1. Before use, ensure the dryer is empty of any obstructions or debris.

2. Insert the double-sided hanger into the dryer's drying cavity. Make sure the hanger is securely fixed in place.

3. Position the cloth to be dried on the hanger, ensuring it is evenly distributed and not too tight. This will help in achieving a better drying result.

4. Start the drying process according to the manufacturer's instructions. Monitor the drying cycle to avoid over-drying the cloth.
