

# ALL THE HELP YOU NEED TO MAKE YOUR DREAM KITCHEN A REALITY

At IKEA we believe everyone has the right to a new kitchen. So apart from offering a wide range of kitchens we also offer a wide range of services, including measuring, planning and installation. Everything you need to make your dream kitchen a reality.

© Inter IKEA Systems B.V. 2015/2018

Here are some of the services in your local store, if you need an extra hand.

**Measuring service**  
Not confident in your measuring skills? We can help. One of our experienced professionals will come to your home and take all the essential measurements and notes. Then they'll put the information into the IKEA Home Planner so you'll be one step closer to your dream kitchen.

**Planning service**  
If you want some expert advice we have kitchen planners in the store to help.

**Installation service**  
When you buy an IKEA kitchen you can save valuable time with professional installation, especially when it comes to the hard stuff like electricity and carpentry work. You have the choice of complete or partial installation.

**Finance**  
You don't have to pay it all at once. Be kinder on your pocket and enjoy flexible payment at the IKEA stores today. Find out more at [IKEA.co.th/IPP](http://IKEA.co.th/IPP). Or simply inform the cashier that you would like to put your purchases on Installment Payment Plan (IPP).

**Delivery service**  
Our kitchens are designed and packaged so you can take them home yourself. But if you prefer, we can deliver them directly to your home or office.

**Picking and delivery service**  
Tell us what you want to buy, and we can pick it and deliver it for you. How about that? We'll pick the products you want and arrange delivery to your home. All you need to do is place the order. We will handle the rest.

## 4 STEPS TO YOUR NEW KITCHEN Planning guide 2018

# 4 steps to your new kitchen

This brochure is your guide to measuring, planning, ordering and installing your IKEA kitchen. Inside you'll find out what you need and the direction to follow.

## 1 MEASURE IT

## 2 PLAN IT

## 3 ORDER IT

## 4 INSTALL IT

# Here's what you need. Ready for you at your local IKEA store.

GET THE BROCHURE AND GUIDES AT THE STORE OR DOWNLOAD FROM [IKEA.CO.TH](https://www.ikea.co.th)

### Kitchen brochure

Our kitchen brochure is a great source of ideas and inspiration for everything to do with your kitchen. Here you can see some of the thousands of possible combinations you can create with the METOD system, and have a look at the SUNNERSTA mini-kitchen and the affordable KNOXHULT system, too. You can also find out about the services we have to help you get your dream kitchen – we are here to help you every step of the way!

### Installation guide

Our Kitchen Installation Guide gives you tips and information about installing your kitchen right.

### Planning guide

Our planning guide helps you to measure, plan, order and install your IKEA kitchen. Inside you'll find tips and advice to plan your new kitchen.

### Buying guides

See all our cabinets, fronts, organisers, knobs and handles in the METOD Kitchen Buying Guide.

The Worktops, Sinks and Taps Buying Guide gives you all the details about these kitchen essentials.

### IKEA ONLINE

### DESIGN YOUR NEW KITCHEN WITH THE IKEA HOME PLANNER

Use the IKEA Home Planner with your measurements to design, experiment and create your kitchen in 3D. You can find the link in the Kitchen & Appliances section of the IKEA website. The first time you start you'll need to install a plug-in. Just follow the instructions on the "Plan your kitchen" page to get started. If at any stage you need a hand, drop by your local IKEA store and our kitchen experts can help you.

You will find the IKEA home planner at [IKEA.co.th/kitchenplanner](https://www.ikea.co.th/kitchenplanner)

# 1 MEASURE IT

Measuring your kitchen isn't hard to do, but it's important you get it right because your measurements will be the basis for all your planning. Give yourself plenty of time to measure precisely (we've included grid paper to record your dimensions). Here's how you do it.

## MEASURING SERVICE

Almost all kitchen spaces have an awkward corner. But if you measure first, most issues can be sorted out. If you need help measuring, just contact your local IKEA store and we'll help you get the measuring done correctly.

Start by measuring from the floor to the ceiling, then the distance between walls, and from the corners to the doors.

Measure each window and their distance from the floor, the ceiling and the corners of your room. Do the same for the door(s).

Mark down anything that sticks out into the room such as radiators, ventilation shafts and pipes.

Note the position of your drains and water supply. If you are planning to relocate these, mark their new positions.

Measure and note the position of existing power outlets and light switches. Mark where you would like new ones to be.

## My Kitchen Measurements

Be sure to make your measurements in millimetres.  
So your new kitchen fits your space right.

# 2 PLAN IT

Planning your kitchen is when your dreams and ideas take shape. There are lots of things to think about, like where to put the fridge or how many drawers you need. That's why we have tools that'll help you decide. And, if you want some expert advice we have Kitchen Planners ready in the store to help.

## PLANNING SERVICE

If you want some expert advice we have kitchen planners in the store to help.

Think about how you use your kitchen and what feels comfortable for you. Consider what you like about your existing kitchen and what you would change. It can be helpful to make a list of the things you'd like to keep and what you'd like to replace.

Most kitchens work best divided into work zones. These are split into storage (fridge/freezer/pantry), washing (sink/dishwasher) and cooking (oven/cooktop). Work zones give your kitchen a practical structure.

How you position your work zones and the distance between them is often called a working triangle. A good working triangle helps you move quickly and easily from task to task in your kitchen.

The ultimate goal is a kitchen that works for you. Design your kitchen to fit your home and your lifestyle. It's your kitchen after all.

Single-line kitchens are perfect when space is limited. They're simple, streamlined and look great.

Adding an island to your kitchen gives you extra storage, lots of work space plus it's a great social point. Give yourself 120 cm between your island and other cabinets.

Parallel kitchens are great if you have many people cooking at the same time. There is lots of room for food preparation and storage too.

If you have a large room the U-shaped layout is ideal. It gives you maximum space and plenty of storage options.

L-shaped kitchens make the most out of a corner. They're ideal if you want to add a small dining table or kitchen island too.

# Important measurements and things to think about while you're planning.

The best place for preparing food is the work surface between the hob and the sink.

Make sure that the distance between opposite rows of cabinets is wide enough so your doors on both sides can be opened at the same time.

Plan the height of the wall cabinets so that they don't block the view over the worktop.

Make space so you can take hot pans off the hob and put them on a pot stand.

For safety and functionality, mount the extractor hood/fan at the recommended height above the hob. Ask at the store if you have questions.

Keep your utensils and pots and pans near the oven/hob and everything will be at your fingertips.

Placing your hob and oven in separate locations makes cooking more efficient, especially if more than one person is cooking. An elevated oven means you won't have to bend down to reach it.

Place the dishwasher close to the sink and dish drainer to make loading and unloading easier and to avoid spills on the floor.

Finding things in your kitchen is easy when your groceries and utensils are in smooth-running, fully-extendable drawers and pull-out pantry. They give an overview of what's inside and you can reach right in and take things out.

Place a 5 cm filler piece between the cabinet and the wall to ensure there is enough room to open drawers and doors fully. This is especially important if you have pull-out wire baskets and if the wall is not perfectly straight.

Secure the kitchen island with the supporting brackets and fasten it to both the floor and the cabinets.

For an overhang of less than 25 cm, no extra support is needed.

Sinks by windows are nice when washing up. If your windows open inwards however, they can be blocked by the tap.

Placing a sink by a wall or at the end of a row of cabinets disrupts work flow by limiting available workspace.

Placing an oven by the wall disrupts work flow by limiting available workspace, puts your walls at risk from heat and cooking stains.

Positioning appliances like ovens, dishwashers and extractor hoods in corners often blocks cabinets and drawers from opening fully.

# Design your new kitchen with

Use the IKEA Home Planner with your measurements to design, experiment and create your kitchen in 3D. You can find the link in the Kitchen & Appliances section of the IKEA website. The first time you start you'll need to install a plug-in.

# the IKEA Home Planner

Just follow the instructions on the "Plan your kitchen" page to get started.

If at any stage you need a hand, drop by your local IKEA store and our kitchen experts can help you.

## Start here

Begin by clicking on the "Create a profile or login" button. You need to create an account so that you can save your plan, and come back to it wherever you're using the IKEA Home Planner. You'll also need it later on when you're ready to order at your IKEA store.

Before you begin we recommend you take 5-10 minutes to read the planner help. This will give you useful tips to help you use the planner.

Select category

Select product

Plan your kitchen

Work with options

## Print your design with a product list and price

When you're ready you can choose to print either your current view, or all collected views of your design. You can also print out a list of your selected products with price. Just click on the printer icon.

## Fill in your measurements

Use the measurements you've recorded on your grid paper earlier to recreate your room in the planner. You can choose a room layout in the left menu and customise it to your space by adding fixtures, doors and windows. Just select from the menu on the left and click the "Apply" button when you're done.

## Select category

Start by clicking on the Cabinet combinations or Kitchen tab in the left hand menu. Here you can choose what category to work with. You can choose from a selection of products from that category, in the bottom menu. A quick click is all that's needed to drop it into the room.

## Work with options

From the right hand menu, you can work with the options available for the product you've chosen from the bottom menu. Here you can adjust things like the colour and material. Or add extras like handles and knobs.

## Complete your room

Customize your kitchen by choosing wall colour and decorative items. Select from the "Room layout" tab in the left hand menu.

Make sure to record your username and password for accessing the IKEA Home Planner. You'll need them to access your saved design and to take to the store.

# 3 ORDER IT

When you're satisfied with your planning, drop by your local store to visit our kitchen experts. They will go over your kitchen plan with you, and help you with anything you're not sure about. When you're ready you can order and we can help with delivery and other services too.

## Checklist

### You'll need to bring

- ☐ Your kitchen measurements
- ☐ Your IKEA Home Planner log in details

### It's good if you've considered

- ☐ Cabinets, drawers and fronts
- ☐ Doors and handles
- ☐ Worktops
- ☐ Sinks
- ☐ Taps
- ☐ Oven
- ☐ Microwave oven
- ☐ Hob
- ☐ Hood
- ☐ Fridge/freezer
- ☐ Dishwasher

### Think about services too

- ☐ Measure
- ☐ Installation
- ☐ Picking and delivery
- ☐ Delivery

## PICKING AND DELIVERY SERVICE

Tell us what you want to buy, and we can pick it and deliver it for you. How about that? We'll pick the products you want and arrange delivery to your home. All you need to do is place the order. We will handle the rest.

## DELIVERY SERVICE

Most of our products are designed and packaged so that you can take them home yourself. But if you prefer, we can deliver your purchases directly to your home or office.

## FINANCE

You don't have to pay it all at once. Be kinder on your pocket and enjoy flexible payment at the IKEA stores today. Find out more at [IKEA.co.th/ipp](https://www.ikea.co.th/ipp). Or simply inform the cashier that you would like to put your purchases on Installment Payment Plan (IPP).

# 4 INSTALL IT

IKEA kitchens are designed to be installed by you, but we're here to help as much as you'd like along the way. You can start by picking up the kitchen installation guide, which shows you how to do it yourself, step by step. Or check out the different installation services we offer, all performed by our skillful certified kitchen installers.

**The kitchen installation** guide gives you tips and information about installing your kitchen right.

## INSTALLATION

We'll install your new kitchen for you and coordinate the job from start to finish. Before installation begins we do a final check that the order is right and the measurements correct. Professional kitchen installers will handle all those time-consuming jobs like fitting sinks, taps, and laminate and wooden worktops. Your kitchen will be installed to the highest industry standards.

## OUR COMPLETE INSTALLATION SERVICE INCLUDES:

- All cabinets assembled and installed
- Installation of laminate and wooden worktops, including cut-outs for the sink/hob
- Installation and connection of sink, tap, and IKEA worktop lighting
- Installation of side panels, handles and interior fittings (shelves, baskets, etc.)

*Talk to your local IKEA store for details. Charges apply.*
