When it comes to mattresses, one size doesn’t fit all. People are built differently. People sleep differently. We understand this, which is why our range of mattresses offers you a wide choice of materials, support and price levels; everything you need to find a perfect match for you. Almost all of our mattresses and bases are covered by a 25-year guarantee against defects in materials and workmanship. For more detailed information, please read the Guarantee folder.

For your complete comfort
And because a good night’s sleep depends on more than just the mattress, you’ll also find the entire range of pillows, quilts, mattress and pillow protectors in this guide. In order to find what’s best for your individual needs, we advise to try the mattress of your choice together with different pillows. Find the combination that best fits you, by actually lying down and trying them out together in the mattress studio.
A quilt in the comfort that fits your sleeping preferences adds into the complete comfort so you sleep well and wake up rested. Take a look at our pillows and quilts on pages 00-00 to find the right ones for you.

When you get your mattress home
Before using for the first time
It’s normal for new mattresses to feel a bit too firm, so you should allow one month for your body to get used to the mattress and for the mattress to get used to your body. New materials also have their own particular smell. We recommend airing the mattress to help eliminate any smell. If you buy a roll packed mattress, you can use it straight away but keep in mind that it takes 3-4 days of use for them to regain their shape.

Care and cleaning
Adding a mattress protector (page 10) or mattress pad (page 9) to your new mattress makes it more hygienic, as it is easy to remove and clean. Some of our mattresses have a washable cover. On those that don’t, use upholstery cleaner to remove stains. Even the best mattresses become less comfortable with age and all mattresses accumulate dust and mites over the years. So we recommend that you change mattress every 8-10 years.

Good night, everyone

Love it or exchange it
And when you’ve chosen your mattress, take it home and have a good lie down. For up to 100 days if you like. If the chemistry isn’t right between you, simply bring it back to the IKEA store and choose another.
To find the right mattress for you, you should think about:

1. **Foam or sprung?**
   We offer a variety of different mattresses. Deciding if you want a foam/latex or sprung mattress will help you narrow down your choice considerably.

2. **Your budget.**
   We have mattresses to fit every budget – from basic mattresses to mattresses made with high quality natural materials. But you can be sure that every one is designed to give you a good night’s sleep.

3. **How does it feel?**
   The most important thing when choosing a mattress is to have a good lie down. Try the mattress without thick jackets and coats and in the position you usually fall asleep in. That way, you can tell if the mattress is a good match for you.

Sprung mattresses distribute your weight evenly, so there’s no extra pressure on any one part of your body. The open spring construction helps air flow through the mattress, so you won’t get too warm while you sleep. You can get the comfort level that’s right for you with a mattress pad and a slatted bed base or mattress base. Sprung mattresses are also extremely durable.

FOAM MATTRESSES

Soft and resilient, foam and latex mattresses provide support by moulding to the shape of your body and distributing your weight evenly. Because there’s no extra pressure on any part of your body, they facilitates blood circulation and help you fully relax. Foam mattresses also absorb the shock of movement, making them a great choice if you have a partner that tosses and turns at night. Their flexibility makes them a great fit for adjustable slatted bed bases.

A mattress protector will help your mattress or mattress pad last longer and stay fresh by protecting it from stains and dirt. It’s removable, so it’s easy to wash when needed. Filled protectors provide extra comfort and softness and draw moisture away from the body. The waterproof one prevents any liquid from passing through to keep your mattress dry and fresh.

**MATTRESS PROTECTORS**

**ÄNGSVIDE mattress protector.**

*Care instructions*

- You can prolong the life of your mattress with a mattress protector against stains and dirt.
- Elastic ribbon in each corner to keep the mattress protector in place.
- A good choice if you are allergic to dust mites since the protector is machine-washable at 60°C, a temperature that kills dust mites.

SLATTED BED BASES

Combined with a bed frame, slatted bed-bases can be used as a base for spring, foam and latex mattresses. They help your mattress last longer and stay comfortable by absorbing most of the stress and weight placed on your bed. You can adjust the slats in some bases to be more or less firm, and some can be adjusted at the foot and head, allowing you to sit up and read or watch television or keep your legs elevated.

Quilts, pillows and pillow protectors

Quilts, pillows and protectors are an important part of the complete sleep comfort. The pillow that feels best for you together with your favorite mattress is the base for a good night sleep. Adding on a pillow protector to protect your pillow, keep it fresh and prolong its life length is easy to be done. A quilt in your preferred material and warmth rate is the last element which makes you feel comfy in bed, sleep well and wake up refreshed.

In order to find the right quilt or pillow for you, it is good to consider the following:

1. Natural or man-made filling material?
   We offer a wide choice of quilts and pillows in different material choices: Natural materials like down and feathers and man-made materials like polyester, lyocell and memory foam. Considering which material is best for your comfort needs will help you to narrow down your choice considerably. Read more about the filling materials on the following pages.

2. Quality
   We have quilts and pillows in different qualities to fit individual needs and budgets. These qualities are determined by the materials they are made of and the detail of workmanship. For sure, no matter your choice, they are all designed to give you the best possible comfort.

3. A softer or a firmer pillow?
   We offer pillows in a softer and a firmer comfort. It is a good start to test your pillow together with your mattress in order to find the right one for you. Small children are most comfortable with softer pillows. For older children, it’s best to choose a pillow according to their individual preferences. You can find pillows for babies at Children’s IKEA. Adding on a pillow protector is an easy way to keep your pillow clean and fresh so it lasts longer.

4. A cooler or a warmer quilt?
   The quilt that is just right for you is determined by your sleeping preferences. Do you easily get warm in bed or do you rather need more warmth from your quilt? Do you share the quilt with someone? What’s your bedroom’s temperature? For children, it’s best to choose a quilt that’s cooler and rather light-weight, breathes well and is easy to wash, preferably quilts in man-made material. You can find quilts for babies at Children’s IKEA.

The symbols below are used to show the features of our comfort products.

Firmer
Depicts pillows with more filling if you like to sleep on a firmer pillow.

Softer
Depicts pillows with less filling if you like to sleep on a softer pillow.

Cooler
Depicts cooler and thinner quilts with less filling for you who often feel warm.

Warmer
Depicts warmer quilts with more filling for you who feel neither too warm or too cold.

How to care for your quilts and pillows?

General advice for all materials
• Roll packed quilts and pillows which have been compressed for transport, may take a few days to regain their correct shape and fluffiness.

• Mites thrive in damp, warm and dark environments. Therefore, when you wake up in the morning, air your quilts and pillows well so remaining moisture can evaporate before putting them back on the bed.

• Moreover, you can wash all IKEA quilts and pillows at 60°C (apart from memory foam pillows, where only the cover can be washed), the temperature at which mites die. To keep your quilts and pillows free from mites and dirt, carefully follow the washing instructions.

• Air your quilts and pillows often so they will be free from dust and stay fresh and dry.

• You can prolong the life of your pillows with a pillow protector which protects them from stains and dirt, read more on page 23.
### Additional advice for natural material

- Down and feathers have a natural smell which will disappear once you have taken them out of the package and have aired them for some time.

- For down and feather quilts and pillows you should only use one third of the normal amount of detergent and wash them separately.

### Additional advice for man-made material

- Man-made quilts and pillows are very easy to care for and can be washed often. They also dry relatively quickly.

**Memory foam**

- The material may have a “factory smell” as a result of being sealed in airtight packaging. This will disappear once you open the package and leave the pillow to air before using it.

- Please consider that it may take some time to get used to this type of pillow, due to the unique properties of the material.

- A pillow with memory foam filling moulds to your head and neck. This helps your muscles relax and, consequently, you will move less and sleep better.

- The removable cover can be washed at 60°C. The filling is not washable; please follow the care instructions on the label.

### Care instructions label

The filling materials used for man-made pillows are polyester, lyocell and memory foam. Man-made pillows are very easy to care for. They can be machine-washed often at 60° C (apart from memory foam pillows, where only the cover can be washed), which makes them a good choice for people with dust mite allergies. Moreover, they dry quickly after being washed. Some pillows have a microfiber filling which is lightweight and ultra-soft like down. Some are made of memory foam which gives you extra support by moulding to the contours of your body. Some of our pillows contain lyocell, a cellulose fibre derived from wood pulp. In addition to sharing the same positive properties in the wash as polyester pillows, lyocell breathes well and absorbs moisture and draws it away.

**HYLLE pillows.**

- The pillow has an inner core inside a soft padded cover that gives extra support and helps the body to relax.
- You get a dry and comfortable sleeping environment since the lyocell/cotton cover breathes well, which helps air to circulate and moisture to evaporate.
- The filling is held in place by the sewn channels in the cover, wash after wash.
- Easy-care synthetic pillow suitable if you are allergic to house dust mites as the cover can be machine-washed at 60°C, a temperature that kills mites.
- 236 thread count.

Adding a pillow protector helps you to keep your pillow fresh and clean. It also prolongs the life length of your pillow as you rather wash the protector frequently instead of the pillow. Pillow protectors are easy to remove and put back on again and take up less space in the washing machine. There are different qualities of protectors available to suit your comfort needs and budget.

The filling material used for man-made quilts are polyester and lyocell fibres. Man-made quilts are very easy to care for. They can be machine-washed often at 60°C, which makes them a good choice for people with dust mite allergies. Moreover, they dry quickly after being washed. Some quilts have a microfiber filling which is light-weight and ultra-soft like down. Some contain lyocell, a cellulose fibre derived from wood pulp. Lyocell breathes extremely well and is excellent at absorbing and drawing moisture away - in addition to sharing the same positive properties in the wash as polyester fibres. You can choose from cooler and warmer quilts. An extra warm quilt is available during colder months.

Duck down and feathers are used in the filling of natural quilts. These fillings are natural insulators. They breathe and are good at absorbing moisture. Down is soft, fluffy and light. Feathers are resilient and heavier. This means that the more down a quilt contains, the softer and more lightweight it is. Natural quilts can be washed at 60° C, but not as often as man-made quilts. You can choose from cooler and warmer quilts. An extra warm quilt is available during colder months.

**NATURAL QUILTS**

**BLEKVIDE quilts.**

*Care instructions*

- The quilt is soft, lightweight, fluffy and warmth-insulating due to the large proportion of down in the filling.
- Keeps you dry and comfy all night because the soft, warmth-insulating filling of down and feathers absorbs and transports moisture away.
- You get a dry and evenly tempered sleeping environment since both the filling and the cotton cover breathe well, which helps air to circulate.
- The outer fabric in sateenwoven cotton has a pronounced lustre and is soft against your skin.
- The warmth is distributed evenly, with no cold spots, because the quilt is sewn in boxes to keep the filling in place.
- The quilt is machine-washable at 60°C, a temperature that kills dust mites.
- 336 thread count.
