Take it home today

Easy to place, easy to use

LYCKSELE sofa-bed is perfect when you want to be able to both sit and sleep. It's easy to fit in any room and easy to convert to a bed. You choose the mattress and cover yourself, so you can make it just the way you like it. You can even take off the cover to wash it – or to have a little fun by changing to a new cover.

You choose the mattress

Do you like a soft or firm mattress? With LYCKSELE sofa-bed, you choose the mattress you like best. There are three mattresses to choose between and they feel quite different when you sit or lie on them. Try them out to find the one that's most comfortable for you. Once you do, you will have a pleasant place to be – both day and night.

How to convert

It takes a few short seconds to convert LYCKSELE sofa-bed into a bed. Just remove the cover and pull out the seat. The sofa-bed turns into a comfortable 140×188 cm double bed. To fold up the bed, just lift up the foot end as far as it goes.

When you push it down again, the bed will fold up neatly, almost without any help from you. It's a sofa again!

Comfort mattresses

LÖVÅS

A firm, yet supple polyurethane foam mattress that will provide your body with both support and sleeping comfort. The mattress is 10 cm thick and has a removable, drycleanable cover.

MURBO

The top layer of high resilient foam shapes itself to your body, allowing your spine to remain straight and your sleeping position to be more relaxed. The resilient foam also makes the mattress very durable. The bottom layer consists of polyurethane foam. The mattress is 10 cm thick and has a removable and machine washable cover.

HÅVET

Latex and high resilient foam combine elasticity with the ability to mould to the contours of your body. Latex is a material which improves air circulation and allows moisture to evaporate naturally. The mix of materials makes the mattress both pliable and long lasting. The top layer consists of latex and the bottom layer of high resilient polyurethane foam. The mattress is 10 cm thick and has a removable and machine washable cover.

Good to know

Our fabrics have been tested

At IKEA we test the fabric covers on our sofas and armchairs so you can be sure they're durable. The fabric's ability to resist abrasion is tested by using a machine to rub it against another fabric while applying firm pressure. A fabric that can take 15,000 cycles is suitable for furniture that must withstand everyday life at home – and if it can take more than 30,000 cycles, it is very resistant to abrasion. All fabrics are sensitive to sunlight, which is why we also check that our fabrics resist fading effectively.

Durable in different ways

Tough tests are an important way to check the durability of our fabric covers, but they don't tell the whole story. Durability also depends on materials, construction and manner of use. Heavy, tightly woven fabrics with a flat surface are most resistant to abrasion. Fabrics with a mixture of natural and synthetic fibres can withstand abrasion better than fabrics with only natural fibers. Yarn-dyed fabrics are more durable than fabrics with printed patterns. And a dirty cover wears out faster than a clean one. The fabric is also affected by how you use your sofa of course.

	Washing instructions	Resistance to abrasion (cycles)	Light fastness (1-8)
Vansbro : soft, quilted cover with fabric made of recycled polyester	Machine washable at 40°C.	45,000	5
Ransta: cotton cover in its natural colour	Machine washable at 40°C.	30,000	5
Tutstad: patterned cover with a plain cotton fabric, quilted with polyester wadding.	Machine washable at 40°C.	25,000	5
Knisa: plain fabric made of recycled polyester with a quilting adding both expressions and comfort	Machine washable at 40°C.	40,000	5
