How to plan ENHET Bathroom Furniture

What do you want to store?

Start by thinking what storage needs do you have in your bathroom. Think of the activities that happen in your bathroom like laundry, shower, clean and care. How many people use the bathroom and when is the rush hour usually. Based on these activities you can plan how many storage units you will need as well as decide if a drawer or a door solution will be best suited for your needs. Think of the wall space you have too in your bathroom as this will be perfect place for shelving units that take very little space but they create lots of storage capacity for all the clean and care products that find home in the bathroom.

How much space do you have?

Decide on where you will place your vanity unit and start building your new bathroom around this space, see if you have enough wall space for an additional storage unit like a high cabinet or a shelving unit. Sketch out the space, measuring from the width and the height from the floor, if you have a narrow bathroom then the depth of your furniture will make a difference. For narrow bathrooms you can consider shallow ENHET cabinets. Take detailed measurements, note the shower area and all the space you might need for the piping that could affect your storage solution.

Want a ready-made combination?

We have made it much easier to buy ENHET bathrooms be it IKEA.ph or the store, we have created ready-made combinations that you can choose after you have considered what type of storage you need. These combinations are varied and have been designed to cover a wide storage functionality as well as style needs. You can buy them here in the store or on IKEA.ph.

Do you want to create your own solution? Use the additional information provided in this buying guide to follow these simple steps:

1. Pick a base cabinet

ENHET comes in open and closed frame solutions. The open base frames can work both under the wash-basin as a vanity unit and as an additional shelving unit next to the vanity. You can also choose between different wall shelves to build more storage space around your vanity unit maximising the storage possibilities.

The closed wooden-base material cabinets come with 2 functionality - either with a shelf, or 2 drawers, so depending on your preferences you can choose the functionality that works best in your bathroom. The uniqueness of these cabinets is that they work perfectly to be combined with the open frames of ENHET bathroom series so you can mix and match creating a unique solution that will be truly yours.

2. Choose the accessories

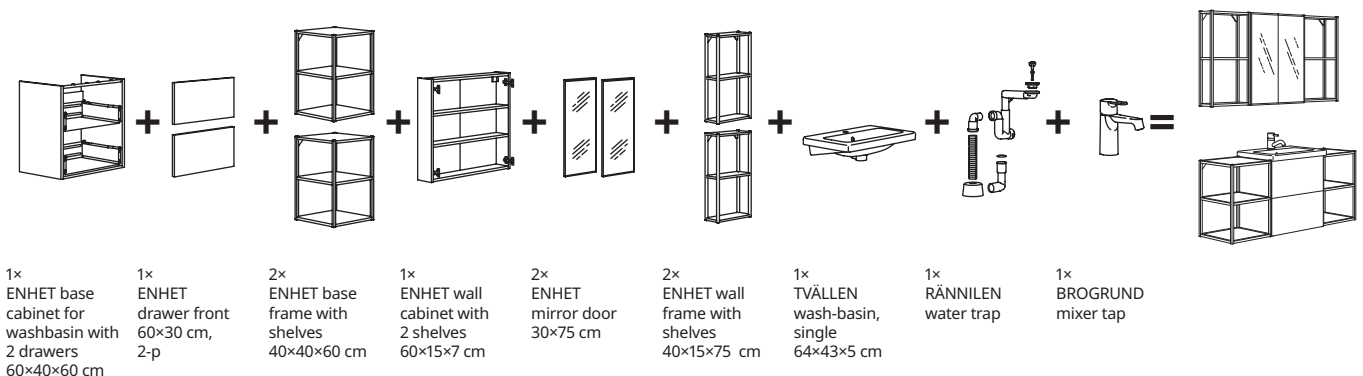

There are a wide range of accessories designed to be combined with ENHET open frames to add more functionality and versatility to your ENHET solution. Like the hooks and hook rail can create space for many towels to hang and dry all at the same time, or SKATTÅN container could become a perfect home for all your makeup brushes. With TAVELÅN trays you can store all your small items like hair pins, jewelry and the swivel shelf can become your favourite place to keep your nail polish bottles and the shaving kit for a quick and smooth access. For all the functions of ENHET accessories check page xx.

3. Choose the expression

Finally choose the colour and expression of your fronts. The possibilities are many you just need to pick the expression that fits best your style and bathroom making it look just great!

How to combine

Here is a little guide to explain how you can put together your very own ENHET bathroom solution. If you want to browse our ready-made solutions just check IKEA.ph.
