SONOS

When it sounds great it feels right.

Just about everything in life is better with sound. Washing up, kicking back, flossing, Tuesdays – add your favourite soundtrack and they turn into something else completely.

Knowing what a powerful mood booster sound is – as important to the atmosphere at home as any rug, or art piece, or sofa – IKEA has set out to make great sound available for everyone.

In close collaboration with audio-experts Sonos we've created SYMFONISK – great-sounding, great-looking pieces of furniture that blend into the home in new ways and make it easier to furnish with sound.

"IKEA is always looking for ideas that improve life at home. By integrating technology into home furnishing products we can do that in an even better way."

- Björn Block, Business Leader for IKEA Home Smart at IKEA of Sweden

Sonos and IKEA

At IKEA, we're great at home furnishing but new to sound. Sonos, on the other hand, has expertise in sound and technology and is curious about new ways of making sound blend into the home – the same as us.

So, in many ways we're a perfect match. Combining the best of our two worlds we make high-quality sound affordable and available – and create products neither of us would be able to come up with on our own.

"This partnership has always been about our two companies' shared passion, values and knowledge. IKEA and Sonos recognize the importance of great sound and its potential to positively affect life at home."

- Tad Toulis, VP of Design Sonos

The best sounding lamp in the world.

SYMFONISK table lamp with WiFi speaker shines a new light on sound, literally. Except bringing together two powerful mood boosters, two functions in one means one less cord to hide, one less power socket to reach, and one less product to buy. Best of all - the table lamp speaker isn't loud at all (unless you turn up the volume, of course). It simply blends in.

"We knew from the start that we wanted to challenge the traditional high-tech aesthetics. The lamp-speaker partly springs from the idea of the fireplace – one single piece that spreads warm light as well as sound."

- Iina Vuorivirta, IKEA designer

SYMFONISK table lamp with WiFi speaker is made in collaboration with Sonos and spreads a soft mood light as well as playing high-quality sound.

The best sounding shelf in the world.

Is it possible to create high-quality sound while saving space? If you ask IKEA and Sonos our answer is a unanimous yes. The proof is the versatile SYMFONISK WiFi bookshelf speaker.

"This is not your ordinary speaker. It's great tucked away in the bookshelf or put on display. Mount it on the wall that way turning it into a bedside table or a floating shelf – or use speaker hooks to hang it on a rail and integrate it into your kitchen."

- Andreas Fredriksson, IKEA designer

SYMFONISK WiFi bookshelf speaker by IKEA and Sonos has a changeable textile front and can be mounted on the wall, or stand, horizontally or vertically.

Good to know

- Integrates with all Sonos products.
- Controlled via the Sonos app.
- Supports all of the major music streaming subscription services (may vary between regions).
- Compatible with Airplay 2.
- Streams music, podcasts and radio via WiFi without interruptions from phone calls or notifications.
- For stereo sound, use two identical speakers.
- Create a multiroom system by connecting two or more speakers.
- Each speaker is controlled individually, so you can play different sound in different rooms, or play the same throughout the home.
