Safety information

-  For your safety and correct operation of the appliance, read this manual carefully before installation and use. Look carefully at the warning pictures at the beginning of this manual. For a correct and complete installation, refer to the specific installation manual provided with the product. Always keep these instructions with the appliance even if you move or sell it. Users must fully know the operation and safety features of the appliance.
-  The wire connection has to be done by specialized technician.
- The manufacturer will not be held liable for any damages resulting from incorrect or improper installation.
 - The minimum safety distance between the cooker top and the extractor hood is: for electrical hob 500mm and for gas hob 650mm.
 - If the instructions for installation for the gas hob specify a greater distance, this must be respected.
 - Check that the mains voltage corresponds to that indicated on the rating plate fixed to the inside of the hood.
 - Means for disconnection must be incorporated in the fixed wiring in accordance with the wiring rules.
 - For Class I appliances, check that the domestic power supply guarantees adequate earthing.
 - Connect the extractor to the exhaust flue through a pipe of minimum diameter 150mm. The route of the flue must be as short as possible.
 - Do not connect the extractor hood to exhaust ducts carrying combustion fumes (boilers, fireplaces, etc.).
 - If the extractor is used in conjunction with non-electrical appliances (e.g. gas burning appliances), a sufficient degree of aeration must be guaranteed in the room in order to prevent the backflow of exhaust gas. When the cooker hood is used in conjunction with appliances supplied with energy other than electric, the negative pressure in the room must not exceed 0.04 mbar to prevent fumes being drawn back into the room by the cooker hood.
 - The air must not be discharged into a flue that is used for exhausting fumes from appliances burning gas or other fuels.
 - If the supply cord is damaged, it must be replaced from the manufacturer or its service agent.
 - Connect the plug to a socket complying with current regulations, located in an accessible place.
 - With regards to the technical and safety measures to be adopted for fume discharging it is important to closely follow the regulations provided by the local authorities.
-  **WARNING:** Before installing the Hood, remove the protective films.
- Use only screws and small parts in support of the hood.
-  **WARNING:** Failure to install the screws or fixing device in accordance with these instructions may result in electrical hazards.

- Connect the hood to the power net by using a bipolar switch having a contact gap of at least 3 mm.
 - Do not look directly at the light through optical devices (binoculars, magnifying glasses...).
 - Do not flambe under the range hood; risk of fire.
 - This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
 - Children should be supervised to ensure that they do not play with the appliance.
 - The appliance is not to be used by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.
-  Accessible parts may become hot when used with cooking appliances.
- Clean and/or replace the Filters after the specified time period (Fire hazard).
 - There shall be adequate ventilation of the room when the range hood is used at the same time as appliances burning gas or other fuels (not applicable to appliances that only discharge the air back into the room)

Installation

Installation modes

The hood has been designed to be installed and used either as a "Exhaust mode", or as "Recirculation mode".

Exhaust mode (see symbol in installation booklet)

Cooking steam is sucked and channelled outside the house through a discharge duct (not supplied), fitted to the hood steam outlet.

Ensure that the discharge duct is correctly fitted to the air outlet, unit using an appropriate connection system.

Recirculation mode (see symbol in installation booklet)

The air is filtered through one or more the charcoal filters, and then resented in room.

Important: Ensure appropriate air circulation around the hood.

Important: If the hood is supplied without charcoal filters and installed on recirculation mode, these must be fitted before the hood can be used. Filters are available in shops.

The hood should be installed away from particularly dirty areas, windows, doors and heat sources.

The accessories for wall fixing are not included because wall made of different materials require different types of fixing accessories.

Use fixing systems suitable for the walls of your home and the weight of the appliance. For more details, contact a specialized dealer.

Keep this booklet for future consultation.

Environmental aspects

Instructions on disposal

Your old appliance is an electrical device.

This electrical or electronic equipment is marked with a crossed-out wheeled bin. The equipment may therefore only be collected and returned separately from unsorted municipal waste, i.e. it must not be disposed of with household waste. The equipment can be returned, for example, to a municipal collection point or, if applicable, to a distributor (see below for their take-back obligations in Germany). This also applies to all components, sub-assemblies and consumables of the old equipment to be disposed of.

Before the old equipment may be disposed of all old batteries and old accumulators that are not enclosed by the old equipment must be separated from the old equipment. The same applies to lamps that can be removed from the old equipment without destroying them. The end-user is also responsible for deleting personal data from the old equipment.

Notes on recycling

Help recycle all materials marked with this symbol. Do not dispose of such materials, especially packaging, in the household waste but via the relevant containers provided or the appropriate local collection systems.

Help to protect the environment and human health by recycling including waste of electrical and electronic appliances.

Care and cleaning

Use

- Switch off or unplug the appliance from the mains supply before carrying out any maintenance work.
- The top of the hood must not be used as a shelf.
- The extractor hood has been designed exclusively for domestic use to eliminate kitchen smells.
- Never use the hood for purposes other than for which it has been designed.
- Never leave high naked flames under the hood when it is in operation.
- Adjust the flame intensity to direct it onto the bottom of the pan only, making sure that it does not engulf the sides.
- Deep fat fryers must be continuously monitored during use: overheated oil can burst into flames.

Care and cleaning

- Grease filters must be cleaned every 2 months of operation, or more frequently

for particularly heavy usage, in order to avoid a potential fire hazard, and can be washed in a dishwasher.

- Clean the hood using a damp cloth and a neutral liquid detergent.

Care and cleaning long life Charcoal filter

- The odour filter should be washed and regenerated once a month. The filter will retain its odour-absorbing capacity for three years, after which it must be replaced.

Regeneration procedure:

- Wash in the dishwasher at the maximum temperature using a normal dishwasher detergent. To prevent food particles or dirt from settling on the filter during washing and causing odours later, it is recommended to wash the filter on its own.
- Dry in an oven at a temperature of 100°C for 10 minutes.

Replacing the lamps

For Replacement please contact an Authorized Service Center.

Manufacturer

Ikea of Sweden AB - SE - 343 81 Älmhult, Sweden

Electrical connection

⚠ WARNING: All electrical connections must be carried out by an authorised installer.

- Before making the connections, check that the rated voltage of the appliance indicated on the respective rating plate corresponds to the power supply voltage.

⚠ Caution! Do not weld any of the cables!

Rating plate

The technical information is situated in the rating plate on the internal side of the appliance. The serial number is indicated on the rating plate.

IKEA GUARANTEE

How long is the IKEA guarantee valid?

This guarantee is valid for five (5) years from the original date of purchase of your appliance at IKEA. The original sales receipt is required as proof of purchase. If service work is carried out under guarantee, this will not extend the guarantee period for the appliance.

Who will execute the service?

IKEA service provider will provide the service through its own service operations or authorized service partner network.

What does this guarantee cover?

The guarantee covers faults of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This guarantee applies to domestic use only. The exceptions are specified under the headline "What is not covered under this guarantee?" Within the guarantee period, the costs to remedy the fault e.g. repairs, parts, labor and travel will be covered, provided that the appliance is accessible for repair without special expenditure. On these conditions the EU guidelines (DIRECTIVE(EU)2019/771) and the respective local regulations are applicable. Replaced parts become the property of IKEA.

What will IKEA do to correct the problem?

IKEA designated service provider will examine the product and decide, at its sole discretion, if it is covered under this guarantee. If considered covered, IKEA service provider or its authorized service partner through its own service operations, will then, at its sole discretion, either

repair the defective product or replace it with the same or a comparable product.

What is not covered under this guarantee?

- Normal wear and tear.
- Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, damage caused by chemical or electro-chemical reaction, rust, corrosion or water damage including but not limited to damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions.
- Consumable parts including batteries and lamps.
- Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible color differences.
- Accidental damage caused by foreign objects or substances and cleaning or unblocking of filters, drainage systems or soap drawers.
- Damage to the following parts: ceramic glass, accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to have been caused by production faults.
- Cases where no fault could be found during a technician's visit.
- Repairs not carried out by our appointed service providers and/or an authorized

service contractual partner or where non-original parts have been used.

- Repairs caused by installation which is faulty or not according to specification.
- The use of the appliance in a non-domestic environment, professional use.
- Transportation damages. If a customer transports the product to their home or other address, IKEA is not liable for any damage that may occur during transport. However, if IKEA delivers the product to the customer's delivery address, then damage to the product that occurs during this delivery will be covered by this guarantee.
- Cost for carrying out the initial installation of the IKEA appliance. However, if an IKEA service provider or its authorized service partner repairs or replaces the appliance under the terms of this guarantee, the service provider or its authorized service partner will re-install the repaired appliance or install the replacement, if necessary.

This restriction do not apply to fault-free work carried out by a qualified specialist using our original parts in order to adapt the appliance to the technical safety specifications of another EU country.

How country law applies

The IKEA guarantee gives You specific legal rights which cover or exceed local demands. However these conditions do not limit in any way your rights described in the local legislation.

Area of validity

This guarantee applies to appliances used in one EU country and taken to another EU country, the appliances will be repaired or replaced in the framework of the guarantee conditions normal in the new country. An obligation to carry out services in the framework of the guarantee exists only if the appliance complies and is installed in accordance with:

- the technical specifications of the country in which you claim your guarantee rights;
- the Assembly Instructions and User Manual Safety Information.

The dedicated After Sales Service for IKEA appliances:

Please do not hesitate to contact IKEA After Sales Service to:

1. make a service request under this guarantee;

2. ask for clarification on installation of the IKEA appliance in the dedicated IKEA kitchen furniture. The service won't provide clarifications related to:
 - the overall IKEA kitchen installation;
 - connection to electricity (if machines do not have a cable), to water and to gas since these must be carried out by an authorized service engineer.
3. ask for clarification on user manual contents and specifications of the IKEA appliance.

To ensure that we provide you with the best assistance, please read carefully the Assembly Instructions and/or the User Manual section of this booklet before contacting us.

How to reach us if You need our service

Please refer to the last page of this manual for the full list of IKEA appointed contacts and relative national phone numbers.

Important! In order to provide You with a quicker service, we recommend that You use the specific phone numbers listed at the end of this manual. Always refer to the numbers listed in the booklet of the specific appliance You need an assistance for. When calling us, ensure that You have to hand the IKEA article number (8 digit code) for the appliance of which you need our assistance.

Important! SAVE THE SALES RECEIPT! It is Your proof of purchase and required for the guarantee to apply. Note that the receipt reports also the IKEA article number number (8 digit code) for each of the appliances you have purchased.

Do you need extra help?

For any additional questions not related to After Sales Service of appliances, please contact our nearest IKEA store call centre. We recommend you read the appliance documentation carefully before contacting us.
