Manipular con precaución

¡Manipular con precaución! En casos excepcionales, un borde dañado o una superficie rayada puede provocar la rotura brusca del vidrio. Raramente se romperá en fragmentos afilados y generalmente en trozos pequeños. Evita los impactos laterales, porque es la zona más vulnerable del vidrio.

Manipula el producte amb precaució

Manipula el producte amb precaució! En casos excepcionals, una vora danyada o una superfície ratllada pot fer que el vidre es trenqui de sobte. Generalment es trencarà en trossos petits, no en fragments punxeguts. Evita els impactes laterals perquè és la zona més vulnerable del vidre.

Manipular con precaución

Manipular con precaución! En ocasións, un bordo danado ou unha superficie raiada pode causar a rotura repentina do vidro. Porén, o vidro non se romperá en fragmentos afilados, senón en anacos pequenos. Evita os golpes nos laterais, xa que nesa zona o vidro é menos resistente.
