

# Children's lighting

## SAFETY

All our children's lighting products go through some of the toughest safety tests in the world so you can be sure your child is safe.

For child safety, never place a products with a cord within reach of a child in a cot, crib or playpen.

## Good Lighting – round the clock

Children need good light, just like adults. Since children spend most of their waking hours playing everywhere in the room, they need a good general light. Like the light from a ceiling lamp. A wall lamp over the bed brings new life to the pictures in a storybook. And a nightlight can be a big comfort when a child's imagination runs riot and sees monsters lurking in shadows of their bedroom.
