Good kitchen appliances should fit with the people who use them. We all have different needs, tastes and wallets. Our appliances are designed to make your life in the kitchen easier. To make this happen, we’re working with suppliers that are the best in their field at simplifying people’s everyday. We share our knowledge about life at home, and they share their expertise with us. Together we create appliances to rely on at prices that fit every size of wallet.
Find your ideal set of appliances

Getting a new kitchen involves some decisions. What style are you looking for? What do you need your appliances to do? What’s your budget? To make it easier for you, we have developed our appliances to fit perfectly together as well as with our kitchens. You’ll find more information about every individual appliance on the following pages.

Basiclly everything you need

In this set you have all the basic functions you need at a price you won’t believe. The design is clean and LAGAN oven, cooktop and rangehood all match each other perfectly. For easy cooking and baking, you have everything at hand.

LAGAN oven, white.
904.169.19 $299

LAGAN wall mounted rangehood, white.
704.013.96 $79

LAGAN HGC3K glass ceramic cooktop.
582.847.13 $249
Modern, in every sense of the word

The appliances in this set have all the functions a modern kitchen should have. It includes everything from forced air in the oven helping you to cook several dishes at the same time, to LED strip lighting in the rangehood that illuminates the entire cooktop effectively. Combine with MATMÄSSIG induction cooktop, which can save up to 40% energy and 50% of your cooking time.

The best from two worlds

To enjoy a classic styled kitchen doesn’t mean you have to settle for old-fashioned appliances. MATTRADITION offers you both. You can cook or bake several dishes at the same time without flavours spreading between them in the forced air oven, and the low noise level from the extractor hood allows you to have a normal conversation while cooking. Enhance the classic style by combining with MATMÄSSIG gas cooktop with burners giving you perfect control over both heat and a tasty end result.
An appetising mix of design and function

If you want a stylish kitchen that stands out, this set in matt black finish is a perfect choice. As all our forced air ovens, EFTERSMAK helps you to cook several dishes simultaneously without compromising on intended tastes. The rangehood has a LED lighting strip giving you an even light over the entire cooktop. Not to mention its bold design, which will be the icing on the cake that turns your kitchen into a modern style statement.

Classic elegance on the outside, extra everything on the inside

A classic set with appliances filled with great cooking functions! This is a perfect combination for you who like to cook and bake. The ANRÄTTA forced air oven has a pyrolytic cleaning function burning grease and food residue to ashes. The flexible bridge zone on the SMAKLIG induction cooktop adapts to different pot shapes and sizes and the angled BEMÖTA rangehood makes the area around the cooktop more accessible.

A high-end kitchen with healthy steam cooking

With clean lines and a modern expression, KULINARISK forced air oven, microwave combi oven and rangehood are some of our high-end, most innovative appliances. They’re all equipped with touch control panels which enhance the clean, modern look. The steam cooking retains the food’s taste and nutrients, keeping it moist and full of flavour. Together with the extra wide cooktop with flexible zones this set is a great choice for the home chef.

FIND YOUR IDEAL SET OF APPLIANCES

KULINARISK forced air oven with steam function, stainless steel.

$1,499
Ovens

Whatever cooking (or kitchen) style you have, we have an oven for you! Offering a wide range of functions - everything from basic warming to steam cooking, making every cooking experience easier and more fun - they are also developed to fit perfectly in your IKEA kitchen. Simply choose the functions that suit the way you cook, and we will meet you with a matching look.

When choosing an oven, consider the following:

01 How often do you use your oven, and for what kind of food? We have everything from very simple, easy-to-use ovens to more advanced with lots of different functions.

02 How much food do you cook at the same time? Our ovens come in sizes from 56 to 72 litres.

03 What style do you prefer? No matter if your kitchen goes in a more modern or classic style, we have ovens that will match perfectly.

Tips

Did you know that telescopic rails make cooking a lot simpler, and safer? To load and unload food without getting burned is a piece of cake as you get a better grip on the ovenware - when using oven gloves, that is. And it'll be a snap to pull out the food to check the temperature, stir or lubricate, too.

Did you know that you can clean the oven and keep it as new with close to zero effort from your part? With the self-cleaning pyrolytic function you heat up the oven to burn all grease and food residue to ashes. All you have to do is to wipe it out afterwards.
**Types**

### Ovens

Ideal for you who wants an easy to use oven, including top and bottom heat and all the basic functions you need for cooking and baking.

### Forced air ovens

Ideal for you who loves to cook. A fan spread the heat fast and evenly, letting you cook different dishes at the same time without mixing flavours.

### Forced air ovens with self-cleaning/pyrolytic function

Ideal for you who love to cook but not the clean. These ovens have the same functions as forced air ovens, plus they're easy to keep clean. Just press a button to burn grease and food residue to ashes and wipe it out with a clean cloth.

### Forced air ovens with steam function

Ideal for you who love to cook healthy food. This type of oven has the same functions as forced air ovens, but with the addition of the steam function. The combination of steam and heat retains more taste and nutrients, while making the food soft and moist on the inside and crisp and brown on the outside.

Key features

Spacious inner dimensions with up to 5 cooking levels ensure you have plenty of room for your food. Choose between ovens with volumes ranging from 55 to 72 litres.

Telescopic rails let you load and unload food without getting burned as you get a better grip on the ovenware. Pull your food out to fast and steadily check the temperature, stir or lubricate.

Get the roast just right every time using the integrated meat thermometer with temperature sensor.

A built-in modern-looking clock is ideal for keeping an eye on the time while you’re cooking.

A built-in modern-looking clock is ideal for keeping an eye on the time while you’re cooking.

An easy to use and keep clean touch control adds a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

Main cooking functions

**Top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

With the steam function you combine steam and hot air to get optimal humidity and heat levels, keeping food soft and moist on the inside, and crisp and brown on the outside.

The fan forced air convection spreads the heat quickly and evenly, allowing you to cook or bake several dishes simultaneously without flavours spreading between them.

With the grill function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, as well as a nice golden-brown colour on your gratins.

With pre-set cooking programs you can choose the proper setting for different food, dishes and recipes – and get the same yummy result every time.

**Thaw your food seven times faster using the quick defrost function.**

The self-cleaning pyrolytic function makes it easier for you to clean the oven. Grease and food residue are burned to ashes that you easily clean out with a cloth.

The bread/pizza baking function gives your food a more intense brown outside and a mouth-watering crispy bottom.

The warming program enables you to keep food warm without becoming overcooked or burnt.

The fast quick pre heat function warms up the oven quickly.

The special pastry function can help you to get the perfect moist topping on your baked cookies and pies.

- **Measurements**
  - Usable volume: 72 litres.
  - W59.4×D56.7×H58.9 cm.

A smaller oven with many functions to make food both healthier and tastier. You can cook with pure steam to retain the nutrients, getting the right crispiness on the outside and moisture on the inside.
Microwave ovens

Microwave ovens aren’t what they used to be. In fact, they’ve become much better – a wide range of functions lets you grill, bake, steam and crisp, apart from defrosting and reheating. What’s more, the combination of forced air and microwaves in our microwave combi ovens reduces both cooking time and energy consumption. Being a microwave oven and regular oven in one, it’s a practical choice for smaller kitchens, or if you cook a lot of food and need an extra oven.

When choosing a microwave oven, consider the following:

01 How often do you use your micro, and for what kind of food? We have everything from very simple, easy-to-use microwaves to more advanced microwaves/microwave combi ovens with lots of different functions.

02 How much food do you cook at the same time? With a microwave combi oven you can have all in one or get an extra oven when the big family comes to visit.

03 What style do you prefer? No matter if your kitchen goes in a more modern or classic fashion, we have microwaves that will match perfectly.

Sustainability

Oven cooking doesn’t have to take ages, or use lots of energy. With our microwave combi ovens, you get a forced air oven and a microwave oven all in one. It means faster baking, grilling and roasting, as well as quick defrosting and warming. Less time waiting around and more time enjoying great home cooking with the people you love. Less time in the oven saves you electricity, too, for smaller bills and a more sustainable life at home.

Tips

Did you know that cooking time is significantly shortened if you combine the micro function with forced air in a microwave combi oven, compared to an ordinary oven? The combination allows you to get a perfect result every time, while saving both time and energy. Did you know that placing a built-in microwave in a high or wall cabinet, is a smart use of space – but also a way to create an ergonomic and smooth workflow that’s just right for you.
Types

Microwave ovens
Ideal for you who fast and easily want to heat up or thaw food and beverages. Some of our models also include a crisp function allowing you to cook food.

A microwave combi oven
This is a microwave oven and forced air oven in one, ideal for you who hunger for versatility but don’t want two conventional ovens. You can use it as a microwave oven for quick warming or defrosting and as an oven for grilling, baking and roasting. Even better, you can combine both to save time and energy – without compromising the taste.

**Key features**

A built-in modern-looking **clock** is ideal for keeping an eye on the time while you’re cooking. Use the timer when you want total control over the cooking time.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

**Anti-finger print finish** makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

**Child-safety**

Our oven doors have a child-safety lock to make it safe for kids to be in the kitchen and take part in all the activities.

**Microwave functions**

The **crisp** function allows you to bake pizza, pie and other dishes faster than in an ordinary oven. The function is also great for frying food such as eggs, bacon, sausages and hamburgers.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, or a nice golden-brown colour on your gratins.

In a hurry? Use the **quick start** to heat up your food and beverages in a jiffy.

Thaw your deep-frozen food faster. The **defrost** function is ideal for meat and poultry, fish, vegetables and bread.

Oven functions

**Top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

The **fan forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes at once without flavours spreading between them.

The **bread/pizza baking** function gives your food a more intense brown outside and a crispy bottom.

The **special pastry** function can help you to get the perfect moist topping on your baked cookies and pies.

The **warming program** enables you to keep food warm without becoming overcooked or burnt.

With pre-set cooking programs you can choose the proper setting for different dishes and recipes – and get the same yummy result every time.

Cooktops

A cook’s best friend, the kitchen cooktop is central to everyday cooking. Our energy-saving induction cooktops deliver fast and precise cooking results, are very easy to use and include all the functions you may need. Each has its own unique features and a variety of sizes – choose between several flexible zones – to perfectly suit your kitchen and your cooking style.

When choosing a cooktop, consider the following:

01 How often do you use your cooktop? We have everything from mobile one-zone cooktops to high-end gas and induction cooktops.

02 How much food do you cook at the same time? You can choose to have a small cooktop with 1 or 2 zones to extra wide cooktops for large pots and pans.

03 What type of chef are you? If you’re the one who wants total control choose an induction or gas cooktop. You can also choose cooktops with flexible zones, which adapts to the shape of the pot or pan.

Sustainability

Save time and energy while you cook! Like to cook but don’t always have enough time? Induction cooktops heat up your pots and pans in a super efficient way. That means faster cooking and more time to sit and enjoy great home cooked meals with family or friends. Because induction cooktops only heat your cookware, they use less electricity and they’re safer.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).
Types

**Induction cooktops**
Induction cooktops are up to 50% faster and 40% more energy efficient. With just one touch you can select features and regulate the heat in an instant.

**Glass ceramic cooktops**
Glass ceramic cooktops are practical and easy to operate. Some have adjustable cooking zones that can be adapted to the size and shape of your cookware.

**Gas cooktops**
Gas cooktops are more than a professional-looking feature for ambitious cooks, they provide quick heat control needed for searing and frying.

Overview

**Induction cooktops**
- TILREDA

  - 59 cm
- MATMÅSSIG
  - 59 cm

**Gas cooktops**
- LAGAN HG4KX
  - 58 cm
- SMÅKOKA
  - 58 cm
- MATMÅSSIG
  - 60 cm
- ELDIGLÄGA
  - 73 cm
The bridge function gives you the flexibility to use larger and different pots for special recipes or occasions as it allows you to connect 2 cooking zones into 1 large one when needed.

Vary the cooking surface by using the flexible heating zones. You can use them together or separately, and adapt them to pots and pans in different shapes and sizes.

Get excellent control when you cook with the individual timers allowing you to time each zone separately. Ideal for boiling eggs, rice or pasta.

If you like cooking, you’ll love the pre-set cooking mode. Adjust to low, medium or high heat simply by moving the pot or pan on the flexible zone.

Depending on your needs and how much food you cook at the same time, choose a cooktop with enough cooking zones. We have cooktops with 1, 2, 3 and 4 zones. Also think about the width of the cooktop: the bigger the cooktop is, the more space you’ll have for pots and pans.

When you press the pause function, all activated zones are paused – and when you press the pause button again, the zones will come back to the same temperature as before. That way you can suspend the cooking process if you’re interrupted, and re-start again in an instant.

When you press and hold the child lock button for 4 seconds, you can’t start the cooktop or change the temperature. To unlock the cooktop, press the child lock button again for 4 seconds. This is also a good function to use when you’re cleaning the cooktop surface and don’t want to switch on any zones.

The touch and press control panel allows you to regulate the heat easily and precisely by just touching the + and – symbols.

Just slide your finger on the touch and slide control panel and the heat will adjust accordingly. With just one touch you can select features and regulate the heat in an instant.

The power booster delivers rapid intense heat to a single cooking zone, perfect when stir frying food or searing meat. The booster can be set with just one touch.

If you have a portable cooktop, it’s perfect for smaller kitchens or wherever you need an extra cooking zone. It’s easy to move around and can be stowed away when not in use to free up counter space for other activities. Just plug it in wherever you need it.

A portable cooktop is perfect for smaller kitchens or wherever you need an extra cooking zone. It’s easy to move around and can be stowed away when not in use to free up counter space for other activities. Just plug it in wherever you need it.

Rangehoods

An rangehood helps keep your kitchen air clean and free from smells, steam and grease. Our models now come with different air caption capacities, which means they have all been optimised to only extract the air that needs to leave the house, while keeping warm or cool air inside. And since an rangehood is also an important visual element in any kitchen, we have a wide range of wall-mounted, built-in, or ceiling-mounted models to suit different room settings and needs.

When choosing an rangehood, consider the following:

01 How wide is your cooktop? The width of the hood should be as wide or wider.
02 What does your kitchen look like? If you have an open plan in your home, make sure to choose a hood with low noise level.
03 Flexible tubing or charcoal filter? Find out if you can connect the rangehood to a tube that leads the air out of the building. If not, you need to connect the rangehood to a charcoal filter, which takes away the grease and odour from the air and lets it out in to the room again.

Sound levels

Sound levels for appliances are measured in decibels (dB). Our appliances have been tested to determine and measure this.

For rangehoods the operating speed or installation type can influence sound levels.
Decibel levels are listed in the product information. Compare decibel levels and choose the hood that’s suitable for your needs and comfort.
Rangehood types

Built-in rangehood
If you want a completely uniform and streamlined kitchen, choose a built-in rangehood with a front that match the rest of your kitchen.

Wall-mounted rangehoods
Our wall-mounted rangehoods come in many shapes, styles and sizes. Choose a unique piece or one that match the rest of your appliances and the kitchen. Just make sure it has the same size or is wider than your cooktop for optimal performance.

Ceiling-mounted rangehoods
A ceiling-mounted rangehood is the perfect solution if you have the ability to cook food on a kitchen island.

Overview

Built-in rangehoods
- UTDRAG 60 cm
- UNDERVERK 60 cm 80 cm

Ceiling-mounted rangehoods
- SVÄVANDE 90 cm
- OMNEJD 90 cm

Wall mounted rangehoods
- LAGAN 60 cm
- RYMĐSK 60 cm 90 cm
- MATTRADITION 60 cm
- BALANGERAD 80 cm

- FULLSTÄNDIG 80 cm
- MATELSKARE 60 cm
- GENÖTA 66 cm
- FOLJANDE 80 cm
- KULHÅRSA 90 cm
Rangehood features

All our rangehoods have energy efficient LED lighting. This type of lighting normally lasts as long as the rangehood does, and it illuminates the entire cooktop to make cooking easier.

When you cook a lot of food and the smoke is thick in your kitchen, the booster function will come to your rescue. It has a higher speed than max speed and can be turned on for maximum 6 minutes to dissolve heavy cooking fumes.

With dimmable lighting you decide how strong the light on your cooktop should be. Choose a stronger light when cooking, and a cosy mood light when eating.

An easy to use and keep clean touch control adds a modern touch to any kitchen.

Rangehood features

A kitchen hood with LED lighting and all the basic functions you need. Can be mounted in a wall cabinet for a uniform look in the kitchen. Combine with LAGAN oven and LAGAN cooktop.

Key features
- LED lighting
- Booster function
- Dimmable lighting
- Touch control

Performance
- Extraction rate in exhaust mode: 273 m³/h.
- Noise level at max exhaust speed: 71 dB (A).
- Extraction rate in recirculation mode: 75 m³/h.
- Noise level at max recirculation speed: 71 dB (A).

Installation
- For recirculation installation: Please use charcoal filter NYTTIG FIL 900.

Measurements
- Width: 600 mm.
- Depth: 510 mm.
- Height: 130 mm.
- Cord length: 1330 mm.
- Motor power: 115W.

LAGAN Wall mounted rangehood
$79
White. 704.013.96

LAGAN Wall mounted rangehood
$119
Stainless steel. 003.921.35

For more details about key features, see page 63
**UTDRAG**
Built-in rangehood
$149
Stainless steel. 703.921.46

Prefer a hidden hood? UTDRAG built-in rangehood with LED lighting is mounted almost invisibly in a wall cabinet. You start it and adjust the extraction area by pulling out the hood’s lower part.

**Key features**
- LED lighting
- Booster function
- Dimmable lighting
- Touch control

**Performance**
- Extraction rate in exhaust mode: 340 m³/h.
- Noise level at max. exhaust speed: 67 dB (A).
- Extraction rate in re-circulation mode: 140 m³/h.
- Noise level at max. re-circulation speed: 72 dB (A).

**Installation**
For recirculation installation: Please use charcoal filter NYTTIG FIL 120.

**Measurements**
- Width: 599 mm.
- Depth: 387-644 mm.
- Height: 215 mm.
- Cord length: 1090 mm.
- Motor power: 110W.

A powerful hood hidden in the cabinet! You just choose a door you like to get a uniform look in the kitchen. A LED lighting strip gives even work lighting ‒ making cooking more comfortable.

---

**UNDERVERK**

Fridges and freezers

Yes, an IKEA fridge or freezer keeps your food fresh for longer, but they do so much more to help make your life a little nicer. There are plenty of features for storing and enjoying your food in the best way possible—like, a chill mode for glass bottles, fan cooling for consistent temperatures, electronic displays for settings and functions, and fast freezing (just to name a few). And, all IKEA fridges and freezers are energy efficient, with an energy star rating.

When choosing fridges and freezers, consider the following:

01 How much food do you normally store in your fridge and/or freezer. How many are you in the family? How often do you shop? We have different sizes and capacities to choose between.

02 Do you need any specific function or accessories to simplify storing and organizing your fridge/freezer? We can offer interiors for every need.

03 What style do you prefer and what works in your kitchen? Choose between freestanding appliances creating a design statement in your kitchen, or integrated adding to a streamlined and uniform look.

Sustainability

Did you know that we throw away approximately 25% of all food we buy? That’s like dumping one bag of groceries in every four straight into the bin! IKEA fridges and freezers are full of smart ideas to help you keep food good, for longer. Wasting less food saves you money and time at the shops. Our fridges and freezers are all energy-rated using the Energy Star Ratings, so they even save you electricity, too.

Tips

Did you know you can keep your food fresh for longer with an in-built fan? The fan circulates the cool air and keeps the temperature consistent throughout the whole fridge. And as the temperature is the same everywhere, you can store your food and beverage exactly where you want it.

Did you know that defrosting and scraping ice is nothing but a bad memory? The no frost function automatically regulates the humidity levels and prevents ice and frost from spreading.
Fridge and freezer types

Freestanding
Should you prefer your fridge/freezer to be a unique piece in your kitchen, choose freestanding options. Plus, they hold more than integrated fridges/freezers without taking up more kitchen space.

Integrated
If you want a uniform expression, integrate your fridge/freezers behind the same fronts as the rest of your kitchen.

Overview
Freestanding fridges and freezers

- TILREDA

Fridge and freezer functions

A built-in cooling fan spreads the air and maintains a consistent temperature throughout, allowing you to make use of the entire space and store all types of food and beverages anywhere.

You’ll never ever have to defrost or scrape ice again! The no frost function automatically regulates the humidity levels to prevent frost and ice to spread on food or in the fridge.

The touch control panel makes it easy to select the right functions and temperature settings, whether you are cooling desserts, freezing fresh vegetables or going on vacation.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

The fast cooling switch allows you to quickly cool down fresh food and beverage, perfect after major groceries shopping.

The fast cooling switch allows you to quickly cool down fresh food and beverage, perfect after major groceries shopping.

The fast cooling switch allows you to quickly cool down fresh food and beverage, perfect after major groceries shopping.

More functions

Vacation mode allows you to keep the empty fridge closed while you’re away without a bad odour forming.

With fast freeze you can quickly reduce the temperature to lock in the freshness and nutrients of food, even in large amounts.

With bottle chill mode, an alarm sounds at the end of the cool down time. Perfect if you want to chill glass bottles in the freezer or to cool food.

A small fridge for a small-sized kitchen. Also handy in the day, basement, guest house, dorm room or wherever you may want quick access to a beverage or snack.

This freestanding fridge with freezer compartment has all the basic functions you need. The small size is ideal for small-sized kitchens. The adjustable shelves allow you to adapt the space inside.

You never have to defrost or scrape ice as the no frost function automatically regulates humidity levels to prevent frost and ice forming on food or in the appliance.

Dishwashers

Compared to hand washing that usually requires three times as much water, a dishwasher saves both water and energy. Our integrated dishwashers are designed to be fitted with your choice of door to match the rest of your kitchen, and come with tall interiors with space for lots of dishes and special features like the automatic door opener function: towards the end of the program, the door opens and stays ajar, letting the dishes dry quickly.

When choosing a dishwasher, consider the following:

01
What space do you have available and how many are you in the family? We can offer you dishwashers in different sizes and volumes.

02
Are there any specific functions that are important to you? Perhaps to have 3 levels of storage, which increase the storage space? That way you can get more dish out of the way and enjoy a clean kitchen.

Sound levels
Sound levels for appliances are measured in decibels (dB). Our appliances have been tested to determine and measure this. For dishwashers the operating program or installation type can influence sound levels. Look for the decibel (dB) level of an appliance listed in the product information and choose the dishwasher that’s suitable for your needs and comfort.

Tips
Did you know that all our dishwashers are integrated? You can have them with the same front as the rest of your kitchen to keep a uniform look throughout.

Did you know that you can dry the dish faster while using less energy? It’s called AutoOpen! During the drying phase at the end of the washing program, the dishwasher door is automatically opened and the dishes dry better. Clever, isn’t it?

Sustainability
Sit down, relax and save water! Let the dishwasher do the job while you can unwind after dinner or do something else you love. A dishwasher uses less water and energy than washing dishes by hand. Simply put, you’ll save both time and money while making your life at home more sustainable, too.

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except LAGAN).
Dishwashers functions

Our dishwashers have different sizes for different needs and kitchens. They’re 45 cm or 60 cm wide, and you can choose between models with 2 or 3 levels – 3 levels hold more.

With our water efficient dishwashers, lots of dishes will be sparkling clean with just a small amount of water. Soft plastic spikes and clever holders keep glassware in place and reduce the risk of breakages. While cutlery baskets that let you stand utensils up mean better cleaning and easier sorting and putting away.

All our dishwashers are fully integrated to match the rest of your kitchen. Towards the end of the program, the auto open function automatically opens the door so that the dishes dry as quickly as possible.

With adjustable baskets you can make room for plates and glasses of different sizes. With the beam on floor function, a beam of light shines on your floor when the dishwasher is running. The delayed start function allows you to run the dishwasher when you want. Our machines have delay options from 3 up to 24 hours.

With adjustable baskets you can make room for plates and glasses of different sizes.

The time beam on floor function projects a beam of light on the floor telling you the remaining time of the washing program. The beam on floor function projects a beam of light on the floor telling you the remaining time of the washing program.

Guarantee appliances

How long is the guarantee valid?
This guarantee is valid for five (5) years from the date of the original date of purchase of the IKEA appliance from IKEA, LAGAN and TILLREDA appliances, and fridges and freezers have a two (2) year guarantee, valid from the original date of purchase. The original sales receipt is required as proof of purchase. If service work is carried out under guarantee, this will not extend the guarantee period for the appliance, or for the new parts.

What is covered under this guarantee?
- The guarantee covers defects of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This guarantee applies to domestic use only. The exceptions are specified under the headline “What appliances are not covered under this guarantee”.

Which appliances are covered under this guarantee?
The free five-year (5) guarantee is valid for all domestic IKEA kitchen appliances and covers defects in materials and workmanship.

Which appliances are not covered under this guarantee?
- All appliances purchased from IKEA before 1st of August 2007. For appliances named LAGAN and TILLREDA, and fridges and freezers, a guarantee is valid for two years from the date of purchase.
- For appliances named LAGAN and TILLREDA, and fridges and freezers, a guarantee is valid for two years from the date of purchase.

Who will execute the service?
The designated service company will execute the service. If the product is installed in a non-standard built-in solution, the customer should contact IKEA Customer Service at www.IKEA.com.au.

What will IKEA do to correct the problem?
- The designated service company will examine the product and decide, at its sole discretion, if it is covered under this guarantee.
- If considered covered, the designated service company will re-install the repaired appliance or install the replacement, if necessary. The operation is covered if the product is easily accessible for repair. If the product is installed in a non-standard built-in solution, the customer has to make the product accessible before the service visit.
- The service will be carried out by a qualified specialist using our standard parts in order to adapt the appliance to the technical safety specifications of another country.

What is not covered under this guarantee?
- Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, damage caused by chemical or electro-chemical reaction, rust, corrosion or water damage including but not limited to limited damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions. • Consumables part including batteries and lamps. • Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible colour differences. • Accidental damage caused by foreign objects or substances or clearing or unblocking of filters, drainage systems or soap siphons. • Damage to the following parts in ceramic glass, accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to be due to production faults. • Cases where no fault could be found during a technician’s visit. • Repairs not carried out by our appointed service providers and/or an authorised service contractual partner or where non-original parts have been used. • Repairs caused by installation which is faulty or not according to specification. • The use of the appliance in a non-domestic environment i.e. professional use. • Transportation damages. If a customer transports the product to their home or other address, IKEA is not liable for any damage that may occur during transport. However, in case of IKEA delivery of the product to the customer’s delivery address, then eventual damages to the product that occurs during this delivery will be covered by IKEA, but not under this guarantee. In this case the customer should contact IKEA Customer Service at www.IKEA.com.au.

Our broad service offer gives you the freedom to design your own price tag by choosing not only the products that suits your budget but also deciding how much you want to do yourself and how much you want us to do for you.

Below you’ll find all the services you need to plan and by your entire kitchen – and how much each of them costs. For more details about our services, talk to a co-worker at your local IKEA store or visit us at IKEA.com.au.
