Buying guide

BETYDLIG/RÄCKA/HUGAD

Window hardware

Parts

Wall/ceiling bracket
Curtain rod holder
Curtain rod
Finial

Simple, functional and beautiful
We all have different needs and preferences when it comes to dressing the windows in our home. But no matter if you are creating 1-, 2- or 3-layer solutions you will need hardware like curtain rods, brackets, curtain rod holders and finials.

Our rods come in different colors and diameters so you can pick your favorite that is also suitable for the curtain weight. RÄCKA curtain rod has a smaller diameter than HUGAD curtain rod, but both are extendable so you can adapt them to the width of your window.

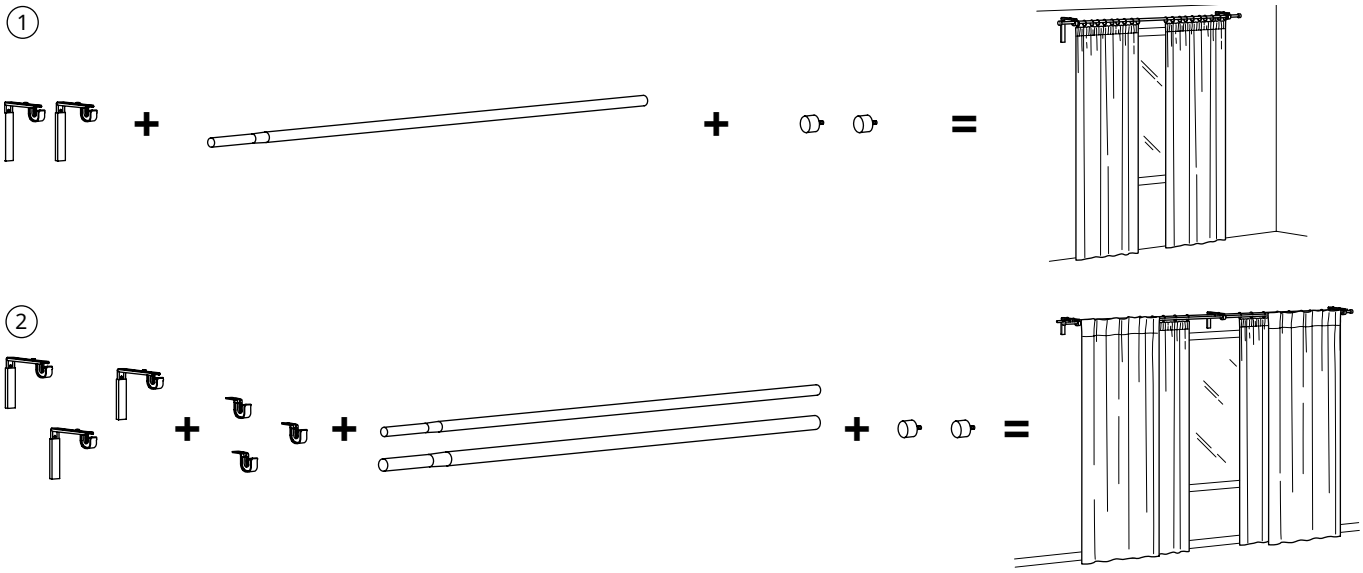

BETYDLIG brackets and curtain rod holders also come in different colors to coordinate with the rod of your choice. They can be either ceiling or wall mounted depending on the look you prefer, the impression you want to create in the room as well as the desired function and distance from the windows.

The finials are that small but important detail that add the final touch. Our finials are interchangeable so you can pick your favorite now and change them as often as you like when it is time for a refresh.

A high standard of accuracy has been sought in the preparation of this buying guide. We apologize for, but will not be bound by or responsible for, errors and omissions in this buying guide.

Not all products may be available in all stores. See what is available at your local store by visiting IKEA-USA.com. For more detailed product information, see the price tag or visit IKEA-USA.com. All products shown require assembly. All textiles shown are imported.

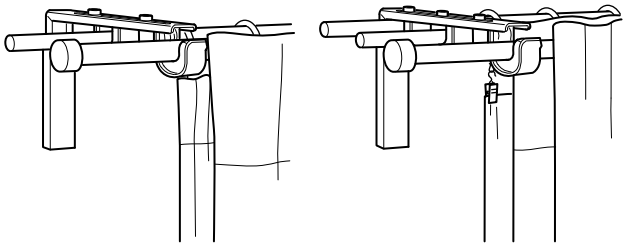

How to build

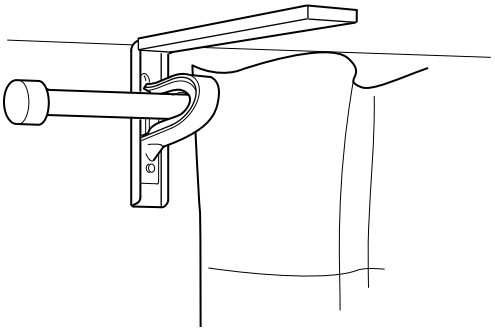

1. The brackets can be mounted on the wall or the ceiling. And the position of the curtain rod holder can be adjusted, allowing curtains to be hung either close to the window or farther out. The curtain rods come in two diameters, three lengths and three colors. All are extendable in length. You can complete the expression easily with finials from the IKEA range.

2. To create a layered solution, you just need to buy extra rod holders and mount them on the brackets. Then add extra curtain rods.

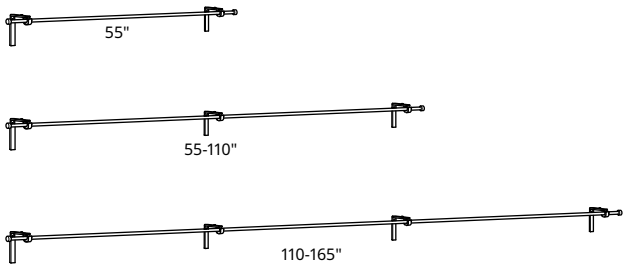

Good to know

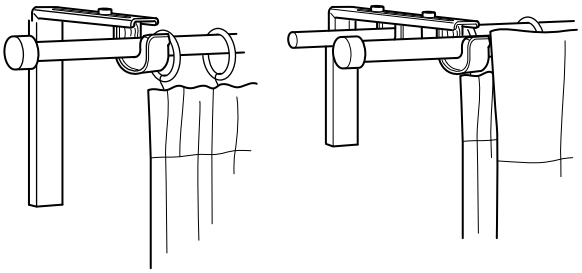

BETYDLIG brackets are L-shaped and can be attached so the arm becomes longer or shorter, allowing you to adapt the distance between the curtain and window. When the brackets are wall mounted, a longer arm enables up to three curtain rod holders, so you can create multiple layers. A shorter arm holds a maximum of two rod holders.

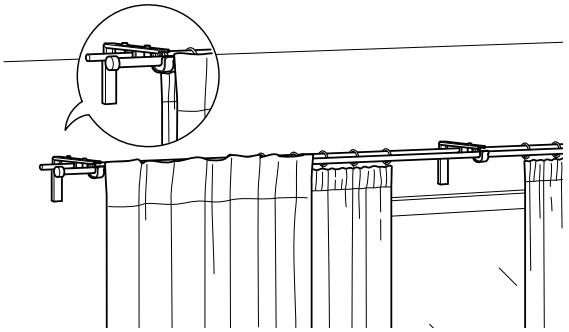

When the brackets are ceiling mounted, you can choose any arm length to adapt the distance between the curtain and window, but you can only mount one curtain rod holder.

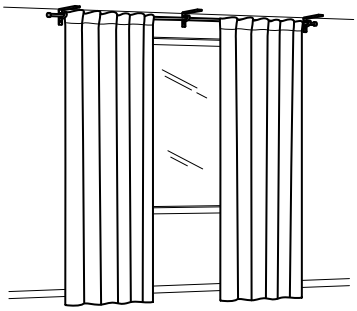

The maximum length between two brackets is 55". If your solution is longer, add a bracket for every 55". This means use three brackets for curtain rods 55-110"; and four brackets for rods between 110-165". "

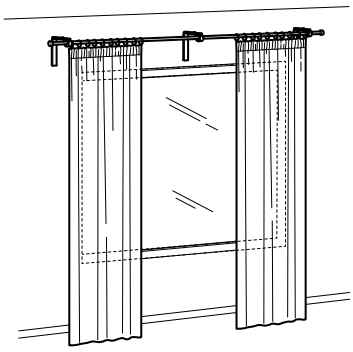

The curtain rods come in two diameters (¾" and 1⅛") and are available in different lengths and colors. All are extendable in length. You can complete the expression with interchangeable finials from the IKEA range.

Extra curtain rods and curtain rod holders are required to create a layered solution, sold separately.

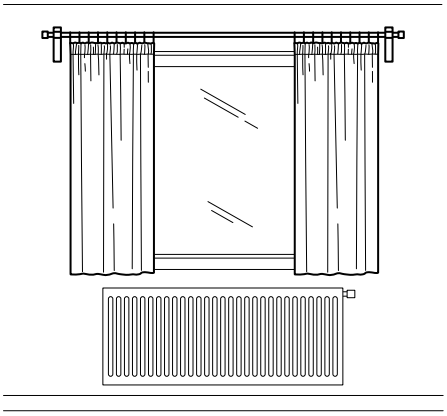

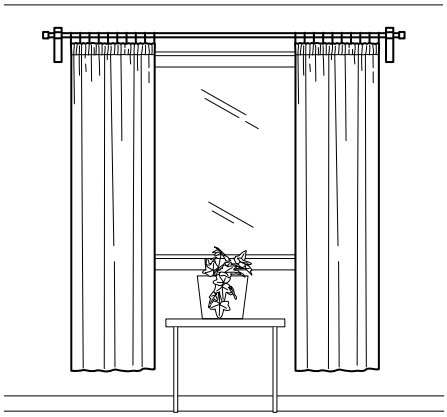

BETYDLIG brackets and curtain rod holders carry maximum 22 lbs when placed 55" apart and the weight of the curtain is evenly distributed over the curtain rod.

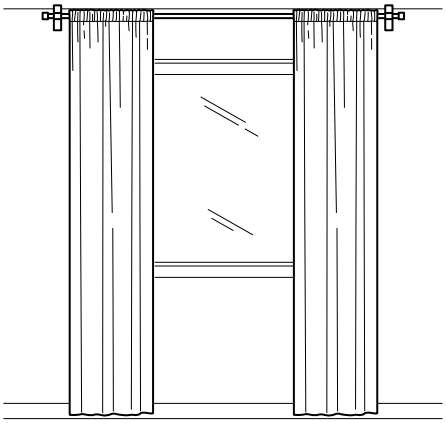

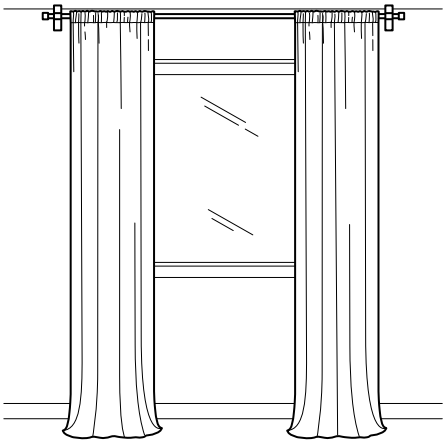

RÄCKA curtain rod holds up to 11 lbs of curtain weight and HUGAD curtain rod holds up to 22 lbs when placed 55" apart. Always check the maximum load of your curtain rod to secure that it can bear the weight of the curtain.

How to measure and plan your curtain solution

Step 1
Consider the length of your curtain.

Do you prefer window sill length, apron length, floor length or do you want your curtains to softly pool on the floor?

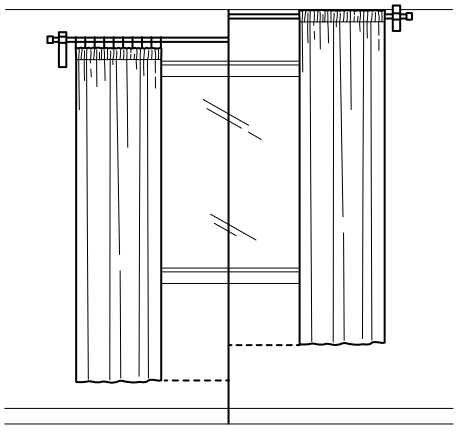

Step 2
Decide on ceiling-mounted or wall-mounted.

Take a good look at your window, its opening and if there is a window sill, radiator, plants or furniture placement to take into account.

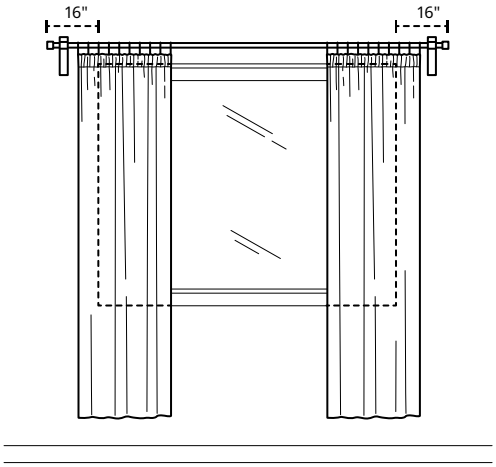

Choose whether you wish to hang curtain rods directly from the ceiling or on the wall. This will determine the curtain length.

- Ceiling-mounted offers better sound absorption, isulation and make the room appear larger.
- Wall-mounted solutions are usually placed about 6" above the window. But it is really up to you decide the height.

Plan a distance of about 5-6" between the curtain and the window/wall, so it does not obstruct the window when pulled to the side

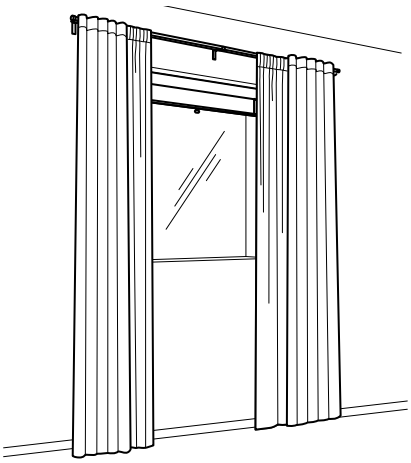

How to measure and plan your curtain solution

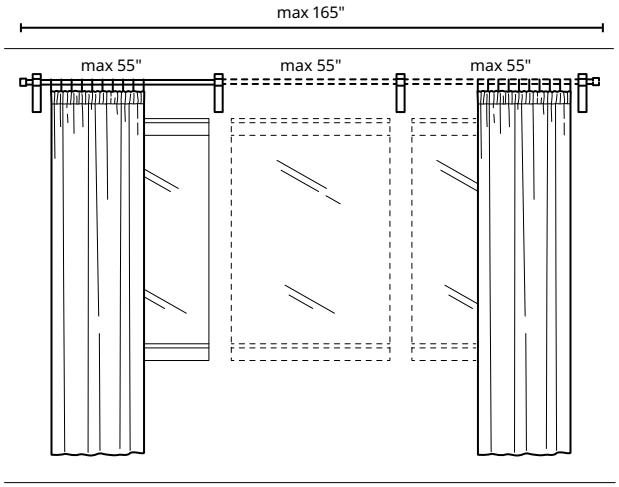

Step 3
Calculate the width of your curtain rod or rail.

Measure the width of the window. For fabric curtains, add at least 6" on each side so they cover the entire window, and allow the curtains to open fully.

Tip:

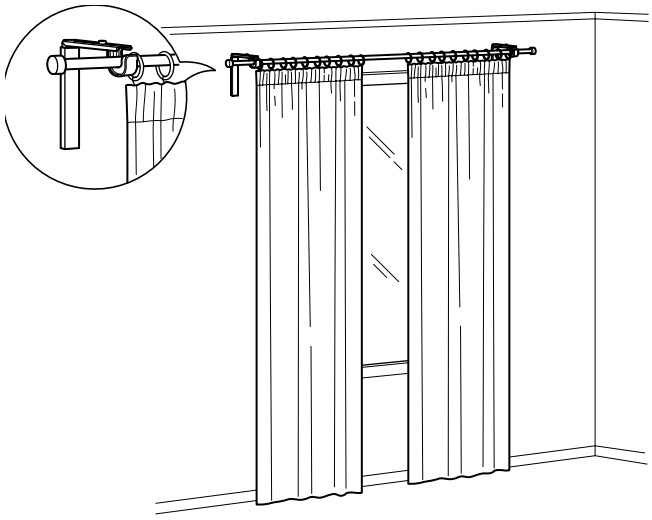

Are you combining curtains with roller blinds? Add a few centimeters to the width, so the curtains are wider than the blinds.

Step 4
Calculate the number of brackets.

Rules for a stable rod or rail.:
- Use two brackets for curtain rods or rails up to 55".
- Use three brackets for curtain rods or rails between 55" and 110".
- Use four brackets for curtain rods or tracks longer than 110".

Combinations

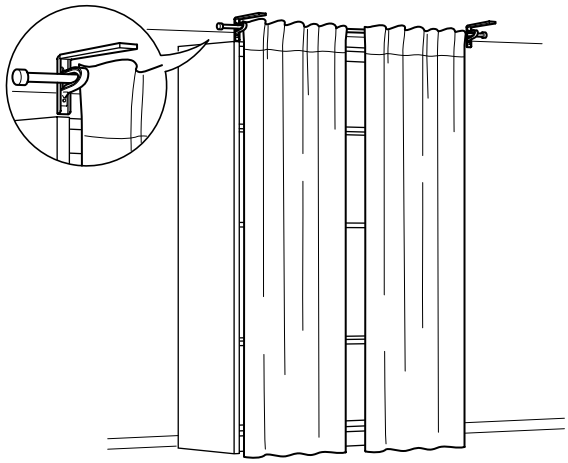

A single window, for example 52", with a single-layer solution.

Window hardware

RÄCKA Curtain rod 47-83" Black	302.171.59	1 pc
BETYDLIG Wall/ceiling bracket Black	602.172.28	2 pcs
RAFFIG Finials 2pcs/pack Black	202.199.36	1 pc

This combination
(Curtains and hanging accessories are not included.)

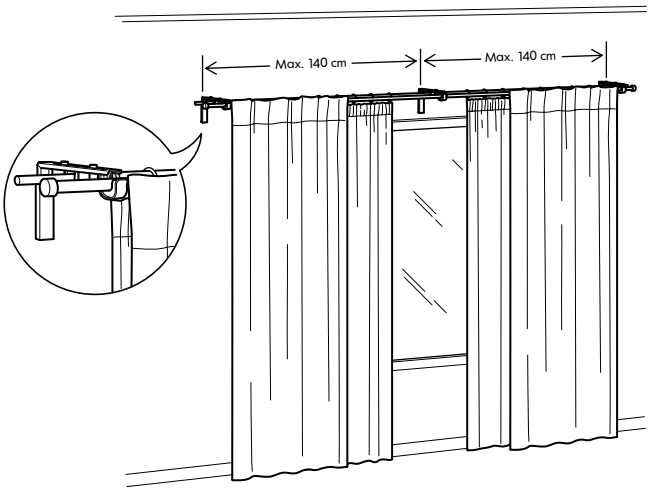

To cover an open storage solution. The brackets can be mounted on the ceiling.
