# GOOD TO KNOW

## Our fabrics have been tested

At IKEA we test the fabric covers on our sofas and arm-chairs so you can be sure they're durable. The fabric's ability to resist abrasion is tested by using a machine to rub it against another fabric while applying firm pressure. A fabric that can take 15,000 cycles is suitable for furniture that must withstand everyday life at home – and if it can take more than 30,000 cycles, it is very resistant to abrasion. All fabrics are sensitive to sunlight, which is why we also check that our fabrics resist fading effectively.

## Durable in different ways

Tough tests are an important way to check the durability of our fabric covers, but they don't tell the whole story. Durability also depends on materials, construction and manner of use. Heavy, tightly woven fabrics with a flat surface are most resistant to abrasion. Fabrics with a mixture of natural and synthetic fibres can withstand abrasion better than fabrics with only natural fibers. Yarn-dyed fabrics are more durable than fabrics with printed patterns. And a dirty cover wears out faster than a clean one. The fabric is also affected by how you use your sofa of course.

	<b>Washing instructions</b>	<b>Resistance to abrasion (cycles)</b>	<b>Light fastness (0-6)</b>
FINNSTA: Heavy cotton- and polyester mix with a nice texture. Yarn-dyed with a slight two-tone effect.	Machine washable at 40°C.	25.000	5
EDUM : Fabric made of a polyester- and cotton mix. The woven textile creates a finely striped effect.	Machine washable at 40°C.	20.000	5
