Safety

All table tops, trestles, legs and underframes are tested and approved for a maximum load of 50 kg.

Tempered glass should be handled with care! A damaged edge or a scratched surface can cause the glass to crack suddenly. However, only into small pieces, never into sharp fragments. A thin plastic film keeps the pieces of glass in place.

Good to know

To make it easy for you to build your own desk, we've planned some things in advance.

Pre-drilled holes

We have pre-drilled holes in all table tops, so it's easy for you to attach the legs. And we placed the holes close to the edge of the table top so you will have more room under the table, for your legs or a drawer unit. Screws for fixing the legs to the table top are included.

The trestles are extra stable, and don't even need to be attached to the table top. All this to make it easy to create the perfect table for you and your family!
