### **ENGLISH**

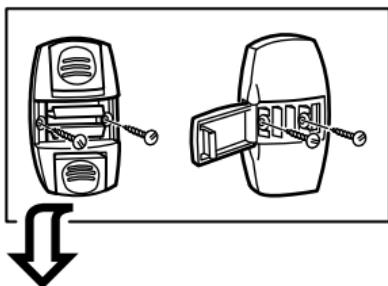

For maximum adhesion, leave the tape to harden for 24 hours.

### **FRANÇAIS**

Pour une adhésion optimale, laisser le ruban durcir pendant 24 heures.

### **ESPAÑOL**

Para que se adhiera perfectamente, deja que la cinta se endurezca durante 24 horas.

## **ENGLISH**

If the underlying surface is uneven, you must secure the lock by screwing it into place. Use screws which are suitable for the material in which they are to be fixed.

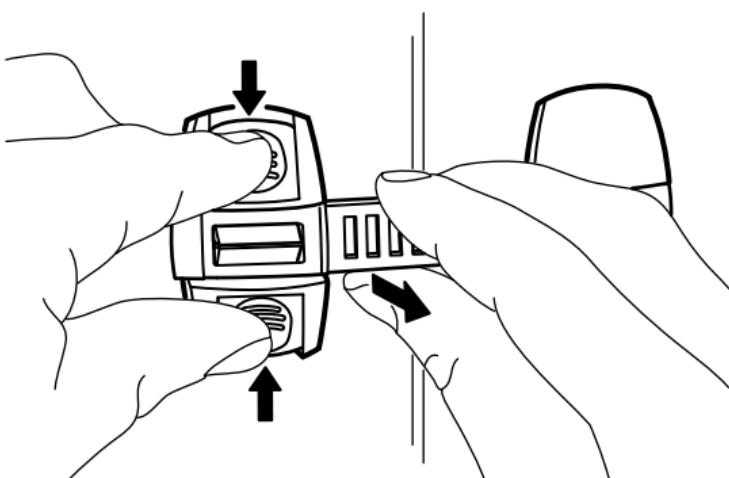

## **FRANÇAIS**

Si la surface du support est irrégulière, la serrure doit être fixée à l'aide de vis. Utiliser des vis adaptées au matériau dans lequel elles seront fixées.

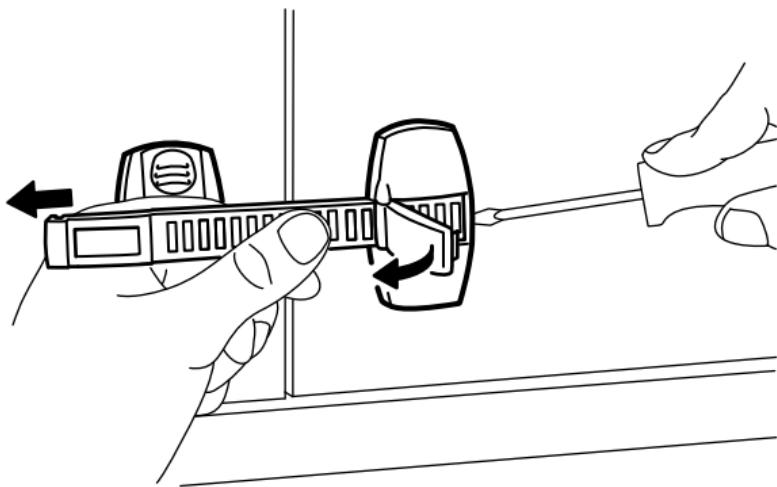

## **ESPAÑOL**

Si la superficie subyacente es irregular, debes asegurar el cierre atornillándolo en su sitio. Usa tornillos que sean adecuados para el material en que vas a instalarlo.
