

**Game.
On.**

Furniture that puts gaming first

Welcome to experience a gaming range made up by sharp-looking ergonomic furniture and fun, functional accessories, designed to make your gaming experience better – and to make gaming blend into the home in new ways.

Created by IKEA in collaboration with Republic of Gamers, ROG, this range will make it easier for you to create your dream setup and help you stay on top.

**New**MATCHSPEL
gaming chair**1295:-**

“Gamers sit for hours, longer than most office workers. We want our products to offer better ergonomics and functions so that gamers can become even better at what they do without wearing out their bodies – become better athletes, basically.”

—Jon Karlsson

Designer IKEA

MATCHSPEL gaming chair is designed for great comfort – and to increase your gaming performance. There’s added flexibility in the headrest, and the armrests are adjustable to relieve strain on your arms and shoulders. Also, the chair is generous in size, it has built-in lumbar support and a mesh back that ensures a good airflow.

Developed in collaboration with pro-gamers

At IKEA, we know lots about clever home furnishing solutions, but we're novices at gaming. So, how did we go about developing a high-performing gaming range?

We turned to the professionals, of course. Together with gaming brand ROG, Republic of Gamers, we've created products and solutions neither of us would be able to come up with on our own.

ROG, Republic of Gamers, in short

A brand used by Asus since 2006, encompassing a range of computer hardware, personal computers, peripherals, and accessories oriented primarily towards PC gaming. Continuously ranked No.1 gaming brand from prestigious international media and fans. Has a big global follower base, and are involved in global gaming events and tournaments. They also have an e-sports club in China with 5 divisions in various leagues – Rogue Warriors.

PH180845.jpg

The IKEA gaming range includes six product families – **UPPSPEL**, **HUVUDSPELARE**, **UTESPELARE**, **MATCHSPEL**, **GRUPPSPEL** and **LÅNESPELARE**. The first, **UPPSPEL**, is designed in collaboration with ROG, the others are inspired by all we've learnt from the partnership.

Get ahead with the right accessories,
like **LÅNESPELARE** mouse bungee.

Tailor-made for you

The world's more than 2.5 billion gamers don't have identical taste and needs, it goes without saying. Whether you're a pro or an every-once-in-a-while gamer (or anything inbetween), we want to help you realise your dream setup.

With the new IKEA gaming range it's easy to create complete, personalised solutions – whatever you need to perform and whatever you think looks fabulous.

New

LÅNESPELARE
neck pillow

99:-

“One of our starting points has been to ensure a simple, graphic design that will last. If the expression gets too much, we tend to outgrow it. You should be able to sit here and work during the day and then transform it into your battle station at night. It should stand the test of time.”

—Jon Karlsson

Designer IKEA

We believe it should be easy for everyone to create the right gaming setup and just as easy to go from game on to game off and back again. Lighting and clever organisation don't only keep you focused, they help to create a versatile solution that works whether it's game time or time for work.

New

UPPSPEL
gaming desk, starts from 4795:-

The best of two worlds

© Inter IKEA Systems B.V. 2021

IKEA and ROG partnering up is the meeting of two worlds and two different design languages. Right from the start, the aim has been to bring out the best in both – and to develop products that neither of us would be able to come up with on our own.

The UPPSPEL height adjustable gaming desk is a great illustration. Here, features such as the V-shape and the cyberpattern that are typical of ROG design language meet great ergonomics and clever functions deriving from the IKEA home furnishing knowledge. **Kommer i januari.**

The desk is every gamer's battlestation, so why not make sure it suits all your needs? **UPPSPEL** gaming desk is versatile not only because you can adjust the height. You can use either side as the front using the V-cut for easy cable management or for a more immersive layout. Also, the desk comes in two sizes – if you go for the large one, you have room for all your gear on top.

You know the game. We help out with the rest.

Being all about the home, we believe that it should be possible for everyone, regardless of where and how you live, to create a great-looking and functional gaming space.

So. Small space? We've got gaming solutions that will fit anywhere and that doesn't make a huge hole in your savings. Sharing space? Try a gaming setup that blends into the home and that doubles as an office space. That way, even an unenlightened flatmate can enjoy it.

Create a better experience for you and your followers with a setup that's uniquely you. Our ergonomically designed furniture, solutions for lighting and sound, and fun add-ons won't just max your gaming performance – they will make you stand out on camera, too.

accessories set
89:-

“We know a lot about gamer needs, pain points and expectations, and we want to design solutions for ultimate, immersive gaming experiences.”

—Johnny Chan
Designer Asus Republic of Gamers

New

LÅNESPELARE
multi-functional
cushion/blanket

249:-

We call it **LÅNESPELARE** cushion/blanket, but really it's a cushion, blanket, and onesie – all in one. Use it when you're on the go, or have it close at hand for when you need a bit of extra support, or warmth, during a game.

“We believe there’s a lot to be done to democratise the gaming experience. Now we take the first step on our gaming journey, and we do it by presenting affordable, high-performing gaming products and complete solutions that we hope reflect people’s personality and taste”.

—Ewa Rychert

Global Business Leader
of Workspace IKEA

Sometimes it’s the smallest things that make the biggest difference. Like **LÅNESPELARE** mug and mug holder that make sure your drink stays where it should be, and that look just right thanks to the cyberpattern designed in collaboration with ROG.
