Buyng guide

SKENINGE
Track system

Good to know
Maximum electrical load in one track system: 3680 W

Safety
In some countries electrical installation work may only be carried out by an authorised electrical contractor. Contact your local electricity authority for advice.

One system for different lighting needs
SKENINGE track system makes it easy to customise your lighting. Choose any number of tracks and combine them as you like – in a straight line, at an angle, or in a T layout. Use different spotlights or mix spotlights and pendant lamps. Install the track system in all rooms to create ambient lighting, work lighting and accent lighting. The system is so flexible that it blends in everywhere - even at the office, in a store, or in a restaurant.
How to choose

1. **Create your own lighting system**
   Start by thinking about where you want your light and how much light you need. You can connect as many tracks and spotlights as you like. The maximum electrical load in one track is 3680 W. Remember that different ceiling materials require different fittings. Always choose screws that suit the ceiling in your home.

2. **Connect to the power supply**
   The track system can only be installed in the ceiling. Please remember that in some countries electrical installation work may only be carried out by an authorised electrical contractor. Contact your local electricity authority for advice.

3. **Add tracks, choose quantity and length**
   Tracks can be connected in a straight line, at an angle, or in a T layout. Choose the length that suits you. The tracks are 1 metre long, but can be cut to fit everywhere. Connect two tracks with a straight connector. Mount the track system at an angle (up to 110°) with an angled connector if you want the lighting to continue around a corner. Or mount it as a T layout with the 3-way connector. The possibilities are many, so you can always customise the system to your home.

4. **Mix spotlights**
   SKENINGE track system includes spotlights of different sizes - 7 cm, 9.5 cm and 11 cm. You can add LED bulbs with a narrow beam to light up individual details, like a picture, or with a wide beam to light up larger areas, like a bookcase. The spotlights have a flexible joint which makes it easy to change the direction of the light and move them on the track if you want to change your lighting.

5. **Combine with your favourite pendant lamp**
   With the pendant connector, you can connect most of our pendant lamps to your track system. This means that you can combine the light from spotlights and pendant lamps and customise your lighting. You can also group your spotlights and/or pendant lamps and connect each group to different switches (max 3), so you can turn each group on and off separately. See which pendant lamps can be connected to the track system on page 5.
Combinations

You can use SKENINGE track system everywhere in the home and for all kinds of activities. In a small room like a hallway or a dressing room, the track system can provide all the lighting. In the living room you can use it to light up your favourite pictures or a bookshelf by combining LED bulbs with different light beam widths. And if you want light for a specific activity – like eating dinner or reading – you can mix spotlights with pendant lamps.

With just 3 SKENINGE spotlights, it’s easier for you to find your favourite coat, shoes, and hat when you are on the way out. Direct a spotlight on the wardrobe, one on the shoe rack, and use one to provide general light in the hallway. Choose light bulbs with wide beam angles which provide enough lighting to easily put on outerwear.

This combination $73

</tbody>
</table>

You can easily create a cosy reading corner and also light up your paintings or other things you like. It doesn’t involve a lot of installation, just SKENINGE track and some spotlights. Direct light on a bookshelf so you can quickly find a good novel. Light up the area around an armchair for reading. When you take a break from the book, you can look at the pictures on the wall – and reminisce about your own stories.

This combination $149

</tbody>
</table>

The living room is the centre of a house, so you need light for many different activities. Light up your storage, but don’t forget the area around the sofa. A pendant lamp over the coffee table really brings the room together. Since SKENINGE track system is three-phase, you can always decide which lights you want on and which ones you want off.

This combination $212.99

<td>1 piece</td>
</tr>
</tbody>
</table>

When you eat dinner with the family or spend time with friends, it’s nice with a good mood lighting. Choose two pendant lamps which you like, connect them to the lighting system, and dim the light. Now the mood is perfect! When you have many friends visiting, you can pull out the table and move the lamps where you need light, since the pendant connector can be moved on the track.
