REFRIGERATORS

Smart cooling. Less waste.

Efficient cooling is a cornerstone of a sustainable kitchen. The better your fridge and freezer work, the less food you will waste. Most of our refrigerators are ENERGY STAR® rated and packed with smart functions that will keep your food fresher, longer. For example: fan cooling which ensures an even and consistent temperature, fast freeze option that quickly freezes large amounts of food or ice makers which really come in handy when you're hosting a party. Choose from top mount, bottom mount/french door or maybe a compact refrigerator for a smaller or additional space in your home.

5

Whatever your choice, you can be sure your appliance is made to last. Our appliance range comes with a free 5-year limited warranty (except LAGAN and TILLREDA). See page 66 for details.

HUMIDITY CONTROLLED CRISPERS You can preserve the freshness of fruits and vegetables by just adjusting the humidity scale. The integrated air purifying system will also help to reduce food odors.

SPACIOUS STORAGE AND LEDS Our refrigerators offer plenty of storage both in the fridge and the freezer drawer. Adjustable shelves, multiple crispers and built-in door shelving let you arrange your food just the way you like. And, with integrated LEDs that light up every corner, you'll be able to see (and find) everything you've packed in — even that jar of pickles in the back.

OVENS

Our ovens are built-in, fitting perfectly in both base and high kitchen cabinets. You can place them exactly where you want them in your kitchen, making the most of your space and creating the perfect workflow for you.

They come with a wide range of smart functions ready to help with anything from a simple snack to a gourmet meal. If you're looking for advanced cooking or convenient self-cleaning programs, we've got you covered.

Safety

Of course, quality and functions are top of mind when we design our ovens, but we think about safety too. They have quadruple-glazed doors so you can touch them at any temperature setting, and a child lock for the little ones.

TRUE CONVECTION A fan spreads preheated air evenly throughout the oven which means you can cook different dishes at the same time without sharing flavors.

LARGE OVENS & MULTIPLE RACKS The insides of our ovens have generous dimensions and several racks so you have enough space for lots of different dishes at once (or several trays of the same delicious treat).

COOKTOPS

We have a variety of cooktops to choose from, so you can find the one that suits the way you cook. Each type — gas, glass ceramic and induction — has its own unique benefits and features. So, whether you're an ambitious home chef or more of a quick and low maintenance cook, we have a cooktop that's right for you. Check out the descriptions on the facing page for benefits of each type of cooktop we offer.

5

Whatever your choice, you can be sure your appliance is made to last. Our appliance range comes with a free 5-year limited warranty (except LAGAN and TILLREDA). See page 66 for details.

GLASS CERAMIC Practical and easy to clean, most of our glass ceramic cooktops have variable cooking zones that provide even and effective heating adapted to the shape and size of your cookware.

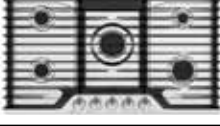

GAS The blue flames of gas cooktops are more than a professional-looking feature, they give you quick, responsive heat control, perfect for fast, fresh cooking.

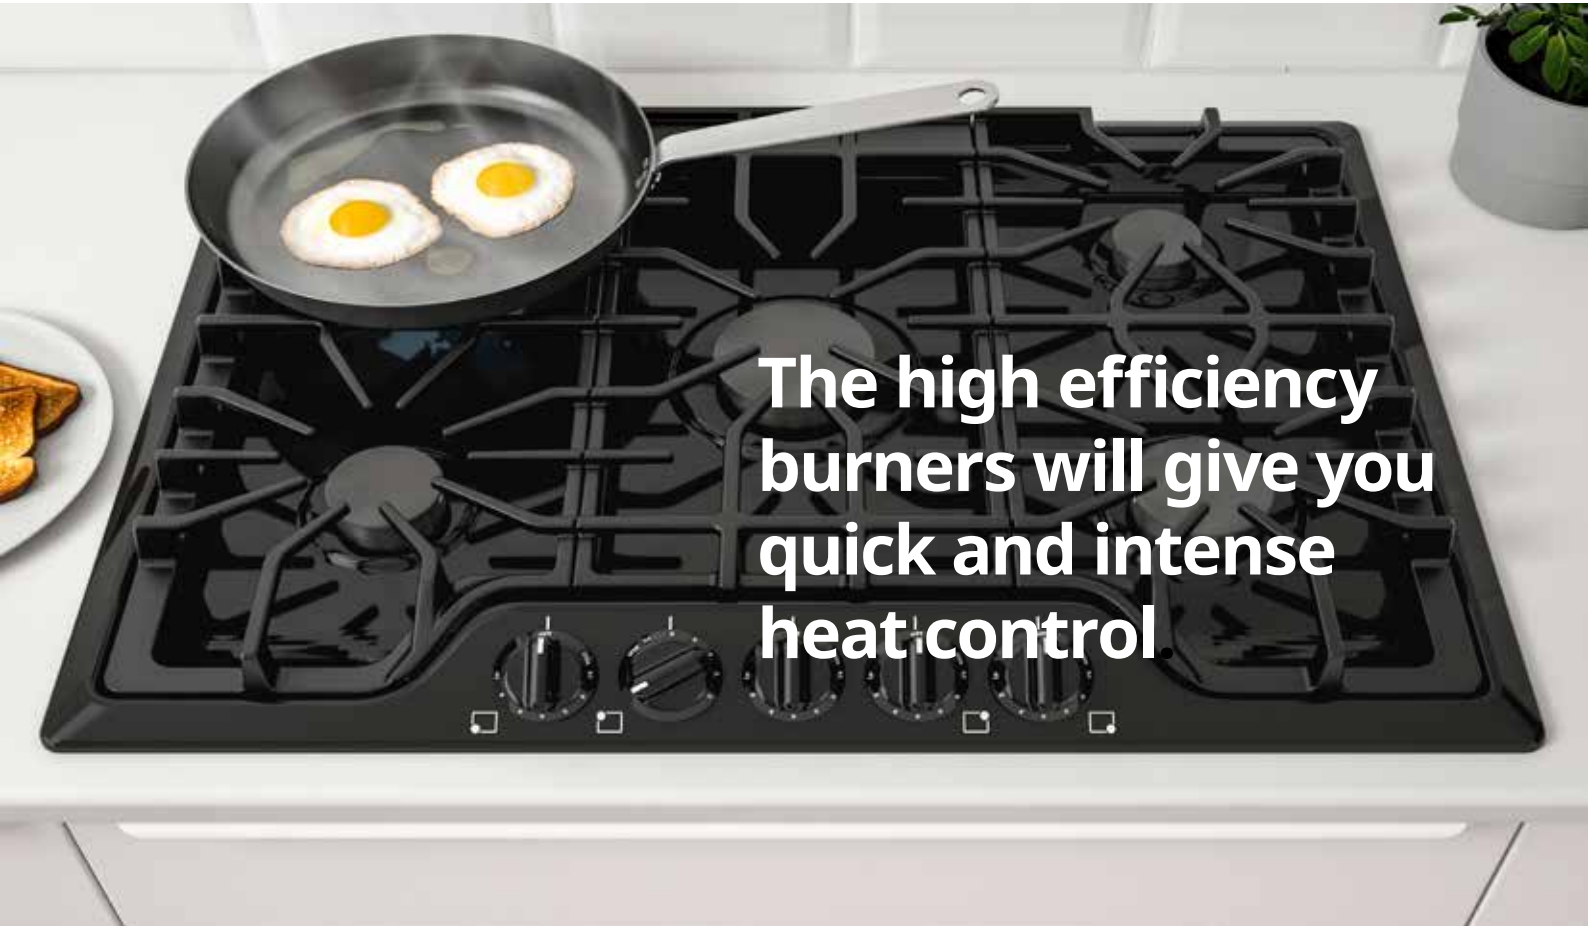

INDUCTION Cooktops are extremely energy efficient, fast and precise as induction technology transfers energy directly into magnetic cookware. They are easy to clean as the induction surface generates heat only to your pan, not your cooktop. This means spills won't burn onto the surface as easily.

RANGE HOODS

Not only does a range hood keep the kitchen free of steam, grease and cooking smells, it's also an important design element.

Whether you're looking for a ceiling-mounted range hood for over a kitchen island or a wall-mounted model, we've got you covered. Our hoods come in a range of extraction capacities, so you can be sure to get one with the right amount of muscle to keep your kitchen fresh.

5

Whatever your choice, you can be sure your appliance is made to last. Our appliance range comes with a free 5-year limited warranty (except LAGAN and TILLREDA). See page 66 for details.

WALL-MOUNTED These hoods are design features, so we offer a variety of shapes and finishes. That way, you can find the right one to boost your kitchen's style.

BUILT-IN Hide your range hood with a built-in model. It's completely integrated with your kitchen cabinets so you get a streamlined and uniform look.

STYLE AND SIZE A range hood can make a big style statement, whether you pick one that's similar to your other appliances or go for something different to create a casual, eclectic look. Whatever you choose, be sure you get a hood that covers your cooking area (or even a little more) to ensure ideal performance.

SOUND LEVELS

Sound levels for range hoods are measured in sones. Our appliances have been tested to determine and measure this. For range hoods the operating speed or installation type can influence sound levels. All our hoods are HVI (Home Ventilating Institute) certified to ensure that accurate and efficient ventilating standards are met. Compare and chose the hood that is suitable for your needs and comfort.

DISHWASHERS

Using a dishwasher is more water and energy efficient than washing dishes by hand. And, with sterilizing functions, it's more hygienic too. We offer both built-in and fully-integrated models, but whichever you choose you'll get a tall interior space that'll fit oversized dishware and large loads.

All of our dishwashers are ENERGY STAR® rated and come with a free limited warranty.

5

Whatever your choice, you can be sure your appliance is made to last. Our appliance range comes with a free 5-year limited warranty (except LAGAN and TILLREDA). See page 66 for details.

WATER EFFICIENT Lots of dishes will be sparkling clean with just a small amount of water. Using your dishwasher is much more water efficient than washing dishes by hand.

SMART SORTING Our flatware baskets let you stand utensils up, ensuring they're thoroughly cleaned. Once the wash is done, they're easier to sort and put away too.

BUILT-IN Installation is easy with a built-in dishwasher. They're sized to slide right in under your countertop.

INTEGRATED Our fully-integrated dishwashers can hide behind a front that matches the rest of your kitchen doors, giving you a completely uniform look.

SOUND LEVELS

Sound levels for dishwashers are measured in decibels (dBA). Our appliances have been tested to determine and measure this. For dishwashers the operating program or installation type can influence sound levels. Decibel levels are listed in the

product information. Compare decibel levels and choose the dishwasher that’s suitable for your needs and comfort. Look for the decibel (dBA) level of an appliance listed in the product information.

How long is the IKEA limited warranty valid?

This limited warranty is valid for five (5) years from the date of purchase. TILLREDA and LAGAN appliances have a two (2) year warranty, valid from the original date of purchase. When this major appliance is operated and maintained according to instructions for use attached to or furnished with the product.

This limited warranty is valid only in the United States and applies only when the major appliance is used in the country in which it was purchased. Outside the 50 states of the United States, this limited warranty does not apply.

Proof of original purchase date is required to obtain service under this limited warranty.

What does this limited warranty cover?

The limited warranty will pay for factory specified parts and repair labor to correct defects in materials or workmanship that existed when the major appliance was purchased. The exceptions are specified under the headline “What is not covered under this limited warranty?”

Which major appliances are not covered by the IKEA five (5) year limited warranty?

For major appliances named “TILLREDA” or “LAGAN”, a limited warranty is valid for two (2) years from the date of purchase.

What will be done to correct the problem?

If considered covered, the designated service company will then repair the defect. Your sole and exclusive remedy under this limited warranty shall be product repair as provided herein.

Who will execute the service?

The designated service company will provide the service through its own service operations or authorized service partner network.

- The cost of repair or replacement under these excluded circumstances shall be borne by the customer.

Disclaimer of Implied Warranties

IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO FIVE YEARS (TWO YEARS FOR MAJOR APPLIANCES NAMED “TILLREDA OR LAGAN”) OR THE SHORTEST PERIOD ALLOWED BY LAW. Some states do not allow limitations on the duration of implied warranties of merchantability or fitness, so this limitation may not apply to you. This warranty gives you specific legal rights, and you also may have other rights that vary from state to state.

Limitation of Remedies; Exclusion of Incidental and Consequential Damages

YOUR SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. THE DESIGNATED SERVICE COMPANY SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, so these limitations and exclusions may not apply to you. This warranty gives you specific legal rights, and you also may have other rights that vary from state to state.

Care instructions

All appliances are designed for residential/home use only.

To ensure maximum performance, read and follow the Instructions for use that accompany your new appliance. It is also important to follow the health and safety instructions, which, for instance, recommend that there are always two people to carry/ move heavy appliances.

Be sure there is a socket outlet near the appliance. Never use an extension cord.

We strongly recommend that you ensure correct and safe installation by hiring a professional plumber and/or electrician whenever relevant. If problems should arise due to incorrect installation, the limited warranty will not apply.

Respect the environment by disposing of the packaging properly. Keep packaging such as large plastic bags out of the reach of children.

Always keep your appliances clean. Use only those cleaning products recommended in the instructions for use. For example, never use abrasive scouring pads as they may scratch or damage surfaces.

Be sure to use products intended for use with your appliances. For example, be sure to use microwave safe porcelain, oven safe dishes, freezer safe food savers and pots and pans made of a suitable material.

Read more in the Instructions for Use that comes with the products.

Ovens

- All ovens require a qualified installer.
- Before you use the oven for the first time, follow instructions to eliminate any odor and remove stickers, etc.
- For ordinary cleaning, use water and a mild detergent. Avoid abrasive cleaning products.
- Do not hang towels on the oven handle while the oven is in use.

Cooktops

- All cooktops require a qualified installer.
- Use only non-abrasive cleaning products. Avoid scouring powder, steel wool, hard or sharp objects that can scratch the surface.
- For both gas and electric cooktops: save energy by using pots and pans with a base diameter equal to, or slightly larger than, the diameter of the burner.
- If you are using LPG bottled gas, you must replace the gas injectors with the available LPG gas kit.
- For gas cooktops: fit the rubber seal properly. It prevents water leakage, which may damage the countertop.
- For induction cooktops: use only pots and pans with a magnetic base for induction cooking.
- For glass ceramic cooktops: use only pots and pans with a flat base.
- For glass ceramic cooktops: always remove spills from sugar/milk/rice or pasta water, because they may cause opaque or matt stains on the surface.

Hoods

- All hoods require a qualified installer.
- Install the hood in the way that suits your kitchen; either recirculating or extracting.
- Using extension tubes and flues reduces the hood’s performance. The maximum length of a duct should not exceed 10 ft (3 m).
- Always observe the minimum safety distance between cooktop and hood. This distance varies depending on country and cooktop type. Refer to installation instructions of the product for full details.
- Change carbon filters every 3 months and clean metal grease filters regularly to optimize performance.
- Make sure to clean oil/grease off of the hood regularly.

Microwave ovens

- All microwave ovens require a qualified installer.
- Do not put metal of any kind inside the oven.
- Use only those materials approved for microwave cooking.
- Be sure the ventilation vents are unobstructed.
- Do not remove or block the turntable when cooking in a microwave.

Dishwashers

- All dishwashers require a qualified installer.
- Hire a professional to install the water and electricity.
- Set the correct level of water hardness (pH-value) in the rinse aid dispenser.
- Use detergent specifically developed for automatic dishwashers.
- For best results, make sure there is enough rinse aid and detergent and that they are placed in the correct dispensers.
- Empty and clean the filter regularly, if applicable.
- Always load sharp items, such as knives, pointing downwards in the removable cutlery basket for safety reasons. Don’t load these in the dish compartment to avoid damaging the dishwasher.

Fridge/freezers

- All fridge/freezers require a qualified installer.
- Be sure to place the fridge/freezer where there is sufficient air ventilation around it. A freestanding unit must never be placed inside kitchen cabinets because this obstructs air ventilation and may cause the product not to work properly and damage it.
- Keep the condensation drainage hole at the back of the fridge clean and free of blockages to enable the frost-free system to work.
- Make sure food has cooled down first before placing it in the fridge or freezer. Hot food causes excessive condensation and ice to build up in the freezer, resulting in reduced performance.
- Avoid using sharp tools to defrost your freezer —they can damage the internal plastic lining.
