# Chocolate bar in a unique gift wrapping

A very easy gift tip. Print the template on a white or coloured paper and colour it with crayons. Or cut out various decorations and patterns and glue them on the wrapping. You can also add a personal dedication. Finally, glue the wrapping with a stick glue and slide in on the chocolate bar in its original packaging. Here you can find two wrapping patterns, but you can also create your own. Just measure the length and girth of the chocolate bar. Add 3–5 mm to the measured girth, so that you can easily put the wrapping on the chocolate bar, and add about 2 cm for gluing.
