

## Big move? Check.

Got the home? Check. Got the boxes? Check. Now all that's left is to pack up and get moving! We help make it easy with this handy checklist.

To save money and help the environment, wrap fragile items in textiles you already have on hand.

Get packing! Start with your least-used items and save your essential, everyday ones for last.

Lift easy! Cut triangle-shaped holes on the sides of heavier boxes to give you makeshift handles.

Keep organized! Create a central organization hub in your home and make it your go-to for packing.

Put together a First Night Kit with clothes, toiletries, cutlery and more. This is the last thing you pack and the first thing you open in your new home.

Before disconnecting cords from the back of your television and other electronics, take a picture so you can remember where they go!

Don't forget the fridge! Defrost, towel dry and clean it out 24-48 hours before moving to avoid leaks and other mess.

Do a deep clean! A cleaning caddy for your supplies is a great way to move them from one home to the next.
