Design and Quality
IKEA of Sweden

Product description

- 1 Door balcony
- 2 Bottle balcony
- 3 Ventilation grid
- 4 Vegetable drawer
- 5 Rating Plate
- 6 Body shelves
- 7 Interior light & Thermostat knob
- 8* Drain hole cleaning tool

*(inside the fitting bag)

First Use

Before using your refrigerator, make sure the necessary preparations are made in line with the instructions in "Safety Information" and "Installation" sections.
 If the product is transported horizontally, do not plug the product to power supply for first 4 hours.
 Keep the product running without placing any food inside for 12 hours and do not open the door, unless absolutely necessary.

Important! This appliance is sold in France. In accordance with regulations valid in this country it must be provided with a special device (see figure) placed in the lower compartment of the fridge to indicate the coldest zone of it.

*if it is applicable

Daily use

Setting the operating temperature

The operating temperature is regulated by the temperature control.

1 = Lowest cooling setting
5 = Highest cooling setting
 (Or)
Min. = Lowest cooling setting
Max. = Highest cooling setting

The average temperature inside the fridge should be around +5°C.
 Please choose the setting according to the desired temperature.
 Please note that there will be different temperatures in the cooling area.
 The coldest region is immediately above the vegetable compartment.
 The interior temperature also depends on ambient temperature, the frequency with which the door is opened and the amount of foods kept inside.
 Frequently opening the door causes the interior temperature to rise.
 For this reason, it is recommended to close the door again as soon as possible after use.
 To turn off the appliance please rotate the knob.

Using interior compartments

Movable shelves: Distance between the shelves can be adjusted when necessary.
Vegetable drawer: Vegetables and fruits can be stored in this compartment for long periods without decaying.
Bottle shelf: Bottles, jars and tins can be placed in these shelves.

Cooling

Food storage

The fridge compartment is for the short-term storage of fresh food and drinks.

Store milk products in the intended compartment in the refrigerator.

Bottles can be stored in the bottle holder or in the bottle shelf of the door.

Raw meat is best kept in a polyethylene bag in the compartment at the very bottom of the refrigerator.

Allow hot foods and beverages to cool to room temperature prior to placing them in the refrigerator.

- Attention

Store concentrated alcohol only standing upright and tightly closed.

- Attention

Do not store explosive substances or containers with flammable propellant gases (canned cream, spray cans etc.) in the device. There is a danger of explosion.

Defrost

The fridge compartment defrosts automatically. The thawing water flows through the drain channel into a collection container at the rear of the device.

During defrosting, water droplets form at the back of the fridge due to the evaporator.

If not all of the drops run down, they may freeze again after defrosting remove them with a cloth soaked in warm water, but never with a hard or sharp object.

Check the flow of the thawed water from time to time. It may become plugged occasionally.

Installation

To make the product ready for use, be careful that the electrical wiring and plumbing are appropriate by referring to the information in the user manual. If not, call a qualified electrician and plumber and have the necessary arrangements made.

⚠WARNING: The manufacturer is not liable for damages caused by operations by unauthorized persons. To avoid shaking, place the product on a flat surface.

⚠WARNING: During the installation, the power plug of the product should not be plugged in. Otherwise, there is a danger of death or serious injury!

⚠WARNING: If the doorway of the room to where the product will be placed is so narrow that the product cannot pass through, pass the product by turning it to side; otherwise, call an authorized service.

- Do not expose the product to direct sunlight and do not store it in humid place.
- Do not install the product where the temperature drops below 10 °C.

Inspection check list

Please follow the inspection checklist before using your appliance.

If any answer is NOT please follow the relevant action.

Please remember to write down the product serial number and article number as required and attach your receipt to this page.

Product serial number (rating plate)	
Product artical number (rating plate)	
Purchasing date	

	If the answer is YES	Actions to do if NOT
Condensation Tray Check that the tube is inside the tray	<input checked="" type="checkbox"/> No action	Put the tube inside the tray
Making sure gasket seals all around the door when the door is closed	<input checked="" type="checkbox"/> No action	Refer to the AI - door alignment step
Checking no collision between parts/furniture while opening/closing the cooling door	<input checked="" type="checkbox"/> No action	Refer to the AI - door alignment step
Secure the installation inside any kitchen system and fixed as required	<input checked="" type="checkbox"/> No action	Follow the AI for the proper installation

Technical data

IKEA	LAGAN	-	92	29	E
Brand	Model	Freezing capacity (kg/24h)	Energy consumption (kw/year)	Noise level (dba)	Energy class

This refrigerator contains biocidal products in the following parts to prevent dry film fungal growth and unwanted odours.

Active substance:

- Silver (CAS: 7440-22-4) contains (nano) silver for door handle and carbon filter
- Titanium dioxide (CAS: 13463-67-7) contains (nano) titanium dioxide for carbon filter
- IPBC (CAS: 55406-53-6) for seal

The concentrations of biocidal products are very low hence they should not pose unacceptable health risks.

Potential Noise Reason
