

GRILLPLATS

Design and Quality
IKEA of Sweden

Egnlish

Product description

GRILLPLATS plug enables wireless control of any non-connected household products. It's a Matter-certified smart product that works with the IKEA Home smart system or any other system that uses the Matter standard. Pair it directly with a remote control or motion sensor from IKEA to use it without a smart system.

Getting started

With IKEA Home smart system

To connect to an IKEA Home smart system, a hub from IKEA and the IKEA Home smart app are needed.

1. Connect the plug to a power outlet. It will automatically go into pairing mode for 15 minutes to allow connection to the IKEA Home smart system.
2. Scan the QR Code from the yellow cover in the packaging to access the IKEA Home smart app and connect the plug. Following instructions in the app, scan the QR Code with the Matter logo from the front of the Advice & Care Instructions or printed on the product.

If the plug has been idle for a while, press the ON/OFF button to put it back into pairing mode.

With a Matter-certified smart system

To connect to a smart system that uses the Matter standard, a hub and app from the same manufacturer are needed.

1. Connect the plug to a power outlet. It will automatically go into pairing mode for 15 minutes to allow connection to a Matter-certified smart system.
2. Follow the instructions in the smart home manufacturer's app and scan the QR Code with the Matter logo from the front of the Advice & Care Instructions or printed on the product.

If the plug has been idle for a while, press the ON/OFF button to put it back into pairing mode.

Without a smart system

Connect the plug to a power outlet and follow the pairing instructions of the remote control or motion sensor from IKEA that it should be paired with. When the plug is powered on, it will stay in pairing mode to allow connection with smart products at any time.

Note, a maximum of 10 plugs from IKEA can be connected with one remote control or motion sensor by direct pairing. If the plugs intended for pairing are close together, turn off and disconnect the ones already connected while adding the next product.

Using the product

ON/OFF button (1)

Press to turn the plug on or off, to put it into pairing mode or to reset.

Pairing mode

The plug needs to be powered on and in pairing mode to connect to an IKEA Home smart system, any system that uses the Matter standard or to pair directly with a remote control or motion sensor from IKEA.

To connect to an IKEA Home smart system or any other system that uses the Matter standard, press the ON/OFF button to put the plug into pairing mode. The pairing will be open for 15 minutes. Follow pairing instructions in the smart home manufacturer's app. The LED light will blink twice once connected.

To pair directly with a remote control or motion sensor, follow the instructions of the smart product it should be paired with. The LED light will blink twice once connected. Note, the plug will stay in pairing mode once it is powered on to allow direct pairing connection with smart products at any time.

Factory reset

To reset the plug, press and hold the ON/OFF button for 10 seconds or until the red LED light stops blinking. This will clear old data and remove any existing connections. The plug will automatically restart and be available for pairing with a smart system for 15 minutes. If it is not connected to any smart system, it will stay in pairing mode to allow direct pairing connection with smart products at any time.

CARE INSTRUCTIONS

To clean the product, wipe with a dry cloth.

Good to know

- The products can be either paired directly to each other or connected to the IKEA Home smart system or any other system that uses the Matter standard. Only one connection method can be used at a time.
- QR Codes are unique to each product.
- Keep the Advice & Care Instructions for future reference. It contains the QR Codes with the Matter logo that are required to connect the products to IKEA Home smart system or any other system that uses Matter standard.
- The plug will turn off if the ambient temperature rises above its maximum operational limit. When the temperature returns to a safe level, the plug will be ready for use again.
- If the product is connected to an IKEA Home smart system, additional features are available in the IKEA Home smart app.
- If the product is connected to another smart system that uses the Matter standard, check with the manufacturer for available features.

- This product uses Thread technology to communicate with other smart products. A Thread border router is needed to connect to Matter systems. Many smart products or hubs, have a Thread border router built in.
- To connect Matter-certified products to a smart system, routers operating on the 2.4 GHz band are recommended.
- Different building materials and placement of the product can affect the wireless connectivity range.

Safety and compliance

WARNING

- Use only indoors in dry areas.
- Discard the product if damaged.
- Never submerge in water or other liquids.
- Do not connect after each other in a sequence.
- Do not cover the product when in use.
- Do not overload the product.
- To disconnect the power, unplug from power source.
- Do not leave the product in direct sunlight or near a heat source as it may overheat.
- For adult use only. This is not a toy and is not intended for use by children.
- Operating temperature: 0° C to 40° C (32° F to 104° F).

Technical data

Model: GRILLPLATS

Type: E2491-AU

Input: 230 - 240 V~, 50/60Hz

Max output power: 2400 W / 10 A

Resistive load/ Max 300W motor load

Range: 10 m in open air.

Operating frequency: 2402 - 2480 MHz

Output power: 10 dBm (EIRP)

Manufacturer: IKEA of Sweden AB

Address: Box 702 SE-343 81 Älmhult SWEDEN
