SAFETY INSTRUCTIONS

IMPORTANT TO BE READ AND OBSERVED

Before using the appliance, read these safety instructions. Keep them nearby for future reference. These instructions and the appliance itself provide important safety warnings, to be observed at all times. The manufacturer declines any liability for failure to observe these safety instructions, for inappropriate use of the appliance or incorrect setting of controls.

Very young children (0-3 years) should be kept away from the appliance. Young children (3-8 years) should be kept away from the appliance unless continuously supervised. Children from 8 years old and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge can use this appliance only if they are supervised or have been given instructions on safe use and understand the hazards involved. Children must not play with the appliance. Cleaning and user maintenance must not be carried out by children without supervision.

PERMITTED USE

CAUTION: the appliance is not intended to be operated by means of an external switching device, such as a timer, or separate remote controlled system.

This appliance is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm houses; by clients in hotels, motels, bed & breakfast and other residential environments.

The maximum number of place settings is shown in the product sheet.

The door should not be left in the open position - risk of tripping. The open appliance door can only support the weight of the loaded rack when pulled out. Do not rest objects on the door or sit or stand on it.

WARNING: Dishwasher detergents are strongly alkaline. They can be extremely dangerous if swallowed. Avoid contact with the skin and eyes and keep children away from the dishwasher when the door is open. Check that the detergent receptacle is empty after completion of the wash cycle.

WARNING: Knives and other utensils with sharp points must be loaded in the basket with their points down or placed in a horizontal position - risk of cuts.

This appliance is not for professional use. Do not use the appliance outdoors. Do not store explosive or flammable substances (e.g. gasoline or aerosol cans) inside or near the appliance - risk of fire. The appliance must be used only to wash domestic dishes in accordance with the instructions in this manual. The water in the appliance is not potable. Use only detergent and rinse additives designed for an automatic dishwasher. When adding a water softener (salt), run one cycle immediately with the machine empty, to avoid corrosion damage to internal parts. Store the detergent, rinse aid and salt out of reach of children. Shut off the water supply and unplug or disconnect the power before servicing and maintenance. Disconnect the appliance in the event of any malfunction.

INSTALLATION

The appliance must be handled and installed by two or more persons - risk of injury. Use protective gloves to unpack and install - risk of cuts. Connect the dishwasher to the water mains using only new hose sets. The old hose sets should not be reused. All hoses must be securely clamped to prevent them coming loose during operation. All local waterboard regulations must be complied with. Water supply pressure 0.05 - 1.0 MPa. The appliance must be placed against the wall or built into furniture to limit the access to its rearside. For dishwashers having ventilation openings in the base, the openings must not be obstructed by a carpet.

Installation, including water supply (if any) and electrical connections, and repairs must be carried out by a qualified technician. Do not repair or replace any part of the appliance unless specifically stated in the user manual. Keep children away from the installation site. After unpacking the appliance, make sure that it has not been damaged during transport. In the event of problems, contact the dealer or your nearest After-sales Service. Once installed, packaging waste (plastic, styrofoam parts etc.) must be stored out of reach of children - risk of suffocation. The appliance must be disconnected from the power supply before any installation operation - risk of electrical shock. During installation, make sure the appliance does not damage the power cable - risk of fire or electrical shock. Only activate the appliance when the installation has been completed.
If installing the dishwasher at the end of a row of units making the side panel accessible, the hinge area must be covered to avoid risk of injury. The inlet water temperature depends on the dishwasher model. If the installed inlet hose is marked „25°C Max”, the maximum allowed water temperature is 25°C. For all other models the maximum allowed water temperature is 60°C. Do not cut hoses and, in the case of appliances fitted with a waterstop system, do not immerse the plastic casing containing the inlet hose in water. If hoses are not long enough, contact your local dealer. Make sure the inlet and drain hoses are kink-free and are not crushed. Before using the appliance for the first time, check the water inlet and drain hose for leaks. Make sure that the four feet are stable and resting on the floor, adjusting them as required, and check that the dishwasher is perfectly levelled using a spirit level.

**ELECTRICAL WARNINGS**

The rating plate is on the edge of the dishwasher door (visible when the door is open).

⚠️ It must be possible to disconnect the appliance from the power supply by unplugging it if plug is accessible, or by a multi-pole switch installed upstream of the socket and the appliance must be earthed, in conformity with national electrical safety standards.

⚠️ Do not use extension leads, multiple sockets or adapters. The electrical components must not be accessible to the user after installation. Do not use the appliance when you are wet or barefoot. Do not operate this appliance if it has a damaged power cable or plug, if it is not working properly, or if it has been damaged or dropped.

⚠️ If the supply cord is damaged, it must be replaced with an identical one by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard - risk of electrical shock. If the fitted plug is not suitable for your socket outlet, contact a qualified technician. Do not pull the power supply cable. Do not immerse the mains cord or plug in water. Keep the cord away from hot surfaces.

**CLEANING AND MAINTENANCE**

⚠️ WARNING: Ensure that the appliance is switched off and disconnected from the power supply before performing any maintenance operation - risk of electrical shock. Never use steam cleaning equipment.

**DISPOSAL OF PACKAGING MATERIALS**

The packaging material is 100% recyclable and is marked with the recycle symbol 📚. The various parts of the packaging must therefore be disposed of responsibly and in full compliance with local authority regulations governing waste disposal.

**DISPOSAL OF HOUSEHOLD APPLIANCES**

This appliance is manufactured with recyclable or reusable materials. Dispose of it in accordance with local waste disposal regulations. For further information on the treatment, recovery and recycling of household electrical appliances, contact your local authority, the collection service for household waste or the store where you purchased the appliance. By ensuring this product is disposed of correctly, you will help prevent negative consequences for the environment and human health. The 🚭 symbol on the product or on the accompanying documentation indicates that it should not be treated as domestic waste but must be taken to an appropriate collection center for the recycling of electrical and electronic equipment.

**ENERGY SAVING TIPS**

**ECO:** it is the standard cleaning cycle, it is suitable to clean normally soiled tableware and that it is the most efficient programme in terms of its combined energy and water consumption for that type of tableware.

**NOTE:**

In order to prevent damage of the product, please use the voltage stabilizer.
INSTALLATION

ATTENTION: If the appliance must be moved at any time, keep it in an upright position; if absolutely necessary, it may be tilted onto its back.

CONNECTING THE WATER SUPPLY

Adaptation of the water supply for installation should only be performed by a qualified technician.
The water inlet and outlet hoses may be positioned towards the right or the left in order to achieve the best possible installation.
Make sure the dishwasher does not bend or squash the hoses.

CONNECTING THE WATER INLET HOSE

- Run the water until it is perfectly clear.
- Screw the inlet hose tightly into position and turn on the tap.
If the inlet hose is not long enough, contact a specialist store or an authorised technician.
The water pressure must be within the values indicated in the Technical Data table - otherwise the dishwasher may be function properly.
Make sure the hose is not bent or compressed.

SPECIFICATIONS FOR THE CONNECTION OF THE WATER SUPPLY HOSE:

<table>
<thead>
<tr>
<th>WATER SUPPLY</th>
<th>cold or hot (max. 60°C)</th>
</tr>
</thead>
<tbody>
<tr>
<td>WATER INTAKE</td>
<td>3/4&quot;</td>
</tr>
<tr>
<td>POWER OF WATER</td>
<td>0.05 ÷ 1 MPa (0.5 ÷ 10 bar)</td>
</tr>
<tr>
<td>PRESSURE</td>
<td>7.25 – 145 psi</td>
</tr>
</tbody>
</table>

CONNECTING THE WATER OUTLET HOSE

Connect the outlet hose to a drain duct with a minimum diameter of 2 cm A.
The outlet hose connection must be at a height ranging from 40 to 80 cm from the floor or surface where the dishwasher rests.

Before connecting the water outlet hose to the sink drain, remove the plastic plug B.

ANTI-FLOODING PROTECTION

Anti-flooding protection. To ensure floods do not occur, the dishwasher is provided with a special system which blocks the water supply in the event of anomalies or leaks from inside the appliance.
Some models are also equipped with the supplementary safety device New Aqua Stop, which guarantees anti-flooding protection even in the event of a supply hose rupture.
Under no circumstances should the water inlet hose be cut as it contains live electrical parts.

ELECTRICAL CONNECTION

WARNING: Under no circumstances should the water inlet hose be cut as it contains live electrical parts.

Before inserting the plug into the electrical socket, make sure that:
- The socket is earthed and complies with current regulations;
- The socket can withstand the maximum load of the appliance as shown on the data plate located on the inside of the door (see PRODUCT DESCRIPTION);
- The power supply voltage falls within the values indicated on the data plate on the inside of the door.
- The socket is compatible with the plug of the appliance.
If this is not the case, ask an authorised technician to replace the plug (see AFTER-SALES SERVICE). Do not use extension cables or multiple sockets. Once the appliance has been installed, the power supply cable and the electrical socket should be easily accessible.
The cable should not be bent or compressed.
If the power supply cable is damaged, have it replaced by the manufacturer or its authorised Technical Assistance Service in order to prevent all potential hazards.
The Company shall not be held responsible for any incidents, if these regulations are not observed.

POSITIONING AND LEVELLING

1. Position the dishwasher on a level sturdy floor. If the floor is uneven, the front feet of the appliance may be adjusted until it reaches a horizontal position. If the appliance is levelled correctly, it will be more stable and much less likely to move or cause vibrations and noise while it is operating.
2. Before recessing the dishwasher, stick the adhesive transparent strip under the wooden shelf in order to protect it from any condensation which may form.
3. Place the dishwasher so that its sides or back panel are in contact with the adjacent cabinets or the wall. This appliance can also be recessed under a single worktop.
4. To adjust the height of the rear foot, turn the red hexagonal bushing on the lower central part at the front of the dishwasher using a hexagonal spanner with an opening of 8 mm. Turn the spanner in a clockwise direction to increase the height and in an anticlockwise direction to decrease it.

DIMENSIONS AND CAPACITY:

| WIDTH      | 598 mm |
| HEIGHT     | 820 mm |
| DEPTH      | 555 mm |
| CAPACITY   | 13 standard place-settings |

FIRST TIME USE
SALT, RINSE AID AND DETERGENT

ADVICE REGARDING THE FIRST TIME USE
After installation, remove the stoppers from the racks and the retaining elastic elements from the upper rack.

FILLING THE SALT RESERVOIR
The use of salt prevents the formation of LIMESCALE on the dishes and the machine’s functional components.
- It is important that the salt reservoir be never empty.
- It is important to set the water hardness.

The salt reservoir is located in the lower part of the dishwasher (see PRODUCT DESCRIPTION) when the green float on the cap of the salt reservoir is no longer visible.
1. Remove the lower rack and unscrew the reservoir cap (anticlockwise).
2. Only the first time you do this: fill the salt reservoir with water.
3. Position the funnel (see figure) and fill the salt reservoir right up to its edge (approximately 1 kg); it is not unusual for a little water to leak out.
4. Remove the funnel and wipe any salt residue away from the opening.

Make sure the cap is screwed tightly, so that no detergent can get into the container during the wash program (this could damage the water softener beyond repair).
As soon as this procedure is complete, run a program without loading. The “Pre-Wash” program alone is NOT sufficient.
Residual saline solution or grains of salt can lead to corrosion, irreparably damaging the stainless steel components.
The guarantee is not applicable if faults are caused by such circumstances.

Only use salt that has been specifically designed for dishwashers.
If the salt reservoir is not filled, the water softener and the heating element may be damaged as a result.
Whenever you need to add salt, we recommend carrying out the procedure just before the washing cycle is started.

SETTING THE WATER HARDNESS
To allow the water softener to work in a perfect way, it is essential that the water hardness setting is based on the actual water hardness in your house. This information can be obtained from your local water supplier.
The factory setting is for average (2) water hardness.
- Switch on the appliance by pressing the ON/OFF button.
- Switch off the appliance by pressing the ON/OFF button.
- Hold down button P for 5 seconds, until you hear a beep.
- Switch on the appliance by pressing the ON/OFF button.
- The program indicator light of the current set level flashes.
- Press button P to select the desired hardness level (see WATER HARDNESS TABLE).

Water Hardness Table

<table>
<thead>
<tr>
<th>Level</th>
<th>PPM</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Soft - Medium</td>
<td>0 - 200</td>
</tr>
<tr>
<td>2 Average</td>
<td>210 - 300</td>
</tr>
<tr>
<td>3 Hard</td>
<td>310 - 400</td>
</tr>
<tr>
<td>4 Very hard</td>
<td>410 - 500</td>
</tr>
</tbody>
</table>

• Switch off the appliance by pressing the ON/OFF button. Setting is complete!

FILLING THE DETERGENT DISPENSER

1. Press button P to select the desired hardness level (see WATER HARDNESS TABLE).
2. Hold down button P for 5 seconds, until you hear a beep.
3. Switch on the appliance by pressing the ON/OFF button.

Good washing results also depend on the correct amount of detergent, rinse aid liquid and refined salt is required.
To achieve the best washing and drying results, the combined use of detergent, rinse aid liquid and refined salt is required.
We recommend using detergents that do not contain phosphates or chlorine, as these products are harmful to the environment.
Good washing results also depend on the correct amount of detergent being used.

Exceeding the stated amount does not result in a more effective wash and increases environmental pollution.
The amount can be adjusted to the soil level. In the case of normally soiled items, use approximately either 35g (powder detergent) or 35ml (liquid detergent) and additional tea spoon of detergent directly inside the tub. If tablets are used, one tablet will be enough.
If the crockery is only lightly soiled or if it has been rinsed with water before being placed in the dishwasher, reduce the amount of detergent used accordingly (minimum 25 g/ml) e.g. skip the powder/gel putted inside the tub.

ADJUSTING THE DOSAGE OF RINSE AID
If you are not completely satisfied with the drying results, you can adjust the quantity of rinse aid used.
- Switch the dishwasher on using the ON/OFF button.
- Switch it off using the ON/OFF button.
- Press button P three times - a beep will be heard.
- Switch it on using the ON/OFF button.
- The program indicator light of the current set level flashes.
- Press button P to select the level of rinse aid quantity to be supplied.
- Switch it off using the ON/OFF button Setting is complete!

If the rinse aid level is set to ZERO (ECO), no rinse aid will be supplied. The LOW RINSE AID indicator light will not be lit if you run out of rinse aid. A maximum of 4 levels can be set according to the dishwasher model. The factory setting is for a medium level.
- If you see bluish streaks on the dishes, set a low number (1-2).
- If there are drops of water or limescale marks on the dishes, set a high number (3-4).

FILLING THE RINSE AID DISPENSER

1. Open the dispenser B by pressing and pulling up the tab on the lid.
2. Carefully introduce the rinse aid as far as the maximum (110 ml) reference notch of the filling space - avoid spilling it. If this happens, clean the spill immediately with a dry cloth.
3. Press the lid down until you hear a click to close it.
NEVER pour the rinse aid directly into the tub.

Only use detergent which has been specifically designed for dishwashers.
If you are not completely satisfied with the drying results, you can adjust the quantity of rinse aid used.
- Switch the dishwasher on using the ON/OFF button.
- Switch off the appliance by pressing the ON/OFF button.
- Press button P to select the level of rinse aid quantity to be supplied.
- Switch it off using the ON/OFF button Setting is complete!

If you see bluish streaks on the dishes, set a low number (1-2).
If there are drops of water or limescale marks on the dishes, set a high number (3-4).

NEVER pour the rinse aid directly into the tub.
To open the detergent dispenser press button A. Introduce the detergent into the dry dispenser B only. Place the amount of detergent for pre-washing directly inside the tub.

1. When measuring out the detergent refer to the mentioned earlier information to add the proper quantity. Inside the dispenser B there are indications to help the detergent dosing.
2. Remove detergent residues from the edges of the dispenser and close the cover until it clicks.
3. Close the lid of the detergent dispenser by pulling it up until the closing device is secured in place.

The detergent dispenser automatically opens up at the right time according to the program.

LOADING THE RACKS

TIPS
Before loading the baskets, remove all food residues from the crockery and empty the glasses. You do not need to rinse beforehand under running water.

Arrange the crockery so that it is held in place firmly and does not tip over; and arrange the containers with the openings facing downwards and the concave/convex parts placed obliquely, thus allowing the water to reach every surface and flow freely.

Warning: lids, handles, trays and frying pans do not prevent the sprayer arms from rotating.

Place any small items in the cutlery basket. Very soiled dishes and pans should be placed in the lower basket because in this sector the water sprays are stronger and allow a higher washing performance.

After loading the appliance, make sure that the sprayer arms can cotate freely.

UPPER RACK
Load delicate and light dishes: glasses, cups, saucers, low salad bowls.

FOLDABLE FLAPS WITH ADJUSTABLE POSITION
The side foldable flaps can be positioned at three different heights to optimize the arrangement of crockery inside the rack.

Wine glasses can be placed safely in the foldable flaps by inserting the stem of each glass into the corresponding slots.

For optimum drying results incline the foldable flaps more. To change the inclination, pull up the foldable flap, slide it slightly and position it as you wish.

ADJUSTING THE HEIGHT OF THE UPPER RACK
The height of the upper rack can be adjusted:

- high position to place bulky crockery in the lower basket and low position to make the most of the tip-up supports by creating more space upwards and avoid collision with the items loaded into lower rack.

The upper rack is equipped with a Upper Rack height adjuster (see figure), without pressing the levers, lift it up by simply holding the rack sides, as soon as the rack is stable in its upper position. To restore to the lower position, press the levers A at the sides of the rack and move the basket downwards.

We strongly recommend that you do not adjust the height of the rack when it is loaded. NEVER raise or lower the basket on one side only.

LOWER RACK
For pots, lids, plates, salad bowls, cutlery etc. Large plates and lids should ideally be placed at the sides to avoid interferences with the spray arm.

CUTLERY BASKET
The basket is equipped with top grilles for improved cutlery arrangement. The cutlery basket should be positioned only at the front of the lower rack.

Knives and other utensils with sharp edges must be placed in the cutlery basket with the points facing downwards or they must be positioned horizontally in the tip-up compartments on the upper rack.

UNSUITABLE CROCKERY
- Wooden crockery and cutlery.
- Delicate decorated glasses, artistic handicraft and antique crockery. Their decorations are not resistant.
- Parts in synthetic material which do not withstand high temperatures.
- Copper and tin crockery.
- Crockery soiled with ash, wax, lubricating grease or ink.

The colours of glass decorations and aluminium/silver pieces can change and fade during the washing process. Some types of glass (e.g. crystal objects) can become opaque after a number of wash cycles too.

DAMAGE TO GLASS AND CROCKERY
- Only use glasses and porcelain guaranteed by the manufacturer as dishwasher safe.
- Use a delicate detergent suitable for crockery
- Collect glasses and cutlery from the dishwasher as soon as the wash cycle is over.

HYGIENE
To avoid odour and sediment which can be accumulated in the dishwasher please run a high temperature program at least once a month. Use a tea spoon of detergent and run it without the loading to clean your appliance.

</table>

ECO program data is measured under laboratory conditions.

* The duration of the program shown on the display or in the booklet is an estimate calculated on standard conditions. The actual time may vary depending on many factors such as temperature and pressure of the incoming water, room temperature, amount of detergent, quantity and type of load, load balancing, additional selected options and sensor calibration. The sensor calibration can increase program duration up to 20 min.

Standby consumption: Left-on mode consumption: 5 W - Off mode consumption: 0.5 W

PROGRAMS DESCRIPTION

1. **ECO** - Normally soiled crockery. Standard program, the most efficient in terms of its combined energy and water consumption.
2. **INTENSIVE** - Program recommended for heavily soiled crockery, especially suitable for pans and saucepans (not to be used for delicate items).
4. **PRE-WASH** - Crockery to be washed later. No detergent to be used with this program.

Notes: To reduce consumption even further, only run the dishwasher when it is full.

DAILY USE

1. **CHECK WATER CONNECTION**
   - Check that the dishwasher is connected to the water supply and that the top is open.
2. **SWITCH ON THE DISHWASHER**
   - Open the door and press the ON/OFF button.
3. **LOAD THE RACKS**
   (see LOADING THE RACKS)
4. **FILLING THE DETERGENT DISPENSER**
   (see PROGRAMS TABLE).
5. **CHOOSE THE PROGRAM AND CUSTOMISE THE CYCLE**
   - Select the most appropriate program in accordance with the type of crockery and its soiling level (see PROGRAMS DESCRIPTION) by pressing the P button.
   - Select the desired options (see OPTIONS AND FUNCTIONS).
6. **START**
   - Start the wash cycle by closing the door. When the program starts you hear a beep.
7. **END OF WASH CYCLE**
   - The end of the wash cycle is indicated by beeps and by the flashing of the indicator light of the selected program. Open the door and switch off the appliance by pressing the ON/OFF button. Wait for a few minutes before removing the crockery - to avoid burns. Unload the racks, beginning with the lower one.

The machine will switch off automatically during certain extended periods of inactivity, in order to minimise electricity consumption. If the crockery is only lightly soiled or if it has been rinsed with water before being placed in the dishwasher, reduce the amount of detergent used accordingly.

**MODIFYING A RUNNING PROGRAM**

If a wrong program was selected, it is possible to change it, provided that it has only just begun: open the door (be ware of HOT steam!), press and hold the ON/OFF button, the machine will switch off.

Switch the machine back on using the ON/OFF button and select the new wash cycle and any desired options; start the cycle by closing the door.

**ADDING EXTRA CROCKERY**

Without switching off the machine, open the door (be ware of HOT steam!) and place the crockery inside the dishwasher. Close the door and the cycle will begin from the point at which it was interrupted.

**ACCIDENTAL INTERRUPTIONS**

If the door is opened during the wash cycle, or if there is a power cut, the cycle stops. It starts again from the point at which it was interrupted once the door has been closed or the electricity supply is restored.
ATTENTION: Always unplug the appliance when cleaning it and when performing maintenance work. Do not use flammable liquids to clean the machine.

CLEANING THE DISHWASHER
Any marks on the inside of the appliance may be removed using a cloth dampened with water and a little vinegar. The external surfaces of the machine and the control panel can be cleaned using a non-abrasive cloth which has been dampened with water. Do not use solvents or abrasive products.

PREVENTING UNPLEASANT ODOURS
Always keep the door of the appliance ajar in order to avoid moisture from forming and being trapped inside the machine. Clean the seals around the door and detergent dispensers regularly using a damp sponge. This will avoid food becoming trapped in the seals, which is the main cause behind the formation of unpleasant odours.

CHECKING THE WATER SUPPLY HOSE
Check the inlet hose regularly for brittleness and cracks. If damaged, replace it by a new hose available through our After-Sales Service or your specialist dealer. Depending on the hose type:

If the inlet hose has a transparent coating, periodically check if the colour intensifies locally. If yes, the hose may have a leak and should be replaced.

For water stop hoses: check the small safety valve inspection window (see arrow). If it is red, the water stop function was triggered, and the hose must be replaced by a new one.

For unscrewing this hose, press the release button while unscrewing the hose.

CLEANING THE WATER INLET HOSE
If the water hoses are new or have not been used for an extended period of time, let the water run to make sure it is clear and free of impurities before performing the necessary connections. If this precaution is not taken, the water inlet could become blocked and damage the dishwasher.

CLEANING THE SPRAY ARMS
On occasions, food residue may become encrusted onto the spray arms and block the holes used to spray the water. It is therefore recommended that you check the arms from time to time and clean them with a small non-metallic brush. To remove the upper spray arm, turn the plastic locking ring in an anti-clockwise direction. The upper spray arm should be replaced so that the side with the greater number of holes is facing upwards.

The lower spray arm may be removed by pulling it upwards.

CLEANING THE FILTER ASSEMBLY
Regularly clean the filter assembly so that the filters do not clog and that the waste water flows away correctly. The filter assembly consists of three filters which remove food residues from the washing water and then recirculate the water: to obtain the best washing results, you need to keep them clean. The dishwasher must not be used without filters or if the filter is loose.

After several washes, check the filter assembly and if necessary clean it thoroughly under running water, using a non-metallic brush and following the instructions below:
1. Turn the cylindrical filter A in an anti-clockwise direction and pull it out (Fig 1).
2. Remove the cup filter B by exerting a slight pressure on the side flaps (Fig 2).
3. Slide out the stainless-steel plate filter C (Fig 3).
4. Inspect the trap and remove any food residues. NEVER REMOVE the wash-cycle pump protection (black detail) (Fig 4).

After cleaning the filters, re-place the filter assembly and fix it in position correctly; this is essential for maintaining the efficient operation of the dishwasher.
# TROUBLESHOOTING

Your dishwasher may not work properly. 
Before contacting the After-sales Service, check if the problem can be solved by going through the following list.

<table>
<thead>
<tr>
<th>PROBLEMS</th>
<th>POSSIBLE CAUSES</th>
<th>SOLUTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>The dishwasher won’t start or does not respond to commands.</td>

IKEA WARRANTY

How long is the IKEA warranty valid?
This warranty is valid for five (5) years from the original date of purchase of your appliance at IKEA. Proof of purchase is required. If service work is carried out under warranty, this will not extend the warranty period for the appliance.

Who will execute the service?
IKEA Service Provider will provide the service through its own service operations or authorized service partner network.

What does this warranty cover?
The warranty covers faults of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This warranty applies to domestic use only. The exceptions are specified under the headline “What is not covered under this warranty?” Within the warranty period, the costs to remedy the fault e.g. repairs, parts, labour and travel will be covered, provided that the appliance is accessible for repair without special expenditure. Replaced parts or appliance become the property of IKEA.

What will IKEA do to correct the problem?
IKEA will examine the product and decide, at its sole discretion, if it is covered under this warranty. If considered covered, IKEA will then, at its sole discretion, either repair the defective product or if the product is found to be not repairable in its sole discretion (a) IKEA will replace it with the same or a comparable product or (b) refund it as per the prevailing depreciation rules of IKEA.

What is not covered under this warranty?
- Normal wear and tear.
- Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, fluctuating voltage, improper electrical circuit, blown fuse, damage caused by chemical or electrochemical reaction, rust, corrosion or water damage including but not limited to damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions, damage caused by rodents/insects, water, lightening, pest infestation or other acts of god.
- Consumable parts including batteries and lamps.
- Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible colour differences.
- Accidental damage caused by foreign objects or substances and cleaning or unblocking of filters, drainage systems or soap drawers.
- Damage to the following parts: ceramic glass, plastic parts accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to have been caused by production faults.
- Repairs or any alteration not carried out by our appointed service providers and/or an authorized service contractual partner or where non-original parts have been used.
- The use of the appliance in a non-domestic environment i.e. professional use or any alteration, abuse or misuse of the appliance.
- The Serial number or barcode label of the appliance is tampered with, defaced, missing or altered.
- Transportation damages. If a customer transports the product to his home or another address, IKEA is not liable for any damage that may occur during transport. However, if IKEA delivers the product to the customer’s delivery address, then damage to the product that occurs during this delivery will be covered by IKEA.

In cases the above conditions are observed at the time of visit by the Authorized Service Center service partner then the Purchaser shall be liable to bear the repair charges incurred during the process and price of other parts/consumables/spares not covered in Warranty and/or repair charges for the parts covered under warranty if the same is damaged by the Customer or otherwise gets damaged due to non adherence to User manual or warranty terms.

How country law applies
The IKEA warranty gives you specific legal rights, which cover or exceed all the local legal demands. However these conditions do not limit in any way consumer rights described in the local legislation. The courts at New Delhi have exclusive jurisdiction for settling the claims or disputes or matters arising out of present Warranty.

Area of validity
This IKEA warranty applies only to products purchased in India. This Warranty shall be restricted to and valid in India. An obligation to carry out services in the framework of the warranty exists only if the appliance complies with:
- The technical specifications of the country in which the warranty claim is made;
- The Assembly Instructions and User Manual Safety Information.

AFTER SALES for IKEA appliances
Please don’t hesitate to contact IKEA to:
- make a service request under this warranty;
- ask for clarification on functions of IKEA appliances.

To ensure that we provide you with the best assistance, please read carefully the Assembly Instructions and/or the User Manual before contacting us.

How to reach us if you need our service

The IKEA after sales customer service centre will assist you on the phone with basic trouble shooting for your appliance at the time of service call request.

In order to provide you a quicker service, please also always refer to the IKEA article number (8 digit code) placed on the rating plate of your appliance.

While IKEA will make every effort to carry out repairs/ replacement of parts under this Warranty as soon as possible; it is expressly made clear that IKEA or its authorised service partner shall not be liable to do so within specified period of time.

It is entirely left to IKEA’s discretion to effect repairs/replacements of parts at the site of installation or at any service station of its Authorized Service Center(s).

SAVE THE PROOF OF PURCHASE!
It requires for the warranty to apply. The proof of purchase also reports the IKEA name and article number (8 digit code) for each of the appliances you have purchased.

Do you need extra help?
For any additional questions not related to After Sales of your appliances please contact your nearest IKEA store call centre. We recommend you read the appliance documentation carefully before contacting us.

IKEA reserves the right to alter the terms and conditions of the present Warranty at any time with its sole discretion without any prior notice.
