Storage system

Care instructions

Wipe clean with a cloth dampened in a mild cleaner. Wipe dry with a clean cloth.

Safety

Different wall materials require different types of mounting hardware. Use mounting hardware (sold separately) suitable for the walls in your home. If you have any doubts regarding what kind of walls you have in your home, how much load they can carry or how to securely fix AURDAL onto your walls you must contact a specialized local dealer for advice.

With an elegant and modern design AURDAL is the answer to all your storage issues. AURDAL has design features, like the long legs which create a sleek look and which are also convenient, since you don't need to think about your baseboard. AURDAL is developed to utilize the small and tricky spaces in your home. With an easy assembly you can install your AURDAL solution even in narrow reach in closets without any trouble. With several different functions, it is easy to customize your new storage solution tailored to suit your needs. Choose between drawers, shelves or clothes rails to create your perfect fit. So now you only need to decide — do you prefer AURDAL in white, oak veneer, brown stained oak veneer, or dark gray?

This is a reference guide created to better assist customers when purchasing products. While a high level of accuracy has been sought in its preparation, we cannot guarantee that there are no errors or omissions, nor will we be bound by them. Availability may vary by store. Please see an IKEA co-worker or visit IKEA.ca for more information.

How to build

AURDAL is a simple system that can do so much for you. It's easy to assemble and you can customize it to suit all your storage needs. But how do you pick a combination? We have some great ready-made solutions but you can also design your own unique combination from scratch. There are 4 simple steps to follow:

1.

First you need to take into consideration the space you have at home. All AURDAL combinations start with the suspension rail. It's important to make sure the suspension rail fits in the area where you're planning to install your new wardrobe. The suspension rail comes in two sizes, 65 cm (25%) and 125 cm (49¼"). If your space is bigger than that you can always place them side by side to build a wider solution. And what about the height? All AURDAL wardrobes come in one height which is 221 cm (87").
2.

When you have decided on the width of your wardrobe, it's time to think about the AURDAL sections. You assemble your sections by hanging two side panels with leg on the suspension rail. The side panels have a cut out in the back so it's easy to hang it on the suspension rail and move it around to find the correct spot. One section is always 60 cm (23%) including the side panels.
3.

The next step in the planning of your new wardrobe combination is shelves. You always need to place one shelf at the top of one AURDAL section and one at the bottom, this will make your wardrobe both sturdy and functional.
4.

Now the rest is up to you! It's time to plan the interiors of the wardrobe. It's a good idea to think about what you need to store. Do you want to store dresses and shirts for example? AURDAL offers both a clothes rail that you can place inside your section but also an extendible one that you can use in the space between the wall and your AURDAL section, so you can utilize all the space that you have available.

Do you want to have two sections next to each other? Or maybe even more than that? No problem! Since the side panels have holes on both sides it allows you to assemble AURDAL interiors on both sides. For example, if you want to have two AURDAL sections you would only need 3 side panels with legs.

Do you need to store all your t-shirts or sweaters? Then a shelf or a wired basket might be able to help you out. Or maybe you want to be able to hide away your items? The AURDAL system also comes with a drawer. No matter what you want to store you can customize your AURDAL units to all of your needs.
