## Bathroom series

### Safety

Secure It! Prevent tip-over injury. Furniture with included restraints must be secured to the wall according to the assembly instructions.

Furniture must be attached to the wall with the enclosed wall fastener. Different wall materials require different types of hardware. Use hardware (sold separately) suitable for the walls in your home.

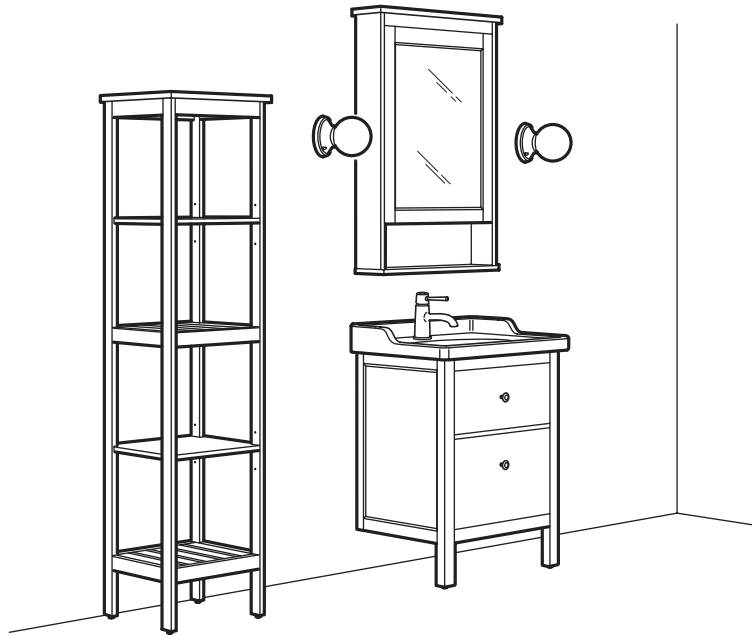

### Care and cleaning

Wipe furniture clean with a cloth dampened in water or a nonabrasive detergent, then wipe dry with a clean cloth.

The sink and faucet should be wiped clean with a cloth dampened in water or a nonabrasive detergent.

Sinks in ceramic are resistant to most chemicals, except for strong acids and strong alkalis.

Sinks made of crushed marble should not come in contact with ammonia, acids, strong detergents, hair dye or chlorine.

### Genuine character that lasts

HEMNES bathroom furniture has a straightforward, crafted look with Scandinavian appeal and modern function. The series includes sinks, mirrors, cabinets and shelving, in different dimensions, to make your bathroom functional and comfortable no matter the size. To enhance the traditional look and your own unique style, choose between a turn-of-the-century-inspired sink with raised edges or an eye-catching solution with round countertop bowl.

A high standard of accuracy has been sought in the preparation of this buying guide. We apologize for, but will not be bound by or responsible for, errors and omissions in this buying guide.

# How to plan

## What do you want to store?

Start by thinking about the storage needs you have in your bathroom. How many people use the bathroom and when are the busiest times. Based on this and the size of the room, you can plan how many storage units will best suit your needs. Think about the wall space you have available for a sink cabinet, since this is the heart of most bathroom activities. The HEMNES series comprises cabinets of different sizes and storage capacities. The drawers in HEMNES cabinet are smooth running and pull out fully so you can easily see and reach what's inside. Pull-out stops prevent the drawers from being pulled out too far and falling, which is especially practical if you have children.

## Choose the expression

You can choose between open and closed cabinets depending on your storage needs and preferences in your bathroom. At IKEA, you'll find different cabinet sizes and you can choose a single or double sink, depending on your needs and space.

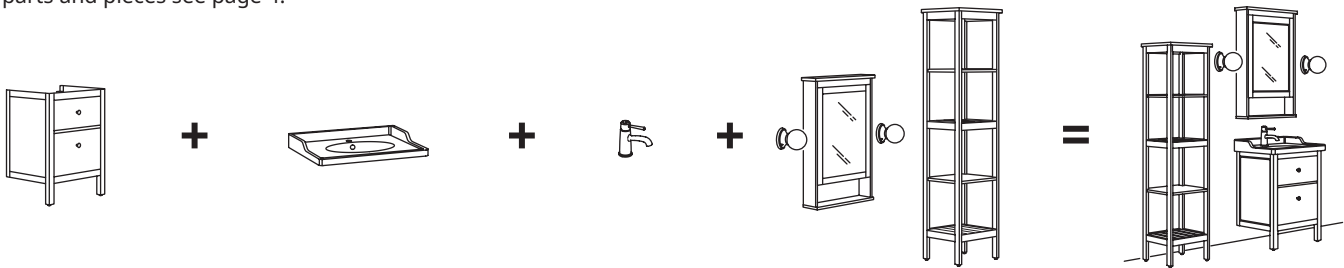

The sinks that are suitable for HEMNES are made in ceramic, which have a glazed finish and are easy to clean. If you choose a HEMNES open cabinet, combine it with a countertop sink for the best functionality and looks. All sinks come with a water trap and strainer. The water trap is flexible and can be connected to both washing machines and dishwashers.

You can find a wide selection of bath faucets at IKEA. Make your choice based on function and design. All faucets at IKEA have a flow regulator that uses less water but ensures that the water flow feels the same.

The last thing to decide is what to put above and around your sink cabinet: mirror cabinet, high cabinet with mirror door, shelving unit, bench. The combination possibilities are endless. Make your choice based on your bathroom storage needs and space.

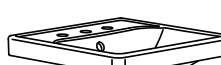

# How to combine

Here is a little guide to explain how you can put together your very own HEMNES bathroom solution. For all the parts and pieces see page 4.
