## **Reporting period fiscal year 2025**

In the fiscal year 2025, as part of our Supply Chain Due Diligence, we screened our supply chain for child labour risks and impacts. To date, we have not identified an actual case of child labour in our direct and indirect supply chain. Based on extensive human rights risk analysis, we believe that the risk of child labor in our supply chain is low.

We closely monitor the topic of child labour at all our suppliers and are continuing to work to prevent and address child rights risks and impacts in deeper supply chains

Additional information regarding human rights can be found in the [Ingka Group Annual Summary and Sustainability Report FY25](#).
