

Wall shelves

Safety

Different wall materials require different types of fixing devices. Use fixing devices suitable for the walls in your home, sold separately. If you are uncertain about what type of fixing devices to use, please contact your local hardware store.

Good to know

The shelves holds 10 kg when supported by two brackets and 20 kg when supported by three. We recommend that you use three brackets with the 120 cm long shelf to prevent the risk of the shelf slanting. Spread the load evenly on the shelf.

Shelves for every need

With the different shelves and brackets you have the flexibility to create your own personal solution that fits any space. From small to big, in odd spaces, on narrow walls or high places to maximise storage. The shelves are suitable for all rooms in the home, except for wet rooms, so feel free to be creative.

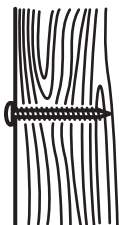

Wall anchoring guide

We all want our homes to be a safe place. With the right fixing devices, your wall shelf will be a safe place for your favourite things. Here are some things to think about when installing your wall shelf.

It's the fixing devices to the brackets that determine how steady and stable your wall shelf will be. Different wall materials require different types of fixing devices – that's why we don't include them with our brackets. Instead, it's important that you choose fixing devices that are suitable for your wall.

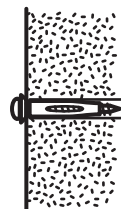

Be aware that different wall materials are able to support different loads of weight. For instance, wall made of plaster cannot support as much weight as walls made of wood, concrete or brick.

If you don't find what you need in the FIXA range, we recommend you contact your local hardware store. Never let children climb or hang on the shelf.

Wall Material: Drywall or plaster with available wood stud.

Anchoring device: Screw inserted directly into stud. For example, a 5 mm screw provided with IKEA FIXA plug and screw set.

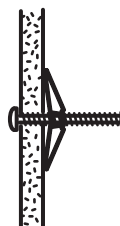

Wall Material: Masonry.

Anchoring device: Plug with screw. For example, an 8 mm plug provided with IKEA FIXA plug and screw set.

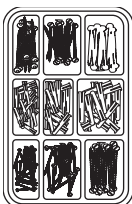

Wall Material: Drywall or plaster without available wood stud.

Anchoring device: Plug with screw. For example, an 8 mm plug provided with IKEA FIXA plug and screw set.

Anchoring device hollow wall: Toggle-style

Fixings & fasteners

260-piece screw set with plug. Assorted screws and wall plugs for use in walls made of wood, plaster, concrete and brick. The screws are made of galvanized steel to protect against corrosion. Comprises (measurements: diameter x length): Round-headed screws; 5×60 mm, 4.5×50 mm, 4×40 mm, 3.5×35 mm, 3.5×30 mm. Countersunk screws; 5×60 mm, 4.5×50 mm, 4×40 mm, 3.5×35 mm, 3.5×30 mm. Wall plugs; 8×51 mm, 6×36 mm, 5×31 mm, 20 pieces of each. Be aware that different wall materials are able to support different loads of weight. For instance, wall made of plaster cannot support as much weight as walls made of wood, concrete or brick. Only recommended for indoor use.

201.692.48 \$15

200-piece wood screw set. Assorted screws for attaching wood to wood and non-wooden objects to wood, such as brackets to shelves and hinges and locks to doors. The screws are made of galvanized steel to protect against corrosion. Can be stacked with other boxes in the FIXA series. Comprises (measurements: dia. x length): Round-headed screws; 4×45 mm, 4×35 mm, 4×25 mm, 4×16 mm, 25 pieces of each. Countersunk screws; 4×45 mm, 4×35 mm, 4×25 mm, 4×16 mm, 25 pieces of each. Only recommended for indoor use.

502.242.29 \$10

Combinations

Mix and match to suit your needs with shelves and brackets. Our big choice of sizes, including shelves you can cut to the exact length you need, means you can find a shelf to match almost any space. Here are some suggestions.
