

Paper dreamcatcher

A proper dreamcatcher lets only pleasant dreams come to us and is a nice decoration in itself. So let's make one ourselves with these instructions and ideas for inspiration.

1. Print out the templates on harder paper, which can be coloured, and cut out what you need.
2. Cut several strips of paper 0.5 to 1 cm wide, about 30 cm long. Just cut the longer edge of the paper.
3. Glue a circle and several smaller decorations on one strip of paper.
4. Cut the other strips as desired.
5. Then glue several shorter strips crosswise over the circle.
6. Glue two more shorter strips to the bottom of the circle and then glue the smaller ornaments on these strips.
7. Bend the top end of the strip and glue it back onto the top ornament to create a loop for hanging.

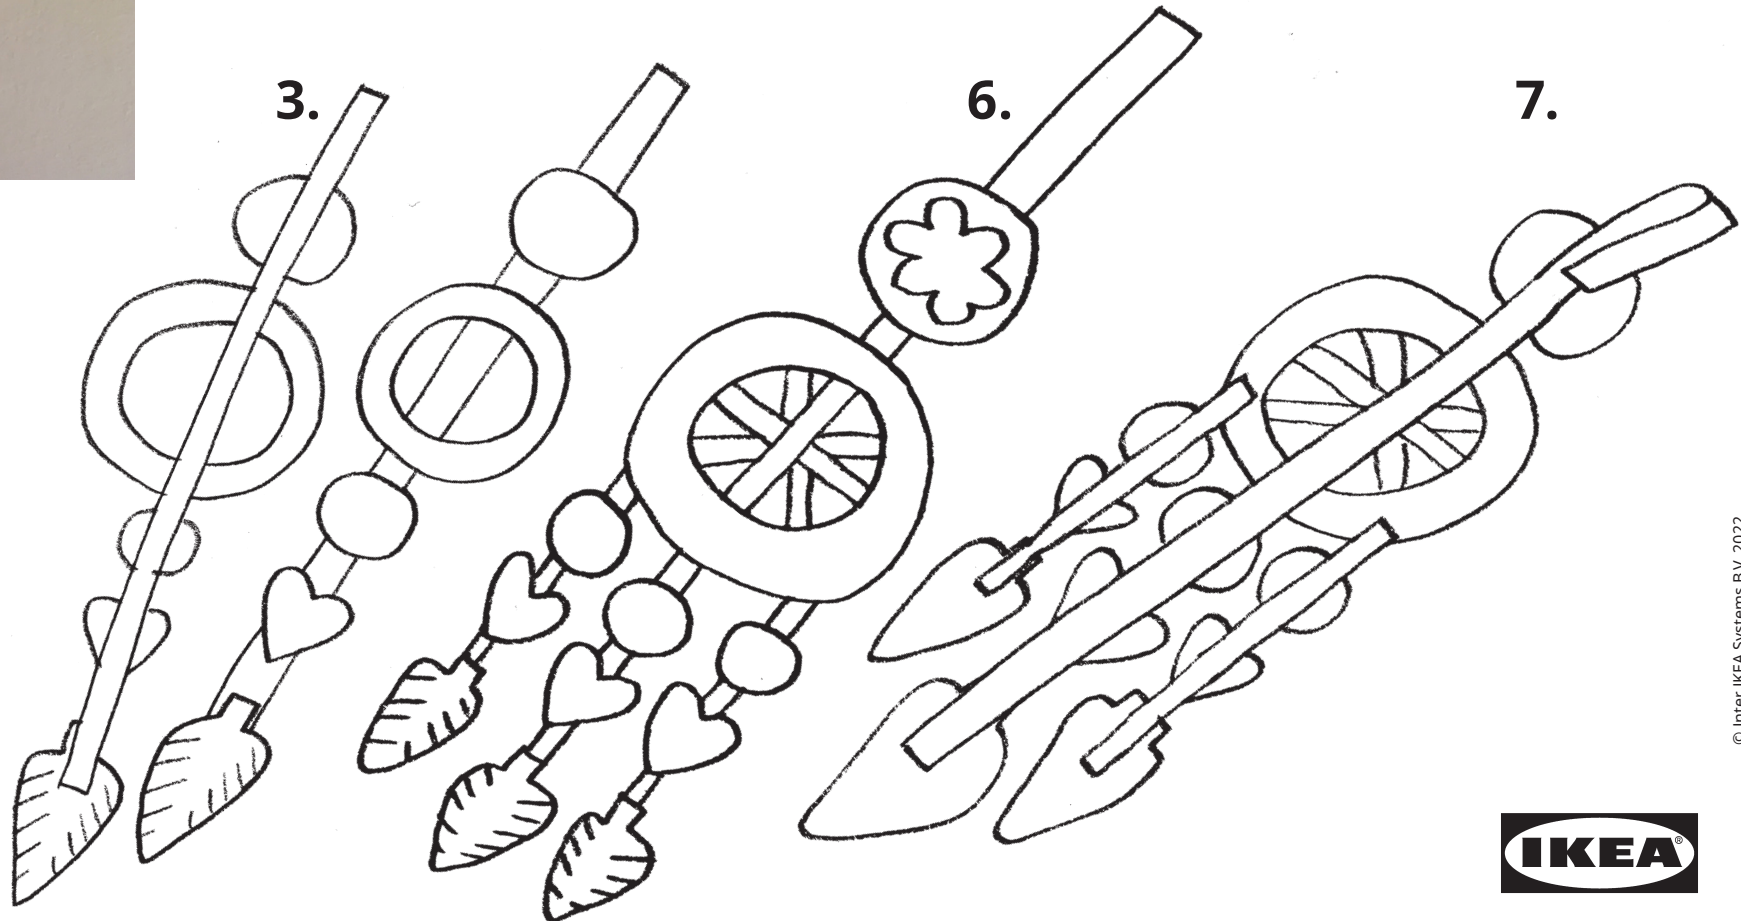

TIP: You can use also other decorations and draw your own flowers, dolls, cars – whatever you like.
