits your sleeping quarter, whether it's an enormous master bedroom or a small and cosy space. IKEA mattresses are compatible with standard Australia and New Zealand bed sizes. See below our IKEA mattresses dimensions:

- Single mattresses – 92 x 189 cm
- Double mattresses – 135 x 189 cm
- Queen mattresses – 152 x 202 cm
- King mattresses – 180 x 200 cm

*King single and super king currently not available.*

## Benefits of materials and features

### Bonnell springs

Uniform feeling, springs that can transfer motion, meaning partners can feel your movements, ideal for single sleepers.

### Pocket springs & mini pocket springs

Springs that adjust as you move, right where you move. Motion is not transferred, so partners won't be disturbed by your movements.

### S-core pocket springs

Our innovative pocket springs, two layers of pocket springs with differing heights adjust with you as you move around. No motion transfer to partners. Great for support and comfort.

### Standard foam

Ideal for those without any specific sleep needs, offers good support.

### High-resilience foam

A foam that follows your movements and helps with pressure relief and has less sink-in effect.

### Plush foam

Plush foam is responsive to movements, while giving a sink-in feeling. Ideal for sleepers who move around when sleeping.

### Latex

Latex gives precise support for the whole body and is excellent at distributing pressure. It also effectively absorbs movement. Latex has good breathability for a pleasant and even temperature and transports away moisture.

### Memory foam

A soft and resilient material that slowly responds to your body. Good pressure relief that helps blood circulation and muscles to relax. Memory foam reacts to body heat, so it can feel warmer, but may be slower to react to movements in cooler bedrooms.

### Natural materials

Natural materials like wool, cotton, natural latex and coconut fibre help air flow freely through the mattress and draw away moisture, so you won't get too warm or too cold.

### Hybrid

We use foam in several layers to give you good support and comfort. Then we add a layer of springs to help you take your sleep to a whole new level.

### Cooling

Has cooling materials to help keep the temperature lower as you drift off to sleep.

### Comfort zones

A mattress with comfort zones will have different firmnesses in different parts of the mattress to give each part of your body the support it needs.

### Soft stretch cover

This type of cover moves as you move, contouring with both your body and mattress.

### Reinforced edge

Firmer springs around the mattress support when sitting on the edge and prevent rolling out of bed when sleeping.

### Edge to edge comfort

All of our mattresses have edge to edge comfort, this means that if mattresses are placed next to each other there is no loss of comfort where they meet.

### Washable cover

The cover is removable and can be machine washed; hang dry for best results.

### Roll packed

Makes it easier for you to handle the mattress and bring it home..

### Flat packed

This mattress comes flat packed/unrolled.

### 10-year guarantee

Our complete mattress is covered by a 10-year guarantee, see guarantee information to learn more.

### 365 days love it or exchange it

It takes time for you and your new mattress to get used to each other. That's why we give you 365 days to be sure you're compatible. If the chemistry isn't right, simply come back and choose another mattress.

**All our mattresses come with a 10-year guarantee**

That's why we've spent over 50 years engineering, developing and rigorously testing our mattresses. Because your sleep is what keeps us awake at night.

Read more about our 10-year guarantee.

**'Love it or exchange it' mattress exchange policy**

If you discover that it is too firm, too soft or too something else, just bring the mattress back and simply change for another one.

Read more about our mattress exchange policy.

# Spring mattresses

---

We have two types of spring mattresses, Bonnell and pocket. Spring mattresses are durable and distribute your weight evenly.

Bonnell springs are an open construction that helps air flow through the mattress and gives a uniform feel as all the springs are joined to each other. Also, movement can transfer – ideal for single person sleep.

Pocket springs are springs in individual pockets that move and respond independently so movement is not transferred through the mattress, meaning partners movements won't disturb you as you sleep.

All spring mattresses have a layer of foam on top that optimises support and comfort thanks to the spring construction.

Most of our mattresses and all mattress pads now come rolled as a neat package so you can take it home today!

# Foam mattresses

---

Foam mattresses provide support and distribute your weight. Different foams support the body in different ways, memory foam helps relieve pressure, plush foam has a nice sink-in effect and high-resilience foam gives a more sleep on the top feeling.

We combine different foams in some mattresses for comfort and support. For example, a high-resilience foam base provides support, when topped with memory foam you'll benefit from pressure relieving properties.

Foam mattresses are temperature sensitive, meaning if the room temperature is cooler then the foam can feel firmer.

# Mattress pads

---

A mattress pad lies on top of your mattress to provide even more comfort or supporting personal needs. They keep your mattress from getting dusty and dirty, since they're easy to remove for airing and cleaning, keeping your bed feeling fresh.

Adding a mattress pad is a good way of customising comfort, if you're looking for adding a little extra comfort or have specific needs like pressure relief, we can find the right product to help you get a good night's sleep. If mattress is not good, it won't help.

# **NOPAKTE**

Standard foam mattress pad

If you want to add a little extra comfort this is a good option. It's 2.5 cm thick and made with standard foam for extra soft-ness to your mattress. Add to that a washable cover to keep it fresh.

|        |            |

# Mattress bases

---

Mattress bases help your mattress last longer and stay comfortable by absorbing most of the stress and weight placed on your bed.

Combined with a bed frame, slatted bed-bases can be used as a base for spring, foam and latex mattresses. They help your mattress last longer and stay comfortable by absorbing most of the stress and weight placed on your bed. You can choose between slats or a spring core to customise your comfort

# LYNGÖR

## Mattress base

A mattress base has two big advantages. It makes your bed higher and it helps your mattress keep its shape for longer by distributing your body weight, providing extra support and lightening the load.

# Slatted bed bases

---

Mattress bases help your mattress last longer and stay comfortable by absorbing most of the stress and weight placed on your bed.

Combined with a bed frame, slatted bed-bases can be used as a base for spring, foam and latex mattresses. They help your mattress last longer and stay comfort-

able by absorbing most of the stress and weight placed on your bed. You can adjust the slats in some bases to be more or less firm, and some can be adjusted at the foot and head, allowing you to sit up and read or watch television or keep your legs elevated. Curved and flat slats can give a different comfort feeling.

# LURÖY

Slatted bed base

LURÖY slatted bed base with curved slats helps to absorb your body weight. The open structure allows air to circulate – which improves the breathability of the mattress and keeps it fresh.

# Cot mattresses

---

All our cot mattresses are made of safe, durable materials. Free from harmful chemicals and well-ventilated, they all provide a safe and comfortable sleeping environment for your baby.

For your baby's safety, always use the same size on cot and mattress to avoid gaps that the baby's head could become trapped in.

Some have handles that simplify making the bed. The materials have various properties. Foam is elastic and distributes your baby's body weight evenly. So does high resilience foam, mattresses have wrapped pocket springs that follow the baby's movements exactly.

# How to choose a cot mattress

## 1. Choose your materials

Choose between sprung or foam. All materials are safe and hygienic. If you are unsure ask yourself: what type of mattress do you prefer to sleep on?

**Sprung mattresses:** The sprung mattresses are made with a pocket sprung construction. The construction of sprung cot mattresses allows air to flow freely, promoting good air circulation and a favourable sleeping climate. A protective foam box adds comfort and durability.

**Foam mattresses:** The foam mattresses use quality polyurethane or high resilience foam, which are well cut, durable and intended for sleeping therefore making both a safe choice for cot mattresses. High resilience foam is durable, relieves pressure points, and provides comfort and support for your growing baby.

## 2. Identify individual needs

How many years do you think you will use your cot mattress? The longer you plan on keeping the same mattress will affect which mattress you should choose. If you want to use the same mattress into the toddler years a thicker and more durable mattress will provide better support for older babies and toddlers, who like to stand and bounce in their cots.

## 3. Choose your mattress

On the following pages you will find all of our baby mattresses on offer, along with detailed facts for each.

## Good to know

1. All our cot mattresses are firm, to provide a safe sleeping environment for your baby.
2. All mattresses provide some pressure relief, because they are made with materials like pocket springs or high resilience foam.
3. Well ventilated cover for better air circulation.
4. All children's mattresses promote good air flow, thanks to carefully considered choices in materials and construction.
5. Removable and machine-washable covers to create a hygienic sleeping environment for your baby.

PELLEPLUTT

Foam mattress

- 1. Removable cover
- 2. Foam

This mattress is made of 6 cm thick foam and has the same, smooth surface on both sides. You can easily turn it over if you like. The cover can also be removed and machine washed at 60°C.

## JÄTTETRÖTT

### Pocket spring mattress

1. Removable cover
2. Foam
3. Individually-wrapped pocket springs

This 11 cm thick mattress has individually wrapped pocket springs enclosed in a generous layer of pressure-relieving foam. Since the springs work independently, they closely follow your baby's body and provide support in the right places. The well-ventilated construction provides your baby with a pleasant sleeping environment. A practical handle makes the mattress easy to carry – and to turn over when making the bed. You can remove the cover and machine wash it at 60°C.

# Children's mattresses

---

Like IKEA mattresses for adults, children's mattresses are well ventilated to allow the airflow needed to prevent moisture and mould build-up. Most of our outer mattress covers are wash-able.

IKEA children's mattresses come in different comfort choices. A mattress needs to be firm enough for the needs of growing bodies, but soft and comfortable on top. All our mattresses are made of safe, durable materials. Free from harmful chemicals and well-ventilated, they provide a healthy and comfortable sleeping environment for your child.

# How to choose a mattress

To find the right mattress for your child, here are some things to consider:

## 1. **Foam or sprung?**

We offer a variety of different mattresses. Deciding if you want a foam or a sprung mattress for your child will help you to narrow down your choice considerably.

## 2. **Your budget**

We have mattresses to fit every budget – from basic mat-tresses to mattresses made with high quality materials. But you can be sure that every one of them is designed with your child's safety and healthy sleep as first priority. We never compromise on children's safety.

## 3. **Identify individual needs**

**Size:** Are you buying a mattress for an extendable bed or a junior bed? As the extendable bed "grows" with the child in three steps, the mattress comes in three pieces: Just add a part when you extend the bed. **Time:** How many years do you think your child will use the mattress? If you want to use the same mattress from the early years well into childhood, a thicker and more durable mattress will provide better support as your child grows.

## 4. **Choose your mattress**

On the following pages you will find all of our children's mat-tresses on offer, along with detailed facts for each.

**Air circulation:** All children's mattresses promote good air flow, thanks to carefully considered choices in materials and construction.

UNDERLIG

Foam mattress for junior bed

- 1. Removable cover
- 2. Medium firm foam
- 3. Firm foam

This 10 cm thick mattress has two different surfaces – one egg-shaped side with medium-firm comfort and one smooth side which is firmer. The texture of the foam makes the mattress soft and well-ventilated, which provides good support and a comfortable sleeping environment for your child. The cover can be removed and machine washed at 60°C. The mattress is roll packed so it's easy for you to bring home.

# How to choose duvets, pillows and protectors

---

Duvets, pillows and protectors are an important part of the complete sleep comfort. The pillow that feels best for you together with your favorite mattress is the base for a good night sleep. Adding a pillow and a mattress protector to protect and keep the pillow and mattress

fresh and prolong its life is easy to be done. A duvet in your preferred material and warmth rate is the last element which makes you feel comfy in bed, sleep well and wake up refreshed.

In order to find the right duvet or pillow for you, it is good to consider the following:

## 1. Natural or man-made filling material?

We offer a wide choice of duvets and pillows in different material choices: Natural materials like down and feathers and man-made materials like polyester, lyocell and memory foam. Considering which material is best for your comfort needs will help you to narrow down your choice considerably. Read more about the filling materials on the following pages.

## 2. Which quality?

We have duvets and pillows in different qualities to fit individual needs and budgets. These qualities are determined by the materials they are made of and the detail of workmanship. For sure, no matter your choice, they are all designed to give you the best possible comfort.

## 3. A cooler or a warmer duvet?

The duvet that is just right for you is determined by your sleeping preferences. Do you easily get warm in bed or do you rather need more warmth from your duvet? Do you share the duvet with someone? What's your bedroom's temperature? For children, it's best to choose a duvet that's cooler and rather lightweight, breathes well and is easy to wash, preferably duvets in man-made material. You can find duvets for younger children at Children's IKEA.

## 4. A softer or a firmer pillow?

We offer pillows in a softer and a firmer comfort. It is a good start to test your pillow together with your mattress in order to find the right one for you. Small children are most comfortable with softer pillows. For older children, it's best to choose a pillow according to their individual preferences. You can find pillows for younger children at Children's IKEA. Adding on a pillow protector is an easy way to keep your pillow clean and fresh so it lasts longer.

## Duvets and pillows comfort symbols

The symbols below are used to show the features of our comfort products.

### Cool

This is a cool, very thin and lightweight duvet with less filling. It contains a temperature-regulating material.

### Light warm

This is light warm, thin and a lightweight duvet with less filling.

### Warm

This is a warm, thicker duvet with more filling.

### Extra warm

This is an extra warm, really thick duvet with a generous amount of filling.

### All seasons

This is a 3 in 1 duvet. One light warm duvet, and one warm duvet that can be combined to make an extra warm duvet.

### Low pillow

This pillow has less filling. Choose this pillow if you are a stomach sleeper and need a lower pillow that aligns your head and spine.

### High pillow

This pillow has more filling. Choose this pillow if you are a side or back sleeper and need the support of a firmer, higher pillow.

# How to care for your duvets and pillows

---

## General advice for all materials

Mites thrive in damp, warm and dark environments. Therefore, when you wake up in the morning, air your duvets and pillows well so remaining moisture can evaporate before putting them back on the bed. Moreover, you can wash all IKEA duvets and pillows at 60°C (apart from memory foam pillows, where only the cover can be washed), the temperature at which mites die. To keep your duvets and pillows free from mites

and dirt, carefully follow the washing instructions. Air your duvets and pillows often so they will be free from dust and stay fresh and dry.

You can prolong the life of your pillows with a pillow protector which protects them from stains and dirt, read more on page 68.

## Care instruction symbols

**Machine wash hot 60 degrees**  
The product is machine-washable at 60 degrees, the temperature that kills dust mites.

**Tumble dry, normal temperature.**

**Iron, medium temperature.**

**Do not wash.**

**Tumble dry, low temperature.**

**Do not dryclean.**

**Do not bleach.**

**Do not tumble dry.**

**Do not iron.**

## Additional advice

### Natural material

- For down and feather duvets and pillows you should only use one third of the normal amount of detergent and wash them separately.
- After washing, dry your natural duvets and pillows in the tumble dryer without delay until the filling is completely dry. You can place some tennis balls in the dryer which will keep the filling moving and ensure more efficient drying. Like that your duvets and pillows will regain their fluffiness and dry more quickly. The balls should of course not shed colour.

### Man-made material

- Man-made duvets and pillows are very easy to care for and can be washed often. They also dry relatively quickly.

### Memory foam

- A pillow with memory foam filling moulds to your head and neck. This helps your muscles relax and, consequently, you will move less and sleep better.
- Consider that it may take some time to get used to this type of pillow, due to the unique properties of the material.
- The removable cover can be washed at 60°C. The filling is not washable; follow the care instructions on the label.

# Duvets

---

Sleeping comfortably is an individual thing. Our duvets come in a range of warmth ratings and fillings so you can choose what's best for you. So whether you like being warm or cool in bed, or prefer down and feathers or new materials like easy to care for lyocell, you'll find the duvet you need for a comfortable night's sleep. From cool to extra warm.

## **Down and feathers**

Get comfy the natural way with down and feather duvets. The more down, the softer, warmer, and lighter the duvet, while feathers draw away moisture to keep you nice and dry and there's a range of warmth levels, so you can choose what suits you the best. Our down and feather duvets are machine-washable.

## **Polyester**

You can curl up and slumber comfortably in polyester comforters with their cozy light fibre filling. They come in a range of warmth levels to help you choose the best synthetic duvets that feels right for you, and the time of year. You can machine-wash them, so they're easy to keep clean and fresh.

# SKOGSFRÄKEN

# RÅDHUSVIN

Duvet, warm

### Care instructions

- A warm duvet made of natural fibres; 100% unbleached and undyed cotton on the outside and 100% wool filling on the inside.
- Wool allows air to circulate, transports moisture away and gives you a comfortable sleeping climate with an even temperature.
- Stays fresh for a long time thanks to the natural odour resistance of wool. You can preferably air the duvet regularly to freshen it up between washes.

### Material

Fabric: 100% cotton.  
Filling: 100% wool.

Machine-washable at 30°C.

## Many reasons to love wool.

Wool is a material that keeps us warm when it's cold and cool when it's warm, and it absorbs moisture too.

# Mattress protectors

---

Let your bedding live longer. Keep your bed fresh with mattress and pillow protectors! A mattress protector will protect your mattress from stains and dirt as well as prolonging its life against general wear-and-tear. It's removable, so it's easy to wash when needed. Some protectors are filled to provide extra comfort and softness and to draw moisture away from the body.

## **An indispensable protection**

if your bed is exposed to shedding pets or playing children. You can also enjoy your bedtime snack or breakfast in bed without having to worry about ruining your mattress with the slightest little accident (and who doesn't have those?). A mattress protector gives you peace of mind.

## **Washable and easy to keep clean**

Our mattress and pillow protectors are easy to wash if they get stained or dirty. All our mattress and pillow protectors are easy to remove and machine-washable at 60°C to get rid of tough stains and dust mites. If you live in a high spill-risk household, we'd recommend you have a look at our waterproof pillow and mattress protectors. These are designed with a layer that prevents any liquids from passing through and into the pillow. This can be a real lifesaver when the dog jumps up and knocks your morning coffee out of your hand.

## **Mattress protectors that stay in place**

We offer protectors for all sizes of pillows and beds. They have elastic edging or elastic ribbons in each corner to keep them stretched out and firmly in place. Just remember to check that your preferred mattress protector fits your mattress, since the elastic ribbons fit mattresses with different widths and heights.

GRUNSNARV

Waterproof  
mattress protector

Care instructions

- A mattress protector in recycled polyester with a waterproof layer that prevents liquid from passing through.
- The elastic edging all around makes sure the mattress protector stays in place and also protects the sides of your mattress.

Material

Top fabric/sides: 100% polyester (100% recycled).  
Waterproof layer: Polyurethane.

# Protect your mattress.

A mattress protector is an easy way to help your mattress stay fresher and cleaner while reducing general wear and tear. Easy to use, they're quickly removable and machine washable.

# Pillows

---

A good night's rest is one of life's greatest – yet simplest – pleasures. It's also an essential part of everyday health and happiness. That's why having the right pillow is so important. A good pillow should be smooth, soft and provide the perfect amount of support for your head and neck while you sleep. It lets you relax and rest comfortably while literally taking the weight of your shoulders.

## **Choosing the right pillow for you**

The softness, firmness and shape of your pillow should be determined by your sleeping habits. Pillows are designed to provide different support depending on your normal sleeping position. A good pillow should keep your head at a position and angle like when you're standing up with perfect posture.

A firm and high pillow is usually designed for back or side sleepers, because your head will need more support to be perfectly aligned. Softer pillows are generally meant for stomach sleepers, since that position requires less firmness to achieve the required neck-support.

## **Polyester pillows**

A comfy pillow that suits how you sleep can mean a happy start to each day. Our synthetic pillows come in low and high types. All are machine-washable, so you can keep them clean and fresh.

## **Down and feather pillows**

You can't rest your head on a cloud, but our feather pillows can get you pretty close to the same feeling. Our down pillows come in softer and firmer options – and they're all machine washable at a very hot temperature to kill those pesky dust mites.

# BERGVEN

Pillow, side/back or stomach

## Care instructions

Available as both low and high

- A pillow in soft dobby woven cotton, filled with duck down and feathers.
- The resilient inner core of down and feathers is surrounded by a soft down/feather filling. This gives good support and relieves pressure on your neck and shoulders, helping you to relax.
- Double piping creates larger pockets for the filling to move around in. This increases the fullness and support of the pillow.
- You get a dry and comfortable sleeping environment since the cotton fabric breathes well, which helps air to circulate and moisture to evaporate.
- Choose the high version of this pillow if you are a side or back sleeper or the low version if you are stomach sleeper.

### Material

Fabric: 100% cotton.  
Outer filling: 90% duck down, 10% duck feathers.  
Centre filling: 60% duck down, 40% duck feathers.

Tumble dry after wash until the filling is completely dry.  
Use 1/3 of the normal amount of detergent when washing.

## Soft and breathable.

Lyocell is clever. It's a material, made from wood, but turned into a strong and silky-smooth fibre. It's breathable.

# Ergonomic pillows

---

A good night's sleep means a good start to your morning and a better day. Ergonomic pillows are designed to give your head, neck, and shoulders the right support so you get the rest you need, every night.

Whatever way you sleep, on your back, side or stomach, or if you move between positions, you can find an ergonomic pillow here to help you sleep like a baby and wake up refreshed.

# KLUBBSPORRE

Ergo pillow side/back sleeper

## Care instructions

Pillow

Pillow cover

Available as high

- An ergonomic pillow with two types of comfort; cushioning foam on one side and a cooling gel on the other.
- The memory foam cradles your head, neck and shoulders, relieving pressure and tension. It maintains an even temperature and has small holes in the core, so air can circulate and wick away moisture.
- The gel layer gives a cool, soothing sleep surface.
- Both the memory foam and the gel layer are made of the same material, but have different densities which give them different characteristics.
- Choose this pillow if you are a side or back sleeper and need the support of a firmer, higher pillow.
- The soft fabric cover breathes and wicks away moisture.

## Materials

Top fabric: 51.5% polyethylene, 48.5% polyester (100% recycled).  
Back fabric: 99% polyester, 1% elastane.  
Filling: Polyurethane memory foam.  
Piping/inner fabric: 100% polyester.

Ergo pillow multi position

Care instructions

Pillow

Pillow cover

- The butterfly shape is comfy for all sleeping positions. Whether you prefer side, back or stomach or like to change positions throughout the night, this pillow has you covered.
- Super soft memory foam cradles your head, neck and shoulders.
- The shape allows you to wrap your arms around the pillow for extra comfort while sleeping or resting.
- Suitable for all sleeping positions since the pillow is shaped with both high and low sides. The high side is comfy for side/back sleepers while the low side is comfy for stomach sleepers.
- The cover is removable and machine washable at 60°C.

Material:

Cover/Piping: 100% polyester (100% recycled).  
Filling: Polyurethane memory foam 43 kg/cu.m.

# Pillow protectors

---

Adding a pillow protector helps you to keep your pillow fresh and clean. It also prolongs the life length of your pillow as you rather wash the protector frequently instead of the pillow. Pillow protectors are easy to remove and put back on again and take up less space in the washing machine. There are different qualities of protectors available to suit your comfort needs and budget.

## RÅDHUSVIN

### Pillow protector

#### Care instructions

- You can prolong the life of your pillow with a pillow protector against stains and dirt.
- Made of natural fibres – 100% unbleached and undyed cotton on the outside and 100% wool filling on the inside.
- Wool is temperature regulating and keeps you warm in the winter and cool in the summer, which gives you an even and comfortable sleeping climate throughout the night.
- Wool allows air to circulate, transports moisture away and gives you a comfortable sleeping climate with an even temperature.
- Machine-washable at 30°C.

#### Material:

Fabric: 100% cotton  
Filling: 100% wool

# SOTNÄTFJÄRIL

Waterproof pillow protector

## Care instructions

- You can prolong the life of your pillow with a pillow protector against stains and dirt.
- The wadded surface adds an extra layer of softness and comfort to your pillow.
- Durable and discreet as the waterproof layer is between the wadding and the fabric
- The pillow protector is machine-washable at 60°C.

## Material

Fabric: 100% polyester (100% recycled)

Filling: 100% polyester (100% recycled)  
Waterproof layer: 100% polyester

# ÄNGSKORN

Pillow protector

## Care instructions

- This soft padded pillow protector prolongs the life of your pillow while also adding a layer of cushioned comfort. The zipper keeps the pillow snugly inside. Unzip to remove the cover for easy washing.
- A quilted pillow protector with a lyocell and cotton blend fabric and a lyocell and polyester filling. The polyester filling is mainly from recycled sources.
- You experience a comfortable and dry sleep since both the fabric and filling contain lyocell fibres which absorb moisture.
- Protects from stains and dirt and prolongs the life of your pillow.
- The pillow protector is machine-washable at 60°C, a temperature that kills dust mites.

## Material

Fabric: 55% lyocell, 45% cotton.  
Lining: 100% polypropylene.  
Filling: 50% lyocell/50% polyester (min. 70% recycled).

50x80 cm 606.291.11

# LUDDROS

Pillow protector

## Care instructions

- Protects your pillow from stains and is easier to wash than a whole pillow. Simply unzip and toss it into the washing machine. Thanks to the cotton and polyester mix it can be washed frequently.
- A pillow protector with polyester and cotton blend fabric and polyester filling.
- You can prolong the life of your pillow with a pillow protector against stains and dirt.

## Material

Fabric: 52% polyester (100% recycled), 48% cotton.  
Lining: 100% polypropylene.  
Filling: 100% polyester (min. 80% recycled).

# Give your mattress a little love

---

Vacuum your mattress now and then. Complement it with a mattress protector that can be removed and machine washed. And if possible, turn the mattress occasionally to wear it evenly. Simple tips that will keep your mattress fresh for longer.

Sometimes the mattress has a noticeable smell when you open the packaging. The smell isn't harmful or toxic and disappears over time. Airing and vacuuming the mattress helps to eliminate the smell faster.

All our mattresses can be used immediately, but keep in mind that a packaged mattress only regains its full shape, look and comfort after approximately 72 hours. You'll find a label inside the mattress showing care instructions.

Like with a new pair of shoes or jeans, your body will need a couple of weeks to adapt to the new mattress. If you still feel the mattress is not working for you by then, get in touch with us and we'll support you.

# Care guarantee and after care

---

## We place high demands on our mattresses

Good mattresses don't have to cost a lot. To create a better everyday life for the many people we place high demands on all IKEA mattresses. They're rigorously tested to comply with strict standards for quality and durability and the highest standards for domestic use.

This means we can offer a 10-year guarantee on the entire mattress against defects in materials and workmanship when you buy mattresses from IKEA. Read about the terms and conditions in the guarantee folder.

### What is covered under a mattress guarantee?

Split seams

Damaged coils

Unsmooth surface

Broken handles

Substantial sagging

Broken box spring

### What is NOT covered under a mattress guarantee?

Feeling uncomfortable

Cost of non-defective components

Tears or scratches

Discolouration/staining

Minor sagging

Failing to flip/rotate

# Quality and testing

---

## One thing you can count on – our mattresses

We've rolled around on our mattresses, spilled coffee and lived with them much like many do. Not us literally, but test lab machines that simulate things like a person weighing 140 kg rolling around 50,000 times. That's why we know they take a lot – and offer a 10-year

guarantee on the entire mattress. Your sleep is our priority, along with health and the environment, so we also avoid using any harmful chemicals. A lot can feel uncertain, but you can count on our mattresses.

**10**

Mattresses have a 10-year guarantee. Read more in [IKEA.com/au/en/customer-service/returns-claims/guarantee/](https://www.ikea.com/au/en/customer-service/returns-claims/guarantee/)

# Services

---

Our broad service offer gives you the freedom to choose not only the products that suit you but also decide how much you want to do yourself and how much you want us to do for you. On this page you'll find the different services that we can offer to help and support you.

For more information on our services, please see more at [IKEA.com/au/en/customer-service/services/](https://www.ikea.com/au/en/customer-service/services/)

For more information on our return policy, please see more at [IKEA.com/au/en/customer-service/returns-claims/return-policy/](https://www.ikea.com/au/en/customer-service/returns-claims/return-policy/)

## Planning and consultation

Even on big projects, the little things matter. Discuss your ideas with our team of design professionals and we'll help nail them down in detail.

## Assembly

All of our products are designed to be assembled by you, but we're more than happy to help put it all together, too.

## Love it or exchange it policy

It's OK to change your mind. You've got 365 days to exchange your mattress if after a while you discover that it is too firm, too soft or too something else

## Delivery

Whether you're shopping in store or online, and no matter how big the purchase, we'll do the heavy lifting and bring it to your home or business.

## Removal and recycling

On delivering your new sofa or mattress, we can remove and recycle the old one for you.
