Designed for everyday life

To make planning your kitchen even easier, IKEA has developed a complete line of high quality appliances. Appliances that are designed to perfectly fit and match your IKEA kitchen – and that we back up with our 5 year warranty.

IKEA Appliances have been developed in cooperation with Whirlpool Corporation and offer functions that will facilitate your everyday cooking needs.

Designed to perfectly fit and complete your kitchen
We think appliances should work and look good together with which ever kitchen style you choose. That’s why our high quality appliances are designed to coordinate together and fit perfectly with IKEA cabinets.

To complete your kitchen, we offer three different appliance series in different styles. All appliances within each series are co-ordinated to fit together – like a family. NUTID, designed by Mikael Warnhammar, is a series of functional appliances. The modern FRAMTID series in stainless steel includes a slide-in cooker that creates an integrated look between the cabinets. If you prefer a more traditional style kitchen, DÅTID in anthracite with unique handles on the oven and microwave oven, is a perfect choice. To get a uniform and stylistically clean expression in your kitchen, we even offer kitchen handles that perfectly match the handles on the FRAMTID and NUTID appliances.

We offer appliances for any need
Whether you spend little or much time in the kitchen, if you have a small or a big family, if you love cooking or simply want to heat up leftover carry out, IKEA has something to make your everyday cooking easier and more enjoyable.

Make shopping simple and order your new appliances when you buy your kitchen and have it all delivered together right when you need it.

5 Year Limited Warranty INCLUDED

Ranges

Freestanding ranges are easy to place where you want and fit perfectly between IKEA cabinets for a fully integrated look. Choose an electric range with a ceramic cooktop, or a gas range. Most have a handy drawer below the oven for storing cookware or bakeware.

Range with ceramic cooktops
Ceramic cooktops heat up quickly and evenly and have a smooth, easy-to-clean surface of tempered glass and provide extra work surface. All cooktops have a hot surface indicator light for increased safety.

Range with gas cooktops
Gas cooktops are perfect for the ambitious family chef. They heat up quickly and exact temperatures are easy to set. All have convenient electric push-and-turn ignition. Four burners, each with a different performance level, provide the ideal heat for all types of cooking, from a gentle simmer to searing.

All of our gas cooktops have sealed gas burners. These collect spills to make cleaning easier and are simple to control for optimum cooking performance. The durable pan supports also remove for easy cleaning. Every gas range includes an LP conversion kit to enable you to use bottled gas if you wish.

This is how you choose your range:

1. Choose range type
First, consider your fuel type. You can choose between electric ranges with smooth ceramic cooktops or gas cooktops for a fast, exact response. Our gas cooktops also provide a flexibility to meet every need from a slow simmer to a fast boiling.

2. Consider cleanability
The easier a cooktop or an oven is to clean, the more enjoyable cooking becomes. Ceramic surfaces are sealed all the way around so spills stay on top and can be easily cleaned using soap and water, or a flat edge scraper for cooked-on spills. Sealed burners on our gas ranges help keep the cooktop clean by preventing spills from seeping below the burner surface. And some of our ranges are self-cleaning.

3. Extra functions
Consider whether you want any extra features such as a delay cook option that enables you to prepare food now and cook it later. Or, set it to be ready along with your side dishes. You can also have a broiling function that lets you broil at any temperature between 170°F and 500°F.
**General specifications**

Some of our ranges are self-cleaning, have a custom broil feature and are equipped with a timer.

A range with a delay cook option enables you to prepare the food now and cook it later. Or, set it to be ready along with your side dishes. Just set start and finish times and enjoy a relaxing bath, or a good read in your favorite chair. All while the food cooks itself!

Broiling can be done at any temperature between 170°F and 500°F degrees. Broil meats at high temperatures, or use the low heat for delicate cooking – like browning meringues.

Some of our ranges clean themselves – at the press of a button. Three hours later, the oven will have baked the dirt and grease into a small pile of ashes that you can easily brush aside.

For safety reasons, when the oven is in the high heat-cleaning cycle, the oven door locks automatically. Allowing you to do other things without worrying. Simple, safe and smart!

**Explanation of symbols**

The symbols below are used to show all the features and functions available among our ranges and ovens. Each oven on the following pages will have symbols showing which functions that particular appliance has.

- **Thermal oven function with top and bottom heating elements (bake/roast)**
  Combines the top and bottom heating elements to provide a traditional cooking method with the oven hotter at the top. Ideal for cooking dishes with a crispy finish or for slow cooking of casseroles.

- **Broil**
  Heats to a fixed pre-set optimum temperature. Ideal for even broiling of vegetables and smaller pieces of meat.

- **High and low broil**
  Adjustable broil with two heat zones. One zone can be shut down, which saves energy when broiling small meals.

- **Convection broil**
  Combines fan and broil cooking functions. Allows you to broil, brown and cook larger dishes and meat all the way through.

- **Fan defrost**
  A fan at the back of the oven circulates air (without heat) evenly around the frozen food for hygienic and quicker defrosting.

- **Convection oven function**
  Combines top and bottom heating elements with the fan for even heating. Ideal for baking cookies, tarts and other pastry.

- **Keep Warm**
  The function automatically keeps food warm at 176°F for up to 5 hours. Can be programmed to activate automatically at the end of the set cooking time.

- **Catalytic cleaning**
  Makes cleaning easier. The sides of the oven are lined with catalytic enamel tiles, so grease and dirt do not stick.

- **Self cleaning**
  Simple and safe cleaning without chemicals. Burns off grease and dirt and converts them into ash that is easy to wipe away. The oven door automatically locks during self cleaning.
Ranges

LAGAN range with ceramic cooktop

- Free-standing; easy to place just where you want it in the kitchen.
- Oven for flexible cooking; features 5 functions that you can combine for different ways of cooking, from defrosting to a good baking result.
- Top and bottom heating and grill function; ideal for cooking dishes with a crispy finish, slow cooking of casseroles and even grilling of vegetables and smaller pieces of meat.
- Practical drawer under the oven for storing baking sheets, a frying pan or baking sheet paper.
- Catalytic cleaning.
- Capacity: 4.8 cu.ft.
- 2×1500W hot plate.
- 2×2000W hot plate.
- 2 wire oven racks included.

White 901.822.51 $499

FRAMTID slide-in range with ceramic cooktop

- Slide-in range; creates an integrated look between the cabinets.
- Sabbath mode; overrides the oven’s shut-off feature, enabling 72 hours of uninterrupted baking.
- Cook and hold function; keeps food warm for up to an hour without overbaking or burning.
- Oven with timer; can be preset to switch on and off at the time desired.
- Oven with self-cleaning function; burns grease and dirt to ashes that are easy to brush off.
- Automatic lock on the oven door; the door stays closed during self-cleaning at a high temperature.
- Cooktop with radiant cooking zones that give an even heat.
- Smooth tempered glass surface; makes it easy to clean and provides extra work space.
- Restheat indicator light for increased safety.
- Practical drawer under the oven for storing baking sheets, a frying pan or baking sheet paper.
- TYDA handles match the handle on the cooker; fit the handles on to your kitchen fronts and create a uniform expression.

Stainless steel 401.423.33 $999

FRAMTID slide-in range with gas cooktop

- Slide-in range; creates an integrated look between the cabinets.
- Sabbath mode; overrides the oven’s shut-off feature, enabling 72 hours of uninterrupted baking.
- Cook and hold function; keeps food warm for up to an hour without overbaking or burning.
- Oven with timer; can be preset to switch on and off at the time desired.
- Oven with self-cleaning function; burns grease and dirt to ashes that are easy to brush off.
- Automatic lock on the oven door; the door stays closed during self-cleaning at a high temperature.
- Convenient electric ignition by using the push-and-turn knob.
- Heat up quickly and react rapidly and precisely when you regulate the temperature; makes it easy to adjust the heat according to the food you’re cooking.
- Removable pan support in durable porcelain-coated cast iron for increased stability.
- Practical drawer under the oven for storing baking sheets, a frying pan or baking sheet paper.
- TYDA handles match the handle on the cooker; fit the handles on to your kitchen fronts and create a uniform expression.

Stainless steel 201.423.34 $1199
BETRODD range with ceramic cooktop

- Freestanding range.
- Oven with timer; can be preset to switch on and off at the time desired.
- Oven with self-cleaning function; burns grease and dirt to ashes that are easy to wipe off.
- Automatic lock on the oven door; the door stays closed during self-cleaning at a high temperature.
- Cooktop with radiant cooking zones that give an even heat.
- Smooth tempered glass surface; makes it easy to clean and provides extra work space.
- Hot Surface Indicator light for increased safety.
- Practical drawer under the oven for storing baking sheets, a frying pan or baking sheet paper.
- Capacity: 4.8 cu.ft.
- Flexible cooking zone.
- 2x6” radiant elements, 1200W.
- 1x9” radiant elements, 2500W.
- 1x9/6” radiant elements, 2500W/1200W.
- 2 wire oven racks included.

Stainless steel 802.548.04 $699

PRAKTFULL range with gas cooktop

- Freestanding range
- Oven with timer; can be preset to switch on and off at the time desired.
- Oven with self-cleaning function; burns grease and dirt to ashes that are easy to wipe off.
- Automatic lock on the oven door; the door stays closed during self-cleaning at a high temperature.
- Convenient electric ignition by using the push-and-turn knob.
- Heat up quickly and react rapidly and precisely when you regulate the temperature; makes it easy to adjust the heat according to the food you're cooking.
- Removable porcelain-coated pan support for increased stability.
- Practical drawer under the oven for storing baking sheets, a frying pan or baking sheet paper.
- Capacity: 5.0 cu.ft.
- Delay bake function.
- 1x12.500 BTU sealed burner.
- 2x9.500 BTU sealed burners.
- 1x5.000 BTU sealed burner.
- 2 wire oven racks included.
- Liquid propane convertible kit included.

Ovens

Depending on your needs, you can choose from a wide selection of different oven models to do the perfect job everytime.

Ovens with convection function
Convection ovens have a fan at the back of the oven that circulates heated air produced by the top and bottom elements. This produces even heat throughout the interior than the natural movements of air in a standard thermal oven. This movement of heated air helps maintain a consistent temperature throughout the oven, cooking foods faster and more evenly, crisping surfaces while sealing in moisture and yielding crustier breads. The even heating is also ideal for baking cookies, tarts and other pastry.

This is how you choose your oven:

1. Consider your needs
Will you use your oven just to heat up food, or do you want to make pastry or even gourmet dishes on two levels simultaneously? What kind of dishes do you like to prepare? Are you a hobby cook, or an adventurous chef, who loves to prepare food and use special functions?

2. Choose your size and style
Consider how much space you have for an oven in your kitchen and how many people you usually cook for. Our 30” wide ovens fit AKURUM base/high cabinets perfectly, and cooktops and extractor hoods come in sizes and styles to match. Our ovens offer advanced functions for all types of cooking.

3. Install high or low
Do you want an eye-level oven for easy visibility and extra child safety – then fit a built-in oven in an AKURUM high cabinet. You can also fit the oven in a base cabinet with a separate cooktop. By fitting ovens and cooktops in different locations, two cooks can easily work in the kitchen at the same time. Hard to choose? Fit a double oven in a high cabinet – with two ovens you can bake and broil at the same time.
Well-groomed oven
What kind of cleaning system do you prefer? The ovens with a continuous clean feature have catalytic panels on the sides and back that absorb soils. The panels are easy to clean by turning the oven to 390°F for 1 hour, then wiping the oven with a damp sponge. Other ovens clean themselves – at the press of a button. Three hours later, the oven will have baked the dirt and grease into a small pile of ashes that you can brush aside. For safety reasons, when the oven is in the high heat-cleaning cycle, the door locks automatically when the cycle begins.

Time the food
If you don’t want to hang around the kitchen waiting for the food to be done - choose an oven with a delay bake option. You can prepare the food now and cook it later. Or, set it to finish alongside complementary side dishes. Just set the start and stop times and enjoy a quiet moment in the bath, or in your favorite chair. The food cooks itself.

Ovens

**DÅTID convection oven with self cleaning**

- Convection oven function that combines top and bottom heating with the fan for even heating; ideal for baking cookies, tarts and other pastry.
- Self-cleaning function; burns grease and dirt to ashes that is easy to brush off.
- The oven gives a signal when the required temperature is reached and at the end of the pre-set cooking time.
- Automatic lock on the oven door; the door stays closed during self-cleaning at a high temperature.
- Oven with timer; can be preset to switch on and off at the time desired.
- Capacity: 4.1 cu.ft.

Install an oven in an AKURUM cabinet

All built in ovens can be installed in the following AKURUM cabinet combinations.

Install an oven in other cabinets

Be precise when measuring your cabinet and make sure that your new oven will fit.
Microwave ovens

A microwave is a useful companion to your regular oven or range, making everyday cooking easier and faster. Choose a microwave with an integrated extractor fan that gives you two functions in one, or a microwave you can combine with a regular oven in an AKURUM high cabinet.

Which microwave suits your needs and your kitchen best?
To save space and make more room on the countertop, IKEA offers microwave ovens that you can install between wall cabinets or in a high cabinet. Installing a microwave in a high cabinet together with your oven makes it easier to ensure a comfortable and ergonomic working height. Fitting a microwave oven with integrated extractor fan between wall cabinets gives you two functions in one.

Feature-rich microwave ovens
You can make it easiest for yourself by choosing a microwave with pre-programmed functions. Then the oven knows when the food is cooked or defrosted, and all you have to do is enjoy the results.

The microwave oven can be programmed to cook in different stages using a variety of times, temperatures and power levels to ensure the optimal result for any dish.

With an automatic reheat function, you can choose from a number of preset categories (soup/sauce, casserole, baked foods, dinner plate single-serving size and pizza) and the microwave automatically adjusts the time and power level to reheat leftovers perfectly. With an automatic defrost function, you can select meat, poultry or fish defrost settings and the weight of the dish. The oven will automatically optimize microwave emissions to the type and quantity of food. The turntable is set into the base of the cavity so that it is level with the bottom. This provides greater cooking versatility and simplifies cleaning.

Two installation options
The microwave oven with extractor fan can be used in two ways. It is preset for use with a charcoal filter so that air can be recirculated, but it can also be connected to a duct that discharges the spent air outside.

This is how you choose your microwave oven:

1. Consider your needs
   You can choose from more traditional microwave ovens with extractor fans to advanced models with seven pre-set auto cook functions.

2. Consider your style
   Think about which colour or finish you prefer (stainless steel, white, black) and whether you prefer a more modern or traditional look.

3. Choose the placement
   Our microwave ovens can be placed in AKURUM cabinets to give you a comfortable working height and save valuable work space on your countertop. Depending on which one you choose, you can place it in a high cabinet or a wall cabinet.
Microwave ovens

LAGAN microwave oven with extractor fan

- Combination of microwave oven and extractor fan for installation in a row of wall cabinets; provides comfortable work height and clears space on the countertop.
- Auto reheat function with 5 preset categories: soup/sauce, casserole, baked goods, dinner plate 1 serving size and pizza.
- Defrost function for 3 categories (meat, fish and poultry): adjusts microwave emission to the quantity of food.
- Instant cook pads are preset for popping corn and baking potatoes.
- Can be used in two ways: preset for connection to ductwork for outdoor venting, but can also be used with charcoal filter for recirculation of air.
- Output power microwave: 900W.
- Capacity: 1.5 cu.ft.
- 10 power levels.
- Electronic timer.
- Rotating turntable diam. 12”.
- With a simple touch you can add an extra minute to the program of your choice.
- Integrated extractor fan with 2 different speeds.
- 112 CFM in recirculation mode.
- 221 CFM, ducted using 3 1/4”x10” ventilation.
- 6.6 sones.
- Fan lighting: 1x30W bulb.
- 2 dishwasher-safe grease filters and 1 charcoal filter included.

DÅTID micro oven with extractor fan 30”

- Combination of microwave oven and extractor fan for installation in a row of wall cabinets; provides comfortable work height and clears space on the countertop.
- Can be installed in two ways: ducted to the outside or in recirculation mode fitted with charcoal filter.
- Auto reheat function with 5 preset categories: soup/sauce, casserole, baked goods, dinner plate 1 serving size and pizza.
- Defrost function for 3 categories (meat, fish and poultry): adjusts microwave emission to the quantity of food.
- 1 charcoal filter included; effectively absorbs smell of cooking when the air is recirculated.
- 1 grease filter included; effectively eliminates smell of cooking and is easy to remove for cleaning.
- Integrated extractor fan with 3 different speeds.
- Output power microwave: 1000W.
- Noise level at max. speed: 66 dB (A).
- Electronic timer.
- Popcorn function.
- Lock function.
- Defrost.
- Fast defrost.
- Rotating turntable dia. 31 cm.
- Fan lighting: 1x40W bulb.
- 10 power levels.
- With a simple touch you can add an extra 30 seconds to the program of your choice.
- Voltage: 120V.
- Power supply cable included.

FRAMTID microwave oven with extractor fan

- Combination of microwave oven and extractor fan for installation in a row of wall cabinets; provides comfortable work height and clears space on the countertop.

### Install a microwave oven in an AKURUM cabinet

DÅTID microwave oven can be installed in the following AKURUM cabinet combinations together with a built-in a 30".

Install a microwave oven with extractor fan

![Diagram of microwave oven installation](image-url)
Cooktops

Our wide range of cooktops let you choose one that perfectly suits your style of cooking, the size of your household and your own personal taste.

**Ceramic cooktops**
These cooktops heat up quickly and evenly and have a smooth easy-to-clean surface of tempered glass. The cooktop can also double as extra workspace.

With infinite heat controls, you can set the temperature of the cooking zones to exactly what’s needed – from simmering to boiling. All cooktops have a hot surface indicator light for increased safety and one (1) radiant element with simmer function that is ideal for e.g. melting chocolate or simmering sauce.

**Gas cooktops**
Gas cooktops are the perfect choice for the ambitious family chef. They heat up quickly and achieving the exact temperature is easy.

All cooktops have convenient electric ignition by using push-and-turn. With infinite heat controls, you can set the temperature of the burners to exactly what’s needed. All of our cooktops have sealed gas burners for increased cooking control. As well as removable pot support, making them easy to clean.

**Induction cooktops**
Induction cooktops bring food to the boil quickly and react rapidly and precisely when you regulate the temperature. The zone has a coil that generates an electromagnetic field, and heat is produced first when you put a pot on it. Note that these cooktops only work with pots and pans that have magnetic bases.

**Save energy – and help the environment**
You’re using the cooktop a lot. By choosing an induction cooktop that heats up quickly you’re saving a lot of time and energy. The induction cooktop is also more efficient in transferring heat to the pot compared to other types of cooktops.

Use the right sized burner for the size of pot or pan you are using. If the burner is bigger than the pot it wastes energy. Also always use a lid when bringing e.g. water to the boil.

---

**This is how you choose your cooktop:**

1. **Choose your cooktop type**
   First, consider your fuel type. You can choose between smooth, easy-to-clean ceramic cooktops, energy efficient induction cooktops that heat up quickly or gas cooktops with a fast and precise response. Remember that you don’t have to place the cooktop and oven together. Having them apart allows two people to cook at the same time and lets you use the space below the cooktop for storing cookware close at hand, for example.

2. **Consider your needs**
   How many dishes do you cook at once and for how many will you cook – for few or for many? The standard cooktop is 30” wide with four cooking zones.

3. **Choose your style**
   Our cooktops are available in different colors e.g. black, white, stainless steel or anthracite colors. Coordinate your cooktop with the oven, extractor hood and the rest of your kitchen.
Ceramic cooktops

**ELDIG ceramic cooktop**

- Cooktop with radiant cooking zones that give an even heat.
- 1 radiant element with simmer function; for use when melting chocolate or simmering sauce.
- Hot surface indicator light for increased safety.
- Infinite heat setting controls to suit your needs.
- Pull-up control knobs for easy cleaning of the cooktop.
- Smooth tempered glass surface; makes it easy to clean and provides extra work space.
- 1×9” radiant element, 2500W.
- 1×8” radiant element, 1800W.
- 1×7” radiant element, 1500W.
- 1×6” radiant element with simmer function, 1200W/900W.

W30×D21×H2½”

**NUTID ceramic cooktop**

- Cooktop with radiant cooking zones that give an even heat.
- Touch-control panel with locking function for increased safety.
- Restheat indicator light for increased safety.
- 2 variable cooking zones provide even and effective heat adapted to the shape and size of the cookware.
- Scraper for easy cleaning is included.
- Electronic timer.
- 2×1200W radiant zones.
- 1×1000-1800W radiant flexible zone.
- 1×900-2500W radiant flexible zone.
- Lock function.

Gas cooktops

**ELDIG ceramic cooktop**

- Heat up quickly and react rapidly and precisely when you regulate the temperature; makes it easy to adjust the heat according to the food you’re cooking.
- Removable pot support in durable cast iron for increased stability.
- Convenient electric ignition by using the push-and-turn knob.
- Infinite heat setting controls to suit your needs.
- Pull-up control knobs for easy cleaning of the cooktop.
- 1×12.500 BTU sealed burner.
- 2×9.000 BTU sealed burner.
- 1×6.000 BTU sealed burner.
- Liquid propane convertible kit included.

W30×D20 ⅛×H2½”
**DÅTID gas cooktop**

Black 602.222.15 $379

- Includes functions that you will need for your daily basic cooking.
- Heat up quickly and react rapidly and precisely when you regulate the temperature; makes it easy to adjust the heat according to the food you're cooking.
- Removable pan support in durable porcelain-coated cast iron for increased stability.
- Convenient electric ignition by using the push-and-turn knob.
- Infinite heat setting controls to suit your needs.
  - 1×6,000 BTU sealed burner.
  - 2×9,000 BTU sealed burner.
  - 1×12,500 BTU sealed burner.
- Liquid propane convertible kit included.

**DÅTID gas cooktop**

Stainless steel 001.823.64 $379

- Includes functions that you will need for your daily basic cooking.
- Heat up quickly and react rapidly and precisely when you regulate the temperature; makes it easy to adjust the heat according to the food you're cooking.
- Removable pot support in durable cast iron for increased stability.
- Convenient electric ignition by using the push-and-turn knob.
- Wired-in installation. Installation to be made by a qualified electrician.
  - 1×12,500 BTU burner.
  - 2×9,000 BTU burner.
  - 1×6,000 BTU burner.
- Matches other products in the DÅTID series.

**Induction cooktop**

**NUTID induction cooktop**

Black 501.826.20 $999

- 4 induction zones generating a magnetic field; for short, low-energy boil-up and fast, exact regulation of heat.
- The induction zones transfer heat directly to the base of the cookware and its content, and cool quickly when the cookware is removed.
- Touch-control panel with locking function for increased safety.
- Restheat indicator light for increased safety.
- Touch control panel at front for easy access and use.
- Lock function.
- Electronic timer.
- Infinite heat control.
- 1×6.000 BTU burner.
- 2×9.000 BTU burner.
- 1×12,500 BTU burner.
- Liquid propane convertible kit included.

NUTID induction cooktop
Extractor hoods

An extractor hood removes food odors, grease and steam. But it is also an important design detail in the kitchen and provides effective light over the cooking surface. For the best solution, form and function should go hand in hand.

This is how you choose your extractor hood:

1. Choose your style
   We have a wide range of hoods, which will co-ordinate with the style of your IKEA kitchen. You can choose between hoods that make a big impression or more discrete ones and between different colours.

2. Consider your space
   Keep your kitchen fresh while cooking – choose an extractor hood suitable for the size of your kitchen. The larger the kitchen, the higher the hood’s extraction rate should be.

3. Two installation ways
   Most of our extractor hoods can be installed in two ways. They can either be ducted to the outside, or used in recirculation mode fitted with a charcoal filter.

Install an extractor hood/fan

The minimum distance between cooktops and extractor hood/fan should be 24” if you have an electric cooktop and 30” if you have a gas cooktop. There may be local regulations that differ where you live - ask at the store for more details.
**Built-in fans**

**LUFTIG extractor fan**

**Vented**

![Image](image1)

- Can only be used for outdoor venting.
- Integrated extractor fan with 2 different speeds.
- To be mounted below a 78 cm wide wall cabinet.
- 1 dishwasher-safe grease filter included; effectively absorbs smell of cooking, easy to remove for cleaning.
- 190 CFM.
- 4.5 sones/Noise level: 62.1 dB.
- To be completed with bulb E26 Max 75W.

White 202.225.33 **$69.99**

**LUFTIG extractor fan**

**Convertible**

![Image](image2)

- Can be used in two ways: preset for connection to ductwork for outdoor venting, but can also be used with charcoal filter for recirculation of air.
- Infinitely variable speed; adjust according to need.
- 1 dishwasher-safe grease filter included; effectively absorbs smell of cooking, easy to remove for cleaning.
- To be mounted below a 78 cm wide wall cabinet.
- 225 CFM, ducted using 7” round ventilation.
- 6.5 sones/Noise level: 67.8 dB.
- To be completed with bulb E26 Max 75W.

Stainless steel 502.225.36 **$99.99**

**EVENTUELL built-in extractor hood**

![Image](image3)

- Can be used in two ways: preset for connection to ductwork for outdoor venting, but can also be used with charcoal filter for recirculation of air.
- 2 dishwasher-safe grease filters included; easily removable for cleaning.
- 2 halogen bulbs included; effectively illuminate the cooking surface.
- Extractor hood with 3 different speeds.
- 385 CFM, ducted using 6” round ventilation.
- 7.3 sones/Noise level: 70.0 dB.
- Motor power: 264W.
- To be completed with bulb E26 Max 75W.

Stainless steel NA 102.548.69 **$499**

Fridges and freezers

IKEA has a wide choice of fridge/freezers in different sizes with different features. All have flexible interior fittings and are easy to clean and use.

This is how you choose your fridge/freezer:

1. Consider your needs
   Do you do a little shopping often or do you buy a lot at one time? How many people do you buy for? Choose from different sizes of fridge/freezer according to how much food you need to store.

2. Choose your type
   Choose between a top-mounted fridge/freezer with doors that can be placed to open to right or left, a larger side-by-side fridge/freezer or a fridge/freezer with a fully extending freezer drawer.

3. Choose your features
   You can choose a fridge/freezer with a built-in ice and water machine and you can save energy and money by choosing a model that is energy efficient.

All refrigerators and freezers shown are ENERGY STAR qualified. ENERGY STAR products and practices help you save money and reduce greenhouse gas emissions.
Freestanding fridge/freezers

**ENERGISK fridge/freezer**

**18 cu. ft.**

- The doors can be mounted to open from the left or right.
- 1 removable wire shelf included; makes the freezer easier to clean.
- Box for storing strong cheese, spicy food etc.; keeps taste and flavours inside.
- Capacity fridge: 13.5 cu.ft.
- Capacity freezer: 4.1 cu.ft.
- 1 crisper is included.

W28×D31½×H67½”

White  202.038.98  $549

**KYLIG 18 fridge/freezer**

Dishwashers

Once you’ve had a dishwasher, it’s hard to imagine life without one. Dishwashers save time, water and energy, and make it easier to keep the kitchen tidy.

This is how you choose your dishwasher:

1. Choose your style
   You can choose a traditional dishwasher, one with a stainless steel front, or an integrated appliance installed behind a door that matches the rest of your kitchen units.

2. Consider your needs
   Choose your dishwasher according to how often you need to do the dishes and how much tableware you use. Our dishwashers hold up to 12 place settings.

3. Choose your features
   Choose between features such as a delayed wash option or sanitation rinse for extra hygienic results.

All dishwashers shown are ENERGY STAR qualified. ENERGY STAR products and practices help you save money and reduce greenhouse gas emissions.

Safety
Please remember! If you have small children at home, be sure to store rinse aid, detergents and salt out of their reach.
