Children’s lighting

Safety
All our children’s lighting products go through some of the toughest safety tests in the world so you can be sure your child is safe.

Different wall materials require different types of hardware. Use mounting hardware suitable for the walls in your home.

For child safety, never place a corded product within reach of a child in a cot, crib or playpen.

Requires assembly.

Good Lighting—round the clock
Children need good light, the same as adults do. Since children spend most of their waking hours playing everywhere in the room, they need a good general light, like the light from a ceiling lamp. A wall lamp over the bed brings new life to the pictures in a storybook. And a nightlight can be a big comfort when a child’s imagination runs riot and sees monsters lurking in shadows of their bedroom.
