WALL ANCHORING GUIDE:

The hardware you should use to secure your furniture to the wall depends on both the type of furniture you have and your wall material.

Type of Wall Material:

Using the guide below, identify your wall material and the appropriate steps to take for that wall material.

Drywall or plaster with available wood stud:

- Mark the attachment point(s) with a pencil at the appropriate height and positioned over wood stud(s).
- Drill 1/8-inch (3mm) diameter pilot hole(s) into the wood stud(s), at the height you marked with pencil.

Drywall without available wood stud:

- Mark the attachment point(s) with a pencil at the appropriate height.
- Drill 5/16-inch (8mm) diameter hole(s) through the wall at the height you marked with pencil.
- Drive the plastic plug(s) into the hole(s), using a hammer if needed.

Masonry:

- Mark the attachment point(s) with a pencil at the appropriate height.
- Drill 5/16-inch (8mm) diameter hole(s) 2 and 3/4-inches (70mm) deep into the wall at the height you marked with pencil.
- Drive the plastic plug(s) into the hole(s), using a hammer if needed.

If your wall material is not listed here, or if you have any questions, consult your local hardware store.

INSTRUCTIONS POUR FIXATION AU MUR :

Le choix des fixations à utiliser pour fixer votre meuble au mur dépend du type de meuble et du matériau du mur.

Matériau du mur :

le guide ci-dessous vous permet d'identifier le matériau de votre mur pour savoir comment procéder.

Cloison en plâtre avec montants en bois :

- Marquer le(s) point(s) de fixation à l'aide d'un crayon à la hauteur désirée sur le mur, en le(s) alignant sur le montant.
- Percer un(des) trou(s) pilote(s) de 3 mm (1/8 inch) de diamètre dans le(s) montant(s) en bois, à la hauteur marquée au crayon.

Cloison en plâtre sans montant en bois :

- Marquer le(s) point(s) de fixation à l'aide d'un crayon à la hauteur désirée.
- Percer dans le mur un(des) trou(s) de 8 mm (5/16 inch) de diamètre à la hauteur marquée au crayon.
- Insérer la(les) cheville(s) en plastique à l'intérieur du(des) trous. Utiliser un marteau si nécessaire.

Mur en maçonnerie :

- Marquer le(s) point(s) de fixation à l'aide d'un crayon à la hauteur désirée.
- Percer un trou de 8 mm (5/16") de diamètre et de 70 mm (2 3/4") de profondeur dans le mur à la hauteur marquée au crayon.
- Insérer la(les) cheville(s) en plastique à l'intérieur du(des) trous. Utiliser un marteau si nécessaire.

Si le matériau de votre mur ne figure pas dans la liste, ou si vous avez des questions, adressez-vous à votre fournisseur local.

INSTRUCCIONES PARA LA SUJECIÓN A LA PARED:

Elige los accesorios a utilizar para fijar el mueble a la pared en función del tipo de mueble y del material de la pared.

Material de la pared:

consulta la siguiente guía para identificar el material con el que está hecha la pared y las correspondientes instrucciones.

Pared de pladur o yeso con posibilidad de sujeción a la estructura portante de madera:

- Con un lápiz, indica el punto (o los puntos) de sujeción a la altura adecuada en correspondencia con la estructura portante de madera.
- Con un taladro, haz un agujero de 3 mm (1/8") de diámetro en los elementos portantes de madera siguiendo las marcas hechas a lápiz.

Pared de pladur sin sujeción a la estructura portante de madera:

- Con un lápiz, indica el punto (o los puntos) de sujeción a la altura adecuada.
- Con un taladro, haz uno o varios agujeros de 8 mm (5/16") de diámetro en la pared siguiendo las marcas hechas a lápiz.
- Introduce los tacos de plástico en los agujeros con la ayuda de un martillo.

Pared de obra:

- Con un lápiz, indica el punto (o los puntos) de sujeción a la altura adecuada.
- Con un taladro, haz uno o varios agujeros de 8 mm (5/16") de diámetro y de 70 mm (3/4") en la pared siguiendo las marcas hechas a lápiz.
- Introduce los tacos de plástico en los agujeros con la ayuda de un martillo.

Si el material con el que está hecha la pared no aparece aquí, o si tienes alguna pregunta, consulta en la ferretería más cercana.
