English

This potholder has been tested in accordance with EN ISO 21420: 2020, EN 407: 2020, Regulation (EU) 2016/425 and UK 2019 S1696 Schedule 35 Regulation 38.

Designation

Potholder for private use, Risk category II as per Regulation (EU) 2016/425 and UK 2019 S1696 Schedule 35 Regulation 38.

Use

The potholder is designed to be used for protection against thermal risks (contact heat) associated with removing hot items out of the hobs of the types usually used in domestic environment.

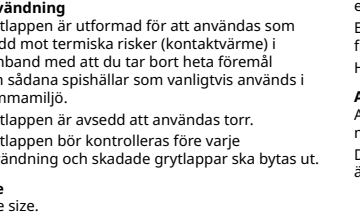

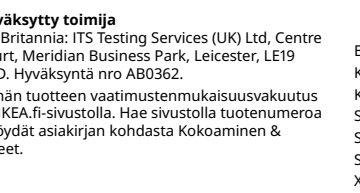

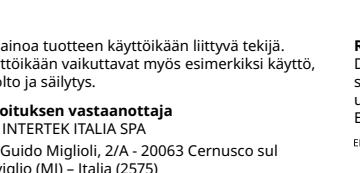

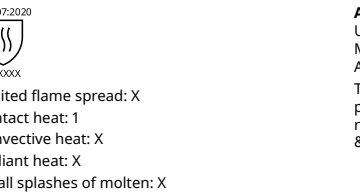

The potholder is intended to be used in dry condition.

Potholder should be inspected prior to each use and damaged potholders should be replaced.

Size

One size.

Relevant applicable European standards
This potholder is designed to offer protection against contact heat, at performance level 1, and complies with relevant requirements in EN ISO 21420: 2020 and EN 407: 2020.

Large quantities of molten: X
X is used for tests that were not tested.

Performance levels

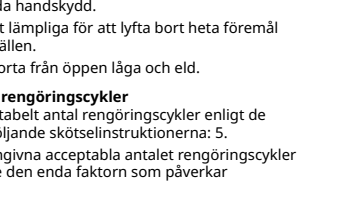

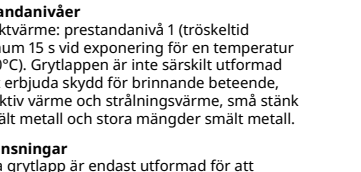

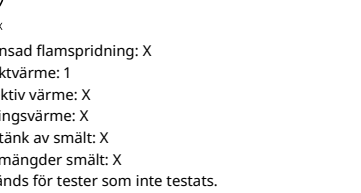

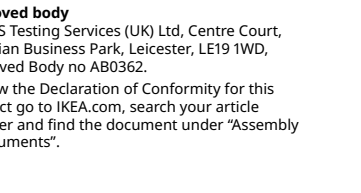

Contact warmth: performance level 1 (threshold time minimum 15 s when exposed to a temperature of 100°C). The potholder is not specifically designed to offer protection for burning behaviour, convective heat, and radiant heat, small splashes of molten metal and large quantities of molten metal.

Limitations

This potholder is designed to offer palm protection only.
Only suitable for taking hot items off the hob. Keep away from naked flame and fire.

Number of cleaning cycles
The acceptable number of cleaning cycles following the provided care instructions: 5.
The stated acceptable number of cleaning cycles is not the only factor related to the lifetime of the product. The lifetime also depend on usage, care, storage, etc.
