

Table bar system

Build your own desk

Good to know

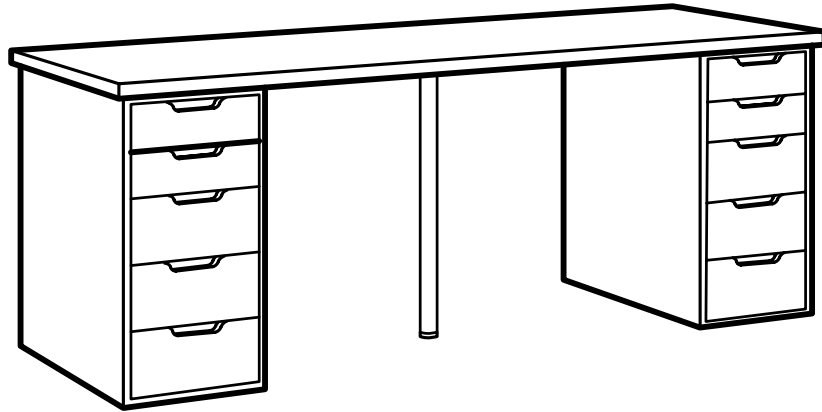

This tabletop is suitable to use with legs, trestles and storage units from our table bar range. It's not suitable to use with underframes from our office range (like BEKANT, TROTTEN or IDÅSEN).

Safety

The tabletops in this series have been developed and tested for home use and are not suitable for installation of a monitor desk mount. Maximum evenly distributed weight is 50 kg. Do not place concentrated weight exceeding 15 kg on a small surface on the table.

Assembly

The desktop has predrilled holes to make it easier to attach legs, trestles or drawer units. If you combine the under frame with a tabletop that is 200 cm – complete with 1 leg in the middle for increased stability.

Good to know

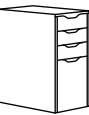

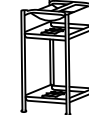

To make it easy for you to build your own desk, we've planned some things in advance.

Pre-drilled holes
We have pre-drilled holes in all tabletops, so it's easy for you to attach the legs. And we placed the holes close to the edge of the tabletop so you will have more room under the table, for your legs or a drawer unit. Screws for fixing the legs to the tabletop are included.

How to combine

In the table below you see the different combinations that we recommend.

	 ADILS leg 70 cm (27½")	 HILVER leg 70 cm (27½")	 KRILLE leg 70 cm (27½")	 OLOV leg 60-90 cm (23¾-35¾")	 SPÄND leg 70 cm (27½")	 ALEX drawer unit 36×58×70 cm (14½×22¾×27½")	 ALEX drawer unit with drop folder 36×58×70 cm (14½×22¾×27½")	 ALEX storage unit 36×58×70 cm (14½×22¾×27½")	 MITTBACK trestle 58×70/93 cm (13¾×18¾×27½")	 SPÄND leg with storage 35×48×70 cm (13¾×18¾×27½")

ANFALLARE 140×65 cm	●	●	●	●		●	●	●	●	
LAGKAPTEN 160×80 cm	●	●	●	●	●	●	●	●	●	●

* Note – we do not recommend you to use 2 drawer units or 2 trestles for tabletops with lengths of 120 and 100 cm (47¼ and 39¾"), since there would not be enough space for your legs and/or your chair.

** For tabletops with lengths 200 cm (78¾") an extra leg is needed for stability.
