**BUYING GUIDE**

**INTEGRATED KITCHEN LIGHTING**

---

**Good, functional lighting**

Lighting is important in all kitchens, both for safety and appearance. Good, even lighting across your worktop makes cooking and other kitchen chores safer, easier and more fun. And spotlights, cabinet lighting and drawer lighting doesn’t just help you to find what you’re looking for, but adds a decorative element to your kitchen.

At IKEA, we have two series of integrated lighting: UTRUSTA and OMLOPP. The UTRUSTA series has corner modules as well as electrical and USB outlets. The OMLOPP series has a slim design and is easy to install. If you like, you can combine the series to fit your needs. Add the remote control to dim, and set the mood for every occasion.

Planning or updating your kitchen?

No kitchen is complete without good, functional lighting. That’s why it’s a good idea to include lighting already when you’re planning and buying your kitchen. It makes it easier to install and saves you lots of time and effort. But what if you just want to improve the lighting in your current kitchen? Don’t worry, we have solutions for that, too. Remember that all kitchens are different – plan after your own needs!

HOW TO PLAN

Start by deciding where you want lighting in the kitchen. Then decide which lighting to suit you and your kitchen best. Start by choosing your preferred worktop lighting. Then add spotlights, cabinet lighting and drawer lighting.

Check out our offer below:

Worktop lighting

At IKEA, we have 2 integrated lighting series – UTRUSTA and OMLOPP. Both give you task lighting, mood lighting, and are dimmable. You save energy too, since both series use LED, which consume 85% less energy and last up to 20 times longer than a regular incandescent bulb.

USE: UTRUSTA, OMLOPP.

Spotlights and cabinet lighting

Spotlights are a decorative and functional choice for wall cabinets with glass doors. They make it easy to look inside your cabinets and brighten up your kitchen at the same time.

Cabinet lighting is easy to choose, as it comes in different versions to match both modern and traditional styles.

USE: OMLOPP, FORMAT, URSHULT, LINDSHULT, MAGLEHULT.

Drawer lighting

OMLOPP drawer lighting switches on and off as you open and close your drawers. No more hide and seek with your kitchen equipment!

USE: OMLOPP.

* Must be installed by qualified electrician.
** ANSLUTA transformers and cords are sold separately.
*** The light output is per 40 cm worktop lighting; for the other sizes see the price tag.
HOW TO BUILD

UTRUSTA worktop lighting

UTRUSTA worktop lighting must always be installed by a professional electrician. See the list below for all parts and accessories that you need.

- Start from the left with UTRUSTA worktop lighting with power supply.
- Count how many units you need for your kitchen.
- Use max. 2 sockets with USB port. You can connect up to 9 units to one unit with power supply.
- Add a remote control to dim lights in 2 steps. The whole combination will turn on and off at the same time.

Basic parts

UTRUSTA worktop lighting with power supply
Length: 40 cm.
Colour: white and aluminium.

UTRUSTA worktop lighting
Length: 40, 60 and 80 cm.
Colour: white and aluminium.

UTRUSTA one-way socket with USB port
Length: 20 cm.
Colour: white and aluminium.

ANSLUTA remote control
Diameter: 8 cm.
Colour: white.

Installation accessories

UTRUSTA corner joiner
Length: 20 cm.
Colour: white and aluminium.

UTRUSTA intermediate connection cord
Length: 1 m.
## COMBINATIONS FOR UTRUSTA

### Small kitchen

Begin building your lighting system from the left, using UTRUSTA LED worktop lighting with power supply, 40 cm.

* You can take the combinations above as a starting point for creating your own solution. To make a combination that fits your kitchen, you can add as many UTRUSTA worktop lighting units as needed (40, 60 or 80 cm). If you have more than 10 units, you need to add one more UTRUSTA worktop lighting with power supply.
COMBINATIONS FOR UTRUSTA

L-shaped kitchen
You can use either UTRUSTA intermediate connection cord or corner joiner. If you want to use UTRUSTA corner joiner, that’s where you start building. Your system always needs to be built using UTRUSTA LED worktop lighting with power supply 40 cm on the left side.

Product name | Quantity
--- | ---
UTRUSTA LED worktop lighting with power supply 40 cm | 1 pc
UTRUSTA LED worktop lighting 80 cm* | 1 pc
UTRUSTA LED worktop lighting 60 cm* | 2 pcs
UTRUSTA 1-way socket with USB 20 cm | 1 pc
UTRUSTA LED worktop lighting 40 cm* | 2 pcs
UTRUSTA intermediate connection cord | 1 pc
ANSLUTA remote control | 1 pc

Hood in the middle. You need 2 UTRUSTA LED worktop lighting with power supply: one when you start, one after the hood.

If you have more than 10 units, you need to add one more UTRUSTA worktop lighting with power supply.
HOW TO BUILD

OMLOPP worktop lighting

OMLOPP worktop lighting is easy to install by yourself. See the list below for all parts and accessories that you need.

Start by choosing number of OMLOPP lighting strips that you need.

- Add the correct ANSLUTA transformer: 10W or 30W.
- Add the power supply cable.
- Add a remote control to dim lights in 2 steps. The whole combination will turn on and off at the same time.

If you want, you can complete the system with other products, like spotlights, drawer lighting or cabinet lighting.

Basic parts

OMLOPP LED worktop lighting

- Length: 40, 60 and 80 cm.
- Colour: white and aluminum.

ANSLUTA transformer

- Power: 10W/30W.

ANSLUTA power supply cord

- Length: 3.5m
- Diameter: 8 cm.
- Colour: white.

ANSLUTA remote control

Length: 0.7m or 2m.

Installation accessories

ANSLUTA intermediate connection cord

There are 2 different transformers in the ANSLUTA series. You choose a transformer based on how many units you want to connect. You can add up to 3 different lighting units to the 10W transformer, as long as the total wattage does not exceed the 10W limit.

1. 10W, 3 connection sockets.
2. 30W, 9 connection sockets.

The 30W transformer can support up to 9 different lighting units, as long as the total wattage does not exceed the 30W limit. You can hide the transformer on top of your kitchen cabinets. If you want to use more than 1 transformer, make sure to synchronize each transformer with the remote control so that the entire combination can be turned on and off at the same time.

To find the power consumption (W) for each product, see All Parts and Prices on page 14.

HOW TO BUILD

Spotlights and cabinet lighting

Start by choosing all parts that you need.

- Add the correct ANSLUTA transformer: 10W or 30W.
- Add the power supply cable.
- Add a remote control to dim lights in 2 steps. The whole combination will turn on and off at the same time.

Basic parts

OMLOPP spotlights or cabinet lighting*

- Diameter, round spotlight: 6.8 cm.
- Length, rectangular spotlight: 20 cm.
- Colour: white, aluminium and black.

ANSLUTA transformer

- Power: 10W/30W.

ANSLUTA power supply cord

- Length: 3.5m.

ANSLUTA remote control

- Diameter: 8 cm.
- Colour: white.

* You can also use FORMAT, URSHULT, LINDSHULT and MAGLEHULT. For measurements, see All Parts and Prices on page 14.

ANSLUTA transformers

- There are 2 different transformers in the ANSLUTA series. You choose a transformer based on how many units you want to connect. You can add up to 3 different lighting units to the 10W transformer, as long as the total wattage does not exceed the 10W limit.
- The 30W transformer can support up to 9 different lighting units, as long as the total wattage does not exceed the 30W limit. You can hide the transformer on top of your kitchen cabinets. If you want to use more than 1 transformer, make sure to synchronize each transformer with the remote control so that the entire combination can be turned on and off at the same time.

To find the power consumption (W) for each product, see All Parts and Prices on page 14.
HOW TO BUILD

Combining with OMLOPP

You need ANSLUTA electronic transformer and ANSLUTA power supply cord. Add ANSLUTA intermediate connection cord if you’re using more than one transformer.

Connecting to UTRUSTA

UTRUSTA LED worktop lighting system has 4 connection sockets for other units, so you don’t need to buy a separate ANSLUTA transformer. You just need to synchronize your ANSLUTA remote control to dim your entire lighting system.
HOW TO BUILD

Drawer lighting

Start by choosing all parts that you need.
• Add the correct ANSLUTA transformer: 10W or 30W.
• Add the power supply cable.

The lighting strip has a motion sensor, so that the light turns on and off automatically as you open and close the drawer.

Basic parts

- OMLOPP lighting strip for drawers
- ANSLUTA transformer
- ANSLUTA power supply cord

OMLOPP lighting strip for drawers
Length: 36, 56 and 76 cm.
Perfect for your 40, 60 or 80 cm METOD cabinets.

ANSLUTA transformer
Power: 10W/30W.

ANSLUTA power supply cord
Length: 3.5 m.

ANSLUTA transformers

1. 10W, 3 connection sockets.
2. 30W, 9 connection sockets.

There are 2 different transformers in the ANSLUTA series. You choose a transformer based on how many units you want to connect. You can add up to 3 different lighting units to the 10W transformer, as long as the total wattage does not exceed the 10W limit.

1. 10W, 3 connection sockets.
2. 30W, 9 connection sockets.

The 30W transformer can support up to 9 different lighting units, as long as the total wattage does not exceed the 30W limit. You can hide the transformer on top of your kitchen cabinets. If you want to use more than 1 transformer, make sure to synchronize each transformer with the remote control so that the entire combination can be turned on and off at the same time.

How to install

Buy a separate transformer for your drawer lighting. It will be easier to install. Add ANSLUTA intermediate connection cord if you have more than 1 transformer.

To find the power consumption (W) for each product, see All Parts and Prices on page 14.
