HOW TO PLAN

PLANNING OR UPDATING YOUR KITCHEN?

No kitchen is complete without good, functional lighting. That's why it's a good idea to include lighting when you're planning, buying and installing your kitchen. Preplanning makes it easier to install all lighting components and SMART features, saving you lots of time and effort. But what if you just want to improve the lighting in your current kitchen? Don't worry, we have solutions for that, too! Remember that all kitchens are different — plan for your own needs!

Start by deciding where you want lighting in the kitchen. Then decide which lighting will suit you and your kitchen best. Start by choosing your preferred countertop lighting. Then add spotlights, cabinet lights and drawer lights.

Check out our example below:

Countertop lights

At IKEA, we have three integrated lighting series — MITTLED, STRÖMLINJE and SLAGSIDA. All give you task lighting, mood lighting and are dimmable. You save energy too, since these series use LED, which consume 85% less energy and last up to 20 times longer than a regular incandescent bulb.

Use: MITTLED, STRÖMLINJE and SLAGSIDA.

Spotlights and cabinet lights

Spotlights are a decorative and functional choice for wall cabinets with glass doors. They make it easy to look inside your cabinets and brighten up your kitchen at the same time.

Cabinet lighting is so easy to choose since it comes in different versions to match both modern and traditional styles.

Use: MITTLED, URSHULT, LINDSHULT and MAGLEHULT.

Drawer lights

MITTLED drawer lights switch on and off as you open and close your drawers. No more hide and seek with your kitchen equipment!

Use: MITTLED.

STRÖMLINJE and MITTLED

When installing both cabinet AND drawer lighting, buy a separate TRÅDFRI LED driver for your drawer lighting system. It will be easier to install. Add ANSLUTA intermediate connection cord if you have more than 1 driver.

****NOTE:** Do not pair the driver for drawer lights with your other kitchen lights as it can turn off the functionality of the lights.

HOW TO CHOOSE A TRÅDFRI LED DRIVER

1. 10W, LED driver with three connection sockets.
2. 30W, LED driver with nine connection sockets.
3. ANSLUTA intermediate connection cords
4. ANSLUTA power cord

There are two TRÅDFRI LED drivers. Choose based on how many units you want to connect. You can connect up to three units to the 10W LED driver, as long as the total wattage does not exceed 10W. The 30W LED driver can support up to nine units, max. wattage 30W. You can connect up to 10 drivers in one installation cord. Flashing lights indicate that the maximum wattage of the LED driver is exceeded. If you want to use more

than one LED driver, make sure to synchronize each LED driver with the TRÅDFRI remote control so that the entire combination can be dimmed at the same time. Make your cabinet lighting smart by adding the TRÅDFRI gateway. With the gateway, you can control your lights from the IKEA Home Smart app and create a mood together with your other TRÅDFRI lighting.
