ATENCIÓN

El vuelco de un mueble puede provocar lesiones graves e incluso mortales. Para evitar que el mueble vuelque hay que fijarlo a la pared de forma permanente con los herrajes que se incluyen.

El montaje de los herrajes debe realizarlo una persona cualificada, ya que si no se fijan correctamente el mueble puede volcar y provocar lesiones y daños. No se incluyen los herrajes porque cada pared está hecha de un material diferente que requiere un tipo de herraje concreto. Utiliza los herrajes adecuados para las paredes de tu casa. Valora si las paredes son adecuadas para que los herrajes resistan las fuerzas que se generen. Ponte en contacto con un especialista en ferretería para que te aconseje sobre las fijaciones que debes utilizar.
