

# Sedge dreamcatcher

The basis for this dreamcatcher is the GILLSTAD collection of three circular wall decorations from dried sedge, to which you only need to add decorations and ornaments that you prepare yourself.

1. Print the templates on harder paper, it can be coloured, and cut out what you need.
2. Prepare several strings of different lengths of natural material, the number is up to you.
3. Decorate the strings with paper motifs (if you are going to glue them on the strings, it is better to prepare motifs in pairs and glue the string between them), beads, fringes or feathers.
4. Tie the decorated strings to the bottom edge of one of the GILLSTAD sedge circles.
5. It is possible to attach a second, smaller circle above one.
6. Hanging on the wall is quite simple, the circles have an eyelet on the back.

Good night and sweet dreams!
