

Baby sleep

Cribs, mattresses and accessories

Safety and comfort for your little one

It's wonderful to be a new parent but it can also be rather worrying. That's why our cribs are rigorously tested to ensure they meet the strictest safety standards that exist in the world. Our cribs are durable and stable, and they adjust to fit babies as they grow so quickly. So you can sleep like a baby, too.

For sweet dreams and safe sleeping

No parent should have to choose between affordability and their little one's safety and comfort. That's why we designed our crib mattress range. Every single one of our firm, well-ventilated crib mattresses meet strict safety standards. So it's not only your little one who will be resting well at night.

Requires assembly.

This is a reference guide created to better assist customers when purchasing products. While a high level of accuracy has been sought in its preparation, we cannot guarantee that there are no errors or omissions, nor will we be bound by them. Availability may vary by store. Please see an IKEA co-worker or visit www.IKEA.ca for more information.

Safety is our top priority

Children's safety is always our highest priority

Our products are designed and tested to comply with all applicable safety requirements in the countries where the products are sold. We also test all our children's products at our own accredited test laboratory in Sweden, as well as at independent accredited test laboratories and institutes around the world.

IKEA fulfils the strictest standards for cribs around the world and specific standards & regulations to North America.

How are our cribs tested?

All our cribs undergo several different tests to ensure they are safe to use. First, they are inspected for any protruding parts, loose parts or fittings, and sharp edges. Then, all gaps and openings between spindles and the slats in the crib base are measured. The crib is tested with impact and pressure tests for strength, stability and durability and to ensure that the spindles will not twist or rotate from their position and create potentially hazardous openings. The crib base is also tested. For example, in a test for the European market, we subject the crib base to impact from a 10 kg weight that is dropped 1,000 times from five different positions.

The same or similar tests are made on crib bases for cribs on all markets where we are active, but the tests may differ somewhat, depending on the specific requirements of the respective country.

Good to know

1. No small components that can be removed, or worked loose, to eliminate the risk of choking.
2. Rounded edges and corners.
3. Ventilated crib base to avoid fungal growth.
4. Strong crib base.
5. The gap between the spindels is designed for optimum safety (children cannot get their head stuck between them).
6. Stable, durable construction.
7. Non-toxic materials and surface treatment.

How to choose a crib

Identify individual needs

Both you and your baby will sleep better if you use a crib for the baby. A crib is an enclosed, yet well-ventilated, sleeping environment that your baby cannot roll out of and will not get too warm or uncomfortable in. Most infants sleep deeply and are not easily disturbed by noise, voices or music. However, they do not sleep for long periods at a time and wake up frequently. The enclosed sleeping environment of a crib helps your baby feel sheltered and protected.

In our selection you can find cribs with a traditional touch or cribs with modern shapes. Choose according to your style so it fits with your home.

| Crib | 2 position crib base | Removable side | With storage |

Designed to grow with your baby

Different living situations require different solutions — but all babies grow fast. That's why most of our cribs are designed so that one side can be removed when the baby is big enough to climb into/out of the crib, transforming it into a bed.

1. When the baby is very small the base can be placed at the higher position.

①

2. As soon as the baby starts to sit by themselves, place the base at the lower position.

②

3. When the child is big enough to climb into the bed, one crib side can be removed.

③

All cribs

Overall size: Width×Depth×Height.

We have a wide variety of cribs in different styles and finishes. No matter which of our cribs you choose, you can be sure of one thing — every detail is well-thought-out. For your child's

safety, always use the correct size of crib mattress with your crib to avoid gaps that the baby's head could become trapped in.

SNIGLAR crib, 74×137 cm (29½×53½"). The crib base can be placed at two different heights. One crib side can be removed when the child is big enough to climb into/out of the crib. Your baby will sleep both safely and comfortably as the durable materials in the crib base have been tested to ensure they give their body the support it needs. The crib base is well ventilated for good air circulation which gives your child a consistent sleeping climate.

How to choose crib mattress

Choose your materials

Choose between spring or foam. All are safe and hygienic. If you are unsure ask yourself: what type of mattress do you prefer to sleep on?

Spring: The spring mattresses are made with pocket spring construction. The construction of spring crib mattresses allows air to flow freely, promoting good air circulation and a favourable sleeping climate.

Foam: The foam mattresses use quality polyurethane or high resilience foam, which are well cut, durable and intended for sleeping therefore making both a safe choice for crib mattresses. High resilience foam is durable, relieves pressure points, and provides comfort and support for your growing baby. Both sides may be slept on, which prolongs their use.

Identify individual needs

How many years do you think you will use your crib mattress? The longer you plan on keeping the same mattress will affect which mattress you should choose. If you want to use the same mattress into the toddler years a thicker and more durable mattress will provide better support for older babies and toddlers, who like to stand and bounce in their cribs.

Choose your mattress

On the following pages you will find all of our baby mattresses, along with detailed facts for each.

For your child's safety, always use the correct size of crib mattress with your crib to avoid gaps that the baby's head could become trapped in.

Good to know

1. All our crib mattresses are firm, to provide a safe sleeping environment for your baby.
2. All mattresses provide some pressure relief, because they are made with materials like pocket springs or high resilience foam.
3. Well ventilated cover for better air circulation.
4. All children's mattresses promote good air flow, thanks to carefully considered choices in materials and construction.
5. Removable and machine-washable covers to create a hygienic sleeping environment for your baby.

Crib mattresses

All our crib mattresses are made of safe, durable materials. Free from harmful chemicals and well-ventilated, they all provide a safe and comfortable sleeping environment for your baby. Some have handles that simplify making the bed. The materials have various properties. Foam is elastic and distributes your baby's body weight evenly. So does high

resilience foam, but it also regains its shape faster and lasts longer. Spring mattresses have wrapped pocket springs that follow the baby's movements exactly.

For your child's safety, always use the correct size of crib mattress with your crib.

Foam mattresses

PELLEPLUTT. This mattress is made of 6 cm (2½") thick foam and has the same, smooth surface on both sides. You can easily turn it over if you like. The cover can also be removed and machine washed at 60°C (140°F).

70×132 cm (27½×52")

403.480.27

KRUMMELUR. This 8 cm (3¼") thick mattress has two different surfaces—one wavy side with medium-firm comfort and one smooth side which is firmer. The structure of the foam makes the mattress comfortable and well-ventilated, which provides good support and a comfortable sleeping environment for your baby. The cover is also easy to remove and can be machine washed at 60°C (140°F).

70×132 cm (27½×52")

003.485.19

SKÖNAST. An 8 cm (3¼") thick mattress with pressure relieving, elastic, high resilience foam that regains its shape quicker and lasts longer than ordinary foam. The material follows your baby's body and provides comfortable and firm support. The cover is easy to remove and can be machine washed at 60°C (140°F).

70×132 cm (27½×52")

503.485.31

Spring mattresses

JÄTTETRÖTT. This 11 cm (4¾") thick mattress has individually wrapped pocket springs enclosed in a generous layer of pressure-relieving foam. Since the springs work independently, they closely follow your baby's body and provide support in the right places. The well-ventilated construction provides your baby with a pleasant sleeping environment. A practical handle makes the mattress easy to carry—and to turn over when making the bed. You can remove the cover and machine wash it at 60°C (140°F).

70×132 cm (27½×52")
