Hangs in every way

VIDGA curtain hanging system gives you lots of possibilities to hang curtains. Hang them in front of windows and niches, or use them as room dividers, sliding doors or around a bed. If you hang curtains in layers you can not only combine colors, patterns and materials in your own personal way, but also dampen sound, adjust light and control temperature in the room more effectively. You can connect several rails together to create one long rail, or shorten them to the desired length with a hacksaw. Mount the rail to walls or ceilings using VIDGA wall or ceiling brackets or use VIDGA corner pieces to mount rails around corners.

Online planning

Put your creativity to work and create your own combination. Our easy-to-use planners help you try out different ideas to find what’s best for you.

The planners tell you how much your combination will cost. It creates a list of the products you need, so you don’t forget anything at the store. It also checks if what you need is available before you go. The planners even help you buy your products directly online.

**HOW TO PLAN**

Planning is never easy, but getting to know VIDGA is.

**You start with one rail and two brackets.**

- The ceiling brackets allow you to mount the rail to the ceiling – a great solution if you would like to hang the curtains away from a windowsill that protrudes.
- The short wall brackets allow you to hang the curtains very close to the wall so the light doesn’t sneak in from the sides.
- The long wall brackets can hold multiple parallel rails so you can hang layers of curtains.

**Have a wider window? We have a solution for you.**

- Start with one rail and two brackets.
- Too short? Add one rail and one bracket (to your existing one rail and two brackets).
- Still not long enough? Continue to add more rails and brackets as needed (to your starting one rail and two brackets).

You can also cut the rail to your specific measurements for an exact fit on any window.
**HOW TO PLAN**

Want a solution to hang two layers of curtains? Or even three? The long wall bracket enables you to do just that.

One single track rail and two long wall brackets (L4¾") to start with.

Add one single track rail, no extra brackets needed.

2. The height.
This determines the length of your curtains or panel curtains.
Measure from the top of the window frame and stop where you want your curtains or panel curtains to end. As a rule of thumb, add 6" to the measurement to mount the curtain rod or track rail 6" above the window frame to create a visual appearance that the ceiling is higher.
Allow for any shrinkage of the curtains after washing.

HOW TO MEASURE YOUR WINDOW

1. The width.
This determines the width of your curtain rod or track rail.
Measure the width of the window. Add at least 6" on each side to the measurement to allow the curtains to cover the window properly and open completely.
