

Floor decking

RUNNEN

Each package of RUNNEN floor decking covers an area of 0.81 m² and contains 9 pieces. The floor decking can be cut to size to fit around corners, pillars etc. This is how to calculate the number of packages you will need.

1. To calculate your outdoor area, multiply the length by the width.

Example:

Width 3 m x 5 m = 15 m²

2. Calculate any areas to be subtracted from the total area, e.g. for pillars or corners.

Example:

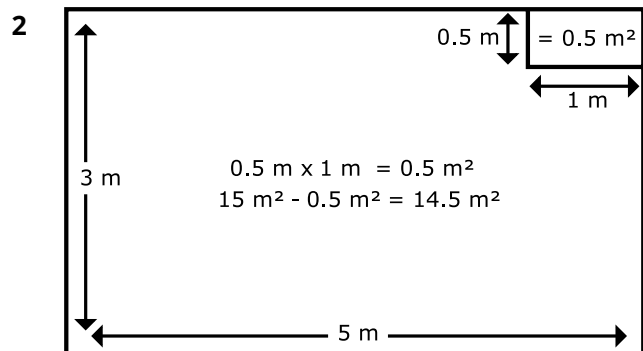

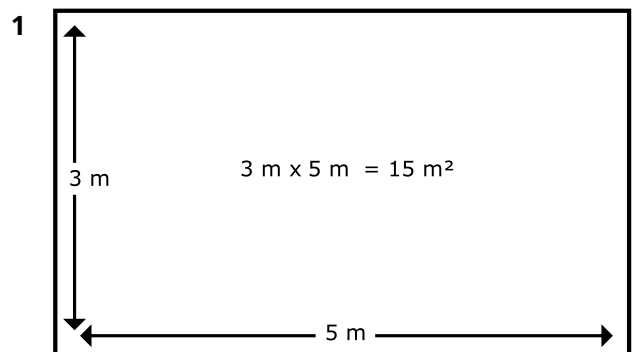

Corner width 0.5 m x length 1.0 m = 0.5 m²
15 m² - 0.5 m² = 14.5 m²

3. Divide the sum by 0.81 and round up (to ensure enough floor decking):

Example:

14.5 m² ÷ 0.81 = 17.90

Rounded up to 18 packages.

Here is a guide with ready-made calculations:

Size of area	Number of packages
2 m ²	3 packages
5 m ²	7 packages
7 m ²	9 packages
10 m ²	13 packages
12 m ²	15 packages
18 m ²	23 packages
20 m ²	25 packages
25 m ²	31 packages
30 m ²	37 packages
