What will IKEA do to correct the problem?

IKEA will examine the product and decide, at its sole discretion, if it is covered under this guarantee. If considered covered, IKEA through its own service operations, will then, at its sole discretion, either repair the defective product or replace it with the same or a comparable product. If it is covered by this guarantee, IKEA will pay the costs of repairs, spare parts, labour and travel for repair staff, that IKEA incur, provided that the product is accessible for repair without special expenditure. This does not apply to any repair work not authorised by IKEA. Replaced parts become the property of IKEA. If the product is no longer sold by IKEA, IKEA will provide an appropriate replacement at its sole discretion. An appropriate replacement constitutes a product of the same type in the same price range as the original. If you prefer to upgrade to a product of a higher specification you may request this but IKEA will then charge you the difference between the price of the like-for-like replacement and the requested replacement product.

What is not covered under this guarantee?

This guarantee does not cover changes in the appearance of the cookware unless they have a significant effect on functionality. This guarantee does not apply to products that have been stored, incorrectly, used inappropriately, abused, misused, altered, or cleaned using the wrong cleaning methods or cleaning products. This guarantee does not cover normal wear and tear, cuts or scratches, or damage caused by impacts or accidents.

This guarantee does not apply if the product has been placed outdoors or in a humid environment.

Care instructions

Cookware made of cast iron should always be washed by hand. Clean the cookware after use by washing by hand in water using a brush. If you wash the pan while it is still warm it will be easier to clean. Wipe dry carefully after cleaning.

Do not expose the pan to great changes in temperature, e.g. by taking it directly from the fridge and putting it on the hob.

The pan or the enamel coating can crack if it bumps against or is dropped on to a hard surface.
