## Decorative strips

Decorative strips provides the finishing touch to your kitchen. They come in many different styles, but we have something for all of our door and drawer families. Use them to tie your style together, hide lighting or just as a decorative element.

You can choose how to mount them on your cabinets. Below we show the entire range and some different ways of mounting them both above as mouldings and below your cabinet, either wrapped around the whole cabinet or just between your cover panels.

# Lighting and sound

---

## A brighter kitchen life

Good lighting is an essential part of any kitchen. That's why we offer four integrated lighting series perfectly dimensioned to fit our kitchen cabinets. Having integrated lighting in your kitchen is a great way to show off your favourite dinnerware behind glass doors or in drawers. And, good lighting brings alive your cabinet doors, worktop and wall panels, too.

Get an even better kitchen life with the ability to dim, change from warm to cold light, turn off and turn on light wirelessly. All you need is TRÅDFRI remote con-

trol. Or, use the TRÅDFRI gateway and IKEA Home smart app to control every beam of light with your smartphone. We call it IKEA Smart lighting.

Sound is a powerful mood booster, much in the same way as light. Both are crucial for creating the right atmosphere at home and both are deeply personal – each of us has our own unique preferences in terms of volume, brightness, type, and genre. Like light, sound is culturally and socially important; it brings people together.

### **Kitchen installation**

If you want we can install all your kitchen lighting for you, as a part of our Kitchen Installation service.

**Sound** has the ability to change the atmosphere at home dramatically. So, turning a grey day into a great day is only a touch of a button away.

**Drawer lighting** simplifies finding what you need even during those midnight kitchen raids. Opening and closing the drawer turns the light on and off automatically.

**Spotlights** provide a focused light that is good for lighting smaller areas and behind glass doors.

**Worktop lighting** should give you a clean, clear view of all the work you're doing in the kitchen.

**Cabinet lighting** illuminates your favourite kitchen doors and creates cosy mood light in the entire kitchen.

## Lighting for METOD

### MITTLED series

MITTLED has compact design and is easy to install. MITTLED uses only one connection cord per row of light as each element connects to the next one in easy way.

# Worktops

---

Your kitchen is the heart of your home, it's a room for everyone! How it performs and how it looks are two important factors. Even though doors and drawer fronts are the main style decision you make when updating your kitchen, your worktop can have a big impact on the overall look. However, the perfect worktop is not just about completing the look of your kitchen, it has an impact on its functionality too. When picking the right worktop there are many factors to

consider, including your style, durability, maintenance, lifestyle and cost. Our worktops are available in pre-cut and custom made as well as in a wide range of durable materials, finishes and thicknesses. Each surface has unique properties, with differing levels of water, wear and heat resistance.

## How to choose your worktop:

---

**What's your budget?**  
A stylish look does not have to cost a fortune, our worktops are available in wide range of materials and expressions, pre-cut as well as custom-made to perfectly fit your style, needs and wallet.

### 02

---

**What kind of material do you prefer?** When deciding on material, consider how robust you need your worktop to be, how much you are prepared to look after it, and how you want it to look in your kitchen scheme.

### 03

---

**Custom made worktops** are made to fit your kitchen layout, you can order the exact length and depth you need, as well as cut-outs for your sink, tap and hob. **Pre-cut worktops** are available in different sizes, you can take yours home today and cut it to desired length.

**25**

---

## Materials

### Laminate

Laminate worktops are affordable, easy to maintain and there are lots of colours and expressions to choose from. They are made of laminate pressed onto particleboard. Both heat and pressure are applied to harden the surface and create a durable worktop.

### Thick veneer

Thick wood veneer worktops offer the natural colour and grain of wood, adding warmth to your kitchen. They are pre-treated for quicker installation and can be sanded and treated when needed. The thick veneer technique allows us to create patterns and expressions that are otherwise difficult and expensive to achieve – with the efficient use of natural resources.

### Acrylic

Acrylic worktops have a smooth, non-porous surface that is resistant to stains and moisture, making them easy to clean. The colour and design run all the way through the material. This means they can be polished to remove any surface damage such as scratches, allowing you to restore the surface to its original condition.

### Quartz

Quartz worktops are extremely durable, resistant to scratches, moisture and impacts. They are made by combining ground quartz (one of the hardest materials in nature), resins and pigments. This creates a very hard, non-porous surface that is smooth, easy to clean and does not require any sealing treatment. Our quartz worktops are 2 or 3 cm thick and come in a wide variety of expressions.

## Thick veneer worktops 3.8 and 2.8 cm thick

Natural and hard-wearing, wood brings a warm feeling to your kitchen and makes each worktop unique. With thick veneer worktops, a 3 mm layer of wood covers a particleboard core to add excellent stability.

This construction makes the worktop less sensitive to humidity and much less likely than solid wood to bend, split or crack. Also, with this technique, we can create new unique expressions using less wood, and reducing the impact on the environment.

The worktops are pre-treated with hard wax oil to create an easy-care surface for immediate use. Over time, it will only look better, gaining in character. They can be sanded and treated when needed meaning that they will age gracefully.

Thick veneer worktops come in the following crafted patterns: narrow stave, full plank, butcher-block, fine line and chevron.

Thick veneer worktops are available both as pre-cut (take home today) and custom-made option. Pre-cut worktops can be cut into the exact length you need and finished with the edge strip included in the package.

### Ash

Ash is a blonde hard wood with a beautiful grain pattern. Ash is a tough and strong, yet elastic material with great resilience and finishing properties. It gets gradually darker with age. In its natural form it is heavy and gives a very solid feel.

### Birch

Birch is fine-grained and pale in colour with a satin-like sheen that darkens with age. It often has knots or heartwood in cream or light brown which will give your worktop a unique and distinct natural look.

### Beech

Beech is a hard wood with an even grain. It's durable and often used for furniture and worktops. When exposed to sunlight, beech ages from a light red tone to a more rose-brown colour. Beech characteristics are hardness, strength and good shock resistance.

### Oak

Oak wood is exceedingly strong, heavy and durable. It is an attractive light colour with a prominent grain. Its colour ranges from light brown to a rich reddish-brown and it darkens beautifully with age.

### Walnut

Walnut wood is relatively heavy, hard and resilient. The natural colour light brown to dark chocolate brown adds warmth to your kitchen decor. Walnut gets lighter in colour with age. It has a rich variation in colour and a decorative, curved grain pattern.

To order your custom made worktop and wall panel, please contact an IKEA co-worker in the kitchen department at your local store.

## How to measure your worktop

Start by measuring your worktop from the corner where it attaches to the wall. Make sure to make your measurements alongside the wall and always start from the same point. When measuring the depth, start from the wall and measure out. Don't forget to add 1.5 cm for an overhang too.

If you need to measure for a freestanding worktop (for a kitchen island for example),

simply start from one end and add 3 cm extra for an overhang.

To measure for a sink start from the same point where you've taken your previous measurements and measure to the centre of where you would like your sink to sit.

## Walls to match your style!

Adding wall panels is a quick and easy way to update your kitchen with new colors and texture. Our durable and easy-to-clean wall panels protect your walls from splashes and stains when you are cooking. They give you a neat finish where your worktop meets the wall and add a subtle accent of color to your

kitchen walls creating a stylish look. You can choose wall panels in various colors, materials and expressions, some are even double-sided! But if you want to go very personal, you can have your own customized one.

## How to choose your wall panel:

01

---

What's your budget? A stylish look does not have to cost a fortune, our wall panels are available in a wide range of materials and expressions, pre-cut as well as custom-made to perfectly fit your style, needs and wallet.

02

---

What kind of material and expression do you prefer? The material of the wall panel you choose is just as important as the colour. Your wall panel is always going to be right up against your worktop, make sure the two materials and colours work well together.

03

---

Your wall panel has to end up somewhere! Where it ends is up to you – along the length of the wall, up to the bottom of your wall cabinets, up to the ceiling in areas where there are no cabinets (over the sink or over the hob).

All custom-made wall panels have a 25-year guarantee.

# Sinks

---

## A busy place in the kitchen

The sink and the area around it, is one of the busiest places in the kitchen. You use it for everything from preparing food and rinsing vegetables, to storing dirty dishes and washing up. To make

the activities as easy as possible, choose a sink and sink accessories that match your needs and the way you work in the kitchen.

## How to choose your sink

01

---

How much space have you allocated for the sink? Our sink cabinets are 40, 60 or 80 cm wide.

02

---

Think about how you prepare food, but also how you wash up. Do you have a dishwasher or do you wash the dishes by hand? Do you need one bowl, two bowls or a sink with drainboard?

03

---

Complete your sink with sink accessories that help you organise the area in and around the sink, both when you prepare food and when you wash up.

### Plumbing

Let a professional connect the water to the sink and kitchen mixer tap you've bought from us. Then you know that everything from the U-pipe to water-trap and silicone seals are where they should be – and that costly water leaks will be avoided.

**25**

We test our sinks to ensure they can withstand the demand of everyday life in the kitchen. That's why all our sinks come with a free 25-year guarantee (except FYNDIG).

---

## Our range of sinks

### **Single bowl sinks**

If space is an issue, one single bowl is a good option. Plus, in a big single bowl you can easily wash large pots and pans. Combine with sink accessories to make the bowl as functional as possible

### **Double bowl sinks**

Having two bowls is ideal if you have a lot going on at the same time. For example, if one of the bowls is piling up with dirty dishes, you can still rinse off vegetables and alike in the other.

### **1½ bowl sinks**

A one and a half bowl sink gives you the same advantages as a double bowl sink, but in a smaller area.

### **Sinks with drainboard**

A sink with a drainboard is ideal for drying dishes as the sloping surface make excess water flow back into the bowl. All our sinks with drainboard are reversible, so you can choose if you want the drainboard to the left or to the right.

## Saving water at every step

Earth may be covered in a lot of water, but very little of it is drinkable and even less is accessible. No organism can survive without it, and no new water is created. It's constantly recycled, but our freshwater supply is overused; not evenly distributed; and impacted by pollution, contamination and climate change. That's why we equip all our

kitchen mixer taps with a water saving aerator that reduces water use – while maintaining the same water stream. We didn't invent aerators, but think they are an important example of how we can work together to save water for everyone's benefit.

### Plumbing

Let a professional connect the water to the sink and kitchen mixer tap you've bought from us. Then you know that everything from the U-pipe to water-trap and silicone seals are where they should be – and that costly water leaks will be avoided.

**10**

All our kitchen mixer taps are tested and third party certified to meet, or exceed, the demands of the relevant national and international mechanical, quality, safety and hygienic standards. All IKEA kitchen mixer taps come with a free 10-year guarantee.

## Waste sorting combinations

Are you curious about how your waste can become new resources? HÅLLBAR series helps you sort different materials into different bins – a simple action and the first step towards giving waste a new life. HÅLLBAR

waste sorting management series is a waste management solution for any room of your home and can be built-in and freestanding, whichever you prefer.

The bin's ventilation holes and the form of the bottom allow the air to circulate and dry out the organic waste. This minimises unwanted odours.

A ring on the top edge of the bin hides the waste bag and keeps it in place. It's removable either for easy cleaning or if not being used

The folding handle makes it easy to carry the bin with you to the waste station.

The included sticker can be attached to the bin to mark what you are sorting. Draw or write on the sticker to make it clear what goes in the bin.

# Kitchen accessories

---

Whether you have a new, beautifully-planned kitchen or just looking to make improvements in your current one - there are a few secret ingredients that will make life simpler and more enjoyable. For instance, smart organisers create natural spots for storing cooking utensils and gadgets, so the whole family knows where to find them - and where to put them back. Trays, boxes and waste organisers work double

shift by preventing clutter and making the best use of space inside your cabinets and drawers. Wall storage does its magic by putting all those things you use the most, close at hand - right where you need them. And for the busiest place in the kitchen - don't forget the clever accessories around the sink that come in handy when preparing food and washing up.

## Kitchen islands, sideboards, trolleys and step stools

All of these are easy additions to any kitchen design. A kitchen island serves as an extended worktop space and often becomes a favourite spot for snacking, working and socialising. Sideboards add that little extra storage we all need and a trolley on wheels offers roll-anywhere convenience. A step-stool is a must-have for any kitchen, for reaching things up high, letting kids join the fun at the worktop, or using as extra seating by the table.

## Having things in plain sight has its advantages

With open shelves, hooks, rails and racks you can create a personal combination that gives a good overview of your kitchen and makes everything easily accessible. Inspired by restaurant kitchens, we created KUNGSFORS series of wall-mounted shelves and accessories so you can feel like a professional and enjoy a smooth workflow.
