

VIDGA

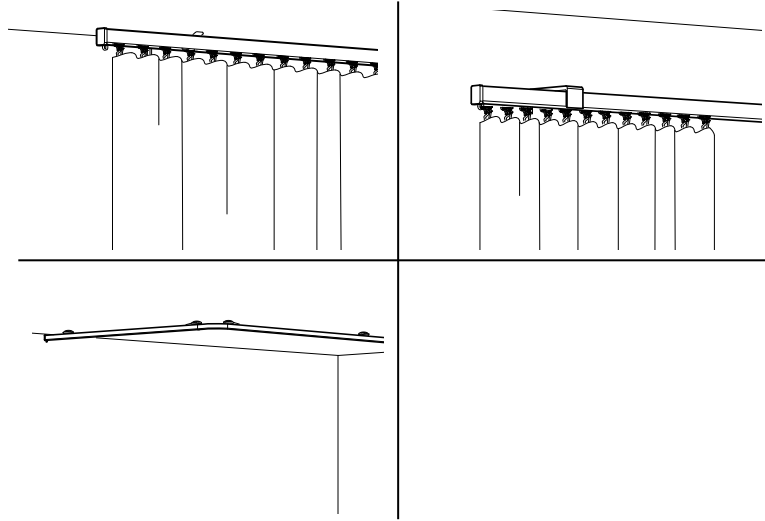

Curtain and panel hanging system

Parts

Corner piece, including one ceiling fitting
Wall brackets (2¼", 4¾")
Single rails (including two ceiling fittings and one connector to extend the rail)
Gliders and hooks to hang the curtain

Features

"Twist and click", for less screws
Sturdy, durable and light-weight aluminum.

Hangs in every way

VIDGA curtain hanging system gives you lots of possibilities to hang curtains in front of windows and niches, or use them as room dividers, sliding doors or around a bed.

VIDGA rails can be shortened with an hacksaw or can be unlimited extended thanks to the connectors included in the package. The corner pieces bring the rails outside or inside the corner and you can profile the entire home perimeter, if you like.

If you want to optimize the window space, go for the ceiling mounted solution.

The VIDGA gliders and hooks give you possibility to hang the curtains and quickly change them when you want or need.

A high standard of accuracy has been sought in the preparation of this buying guide. We apologize for, but will not be bound by or responsible for, errors and omissions in this buying guide.

Good to know

A flexible system with many possibilities

VIDGA simplifies the way you can control light and privacy by giving you the possibility of layering. More layering means more flexibility in adjusting light and privacy, but also more “barriers” from heat, cold windows and sound.

- Ceiling bracket for two single track rails fit up to two single rails.
- The 2¼" wall bracket fits one single rail.
- The 4¾" wall bracket fits up to two single rails.
- The 4¾" wall bracket is the only one suitable to connect to the corner piece with the single track rail.

If you want to combine the corner piece to a track rail on a wall, secure to mount the rail at the very end of the wall bracket for the optimal functioning.

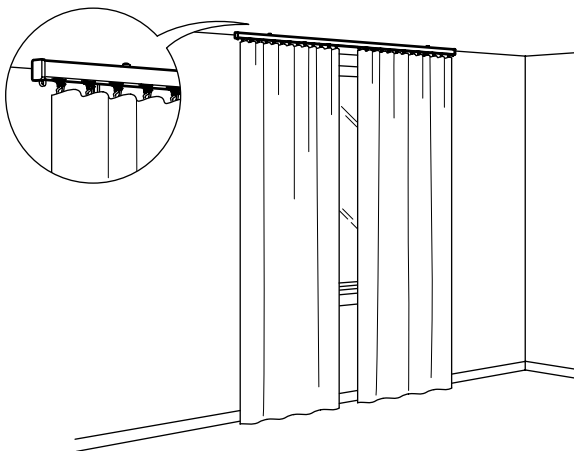

Ceiling mounted combinations

Ceiling-mounted curtains/panel curtains are ideal when wall space is limited above a window or you want to create the impression of a tall ceiling height, making the room feel airier. If there are no architectural features (e.g., protruding window sill or radiator) that get in the way, the track rail can be mounted so the curtains fall

close to the window, minimizing gaps that let in light. You can choose among different combinations of one or more layers.

The corner piece for single track rail can be used both inside or outside corners.

Single-layer

One VIDGA single track rail, 44", mounted to the ceiling. The curtains are attached using VIDGA gliders and hooks. Our recommendation is to use one package of gliders and hooks for one standard-size curtain. Two packages for a curtain pair, a wider curtain or if you want to create many tight pleats.

Shopping list

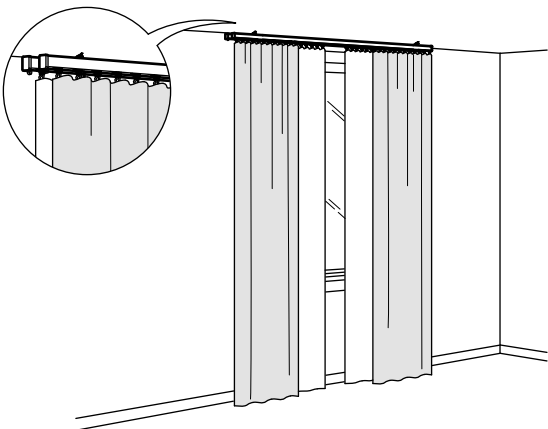

VIDGA Single track rail, 55", incl. ceiling fittings, White	204.929.16	1pc
VIDGA Glider/hook, White, 24pcs	204.830.02	2pks

If you'd like to **double the width of the combination***, follow the shopping list below:

VIDGA Single track rail, 55", incl. ceiling fittings, White	204.929.16	2pcs
VIDGA Glider/hooks, White, 24pcs	204.830.02	4pks

Double-layer

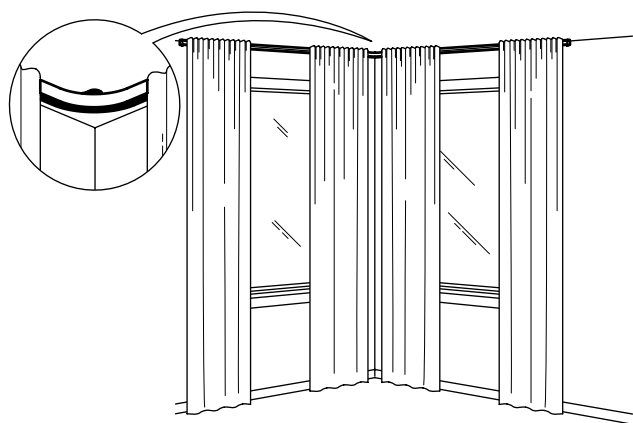

Two VIDGA single track rails, 55", mounted to the ceiling with VIDGA ceiling bracket for two rails. The curtains are attached using VIDGA gliders and hooks.

Shopping list

VIDGA Ceiling bracket for two curtain rails, White	205.860.76	3pks
VIDGA Single track rail 55", incl. ceiling fittings, White	204.929.16	2pcs
VIDGA Glider/hooks, White, 24pcs	204.830.02	4pks

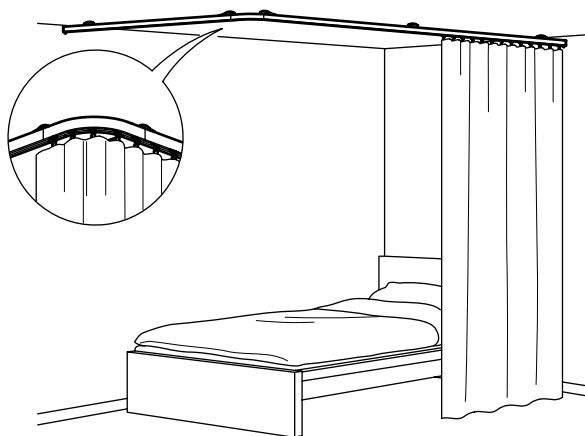

Ceiling mounted combinations

Two VIDGA single track rails, both 55", mounted to the ceiling. The rails joined at the inside corner with a single rail corner. Now you can pull the curtains inside the corner.

Shopping list*

VIDGA Corner piece single track incl. ceiling fittings, White	304.983.81	1pc
VIDGA Single track rail, 55" incl. ceiling fittings, White	204.929.16	2pcs
VIDGA Glider/hooks, White, 24pcs	204.830.02	4pks

Three single track rails, both 55", mounted to the ceiling around the bed. The rails joined at the outside corner with a single rail corner. Now you can pull the curtains outside the corner.

Shopping list*

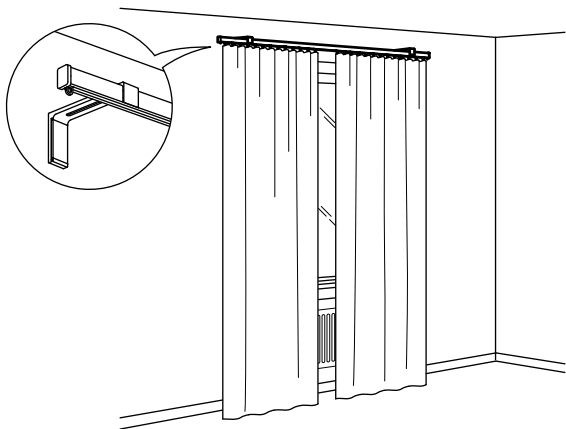

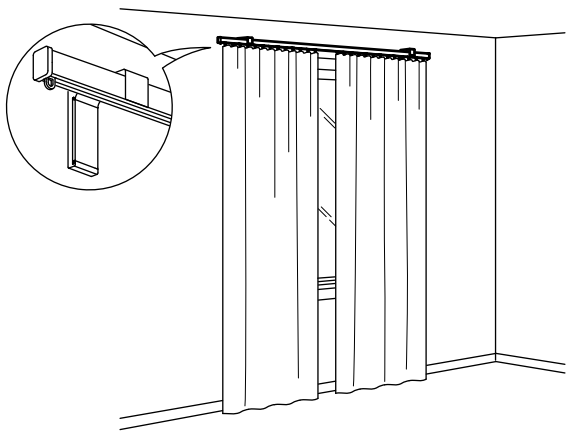

VIDGA Corner piece single track incl. ceiling fittings, White	304.983.81	1pc
VIDGA Single track rail, 55" incl. ceiling fittings, White	204.929.16	3pcs
VIDGA Glider/hooks, White, 24pcs	204.830.02	6pks

* You can build even wider combinations and cut the rail to your measurements.

Wall-mounted combinations

Depending on architectural features and your preferences, you may opt for wall-mounted curtains.

You can choose 2¼" or 4¾" wall brackets depending on how far you want the curtain/panel curtains from the window. If you have a window sill that protrudes from the wall or a window handle that gets in the way, the 4¾" wall bracket is probably the best option.

You can fit one single rail or one triple rail on the 2¼" fitting.

The 4¾" wall brackets are the only ones to use when you want to connect the corner piece with the single track rail.

The 4¾" wall bracket fits up to two single rails, or one triple rail plus one single rail.

Parts for wall mounted 2¼" bracket.

VIDGA Single track rail, 55", incl. ceiling fittings, White	204.929.16	2pcs
VIDGA Glider/hooks, White, 24pcs	204.830.02	4pks

Wall-mounted combinations

One VIDGA single track rail, 55", mounted to the wall. Choose between 2¼" wall brackets to keep the curtain closer to the window or 4¾" if there are architectural features like protruding window sills, handles or radiators that require a bigger distance. With a corner piece on each side of the rail, you can pull the curtains all the way to the wall to prevent gaps: in this combination you have to use the 4¾" wall brackets.

How to buy VIDGA

1 How long rail do you need?

VIDGA rail is 55" long but can be both cut and extended. If you need a solution that is longer than 55", the rails are connected with the supplied joint fittings. The rails can be easily cut with a hacksaw.

2 Select type of rail

Single track rail
For several layers of curtains, use two VIDGA single track rails.

Corner piece single track
Fits VIDGA single track rail.

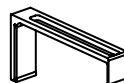

3 Select type of fittings

Ceiling fitting
Included in the package for the rails.

Wall bracket 2¼"
Used if you want a VIDGA rail with one layer of curtains.

Wall bracket 4¾"
Used if you want double layers of curtains or to hang in front of a windowsill or a radiator.

4 Hanging

VIDGA Glider and hooks
For two curtain lengths, you need two packages.

RIKTIG Curtain hook
For one curtain pair, you need two packages.

* You can build even wider combinations and cut the rail to your measurements.

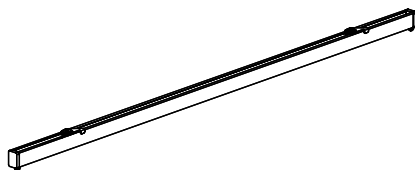

How to plan

Plan before you measure

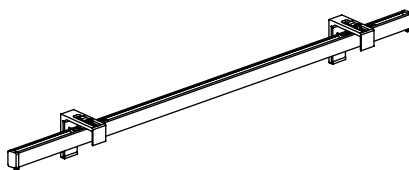

Do you want to hang the curtain/panel curtain from the wall or ceiling? How much do you want to overlap the window recess above and on the sides? How many layers are you planning?

When you've decided on all these points you can start to measure.

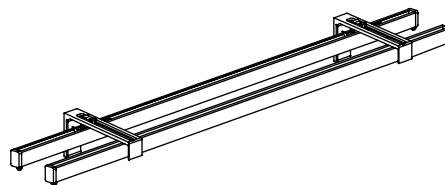

You start with one rail and two ceiling brackets or wall brackets

Ceiling fittings are always included with the rails. They allow you to mount the rail to the ceiling. If you want to create the impression of a tall ceiling height. If there are no architectural features (e.g., protruding window sill or radiator) that get in the way, the track rail can be mounted so the curtains fall close to the window, minimizing gaps that let in light

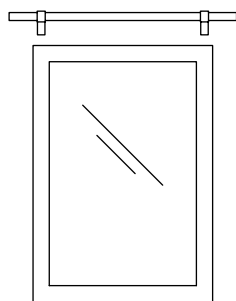

Short (2¼") wall brackets (sold separately) allow you to hang the curtains very close to the wall to minimize light coming through the gaps on the sides.

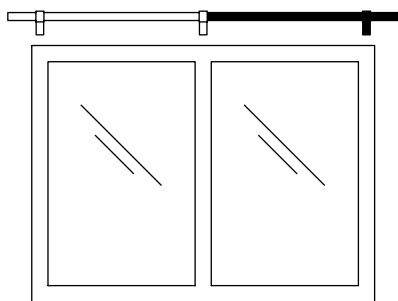

Long (4¾") wall brackets (sold separately) can hold multiple parallel rails in different combinations so you can create a layered solution with optimal space between the curtains for easy gliding. They are also ideal to create a distance between a curtain and architectural features like protruding window sills.

Got a wider window?

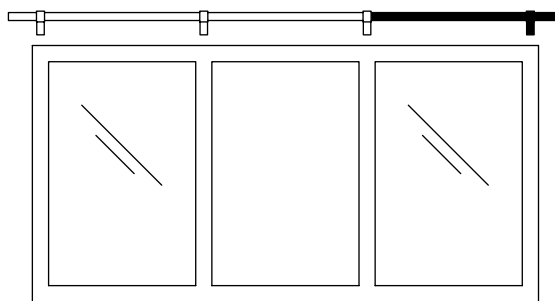

Every rail includes connectors that enable to extend the rails as long as you want.

One rail and two fittings to start with.

Add one rail and one fitting (the same size as you chose before).

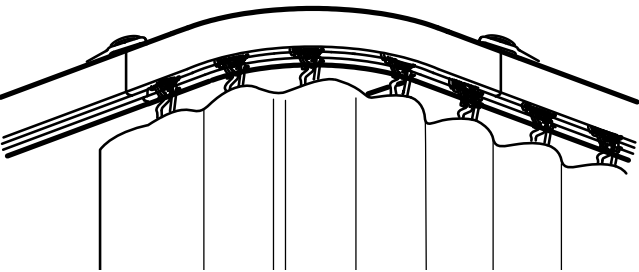

Still not long enough? Add another rail and another fitting (the same size as you chose before).

You can also cut the rail to your measurements if the width of your window falls in between.

How to build

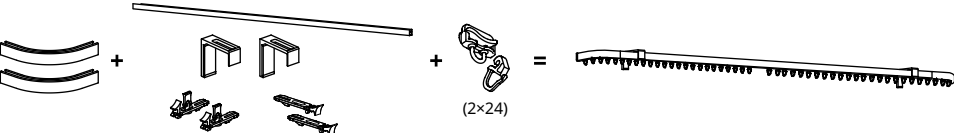

Ceiling mounted 1-layer

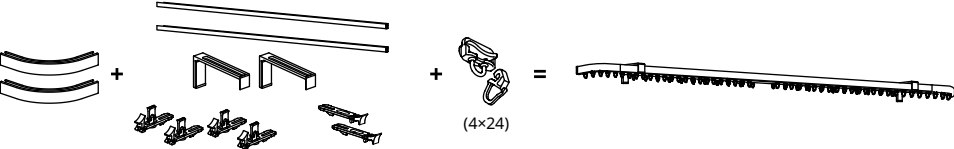

Ceiling mounted 2-layers

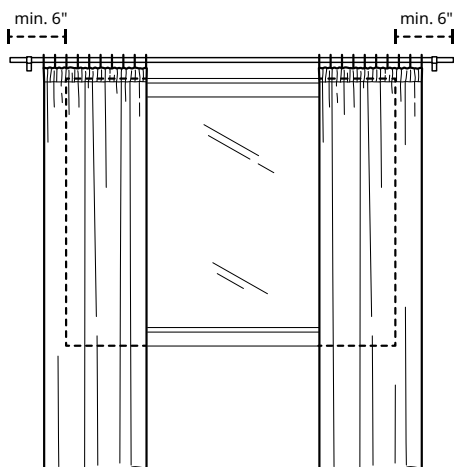

Wall-mounted 1-layer

Wall-mounted 2-layers

How to measure your windows

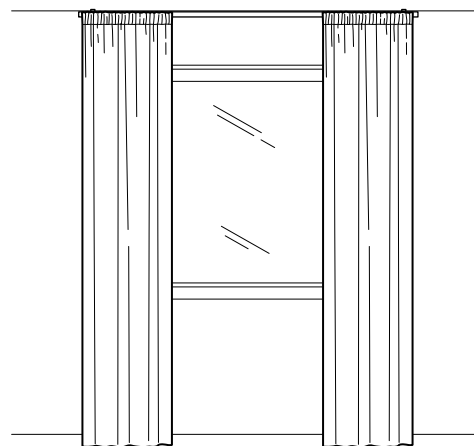

Step 1 Measure the width of your window.

Calculate the width of your window curtain track rail.

For fabric curtains, add at least 6" on each side so they cover the entire window and allow the curtains to open fully.

For panel curtains, add 23½" on one or both sides if you don't want to have the panels covering the windows when they are on the side.

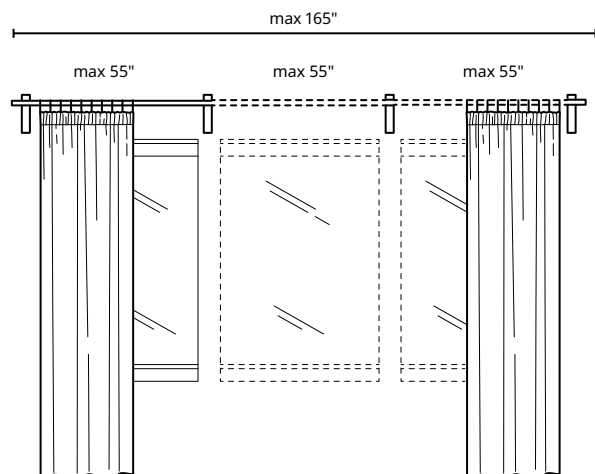

Step 2 Calculate the length of your window and decide on ceiling-mounted or wall-mounted.

Take a good look at your window, its opening and if there is a window sill, radiator, plants or furniture placement to take into account.

Choose whether you wish to hang the rail directly from the ceiling or on the wall. This will determine the curtain length.

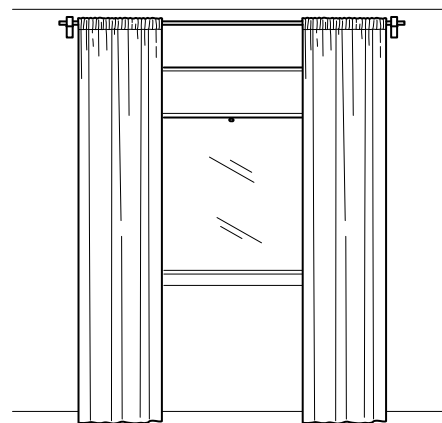

- Ceiling-mounted may help with sound absorption, insulation and make the room appear larger.
- Wall-mounted solutions are usually placed about 6" above the window. But it is really up to you decide the height.

Step 3 Calculate the number of brackets.

Rules for a stable rod or rail:

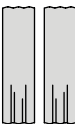

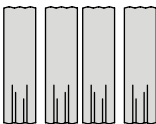

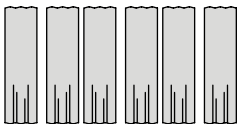

- Use 2 brackets for rails up to 55".
- Use 3 brackets for rails between 55" and 110".
- Use 4 brackets for curtain rods or tracks longer than 110".

Tip:

Are you combining curtains on rails with blinds?
Add 6" to the width of the window, so the curtains are wider than the blinds.

Number of curtains and accessories

	The length of the track you need		
			
	< 55"	55-110"	110-165"
Hang curtains with single track rail .			
Number of products

SERVICES

IKEA products are designed to be taken home and assembled by you. That way, you'll save the most money. But if you would like some help, we can offer a range of services. Assembly services fulfilled by an Independent Service Provider. Contact your local IKEA store or visit the IKEA website for details: [IKEA.us/services](https://ikea.us/services)

TASKRABBIT ASSEMBLY SERVICE

All IKEA products are designed to be assembled by you, but you don't have to. We've partnered with TaskRabbit to connect you with a network of independent 'Taskers' who can provide quick and convenient assembly and mounting services for your IKEA purchases made online and in stores. You can schedule assembly service for as soon as the same day, with the Tasker of your choice. Visit TaskRabbit.com/IKEA or see a co-worker for more details.

Services and prices may vary, please see [IKEA.us/services](https://ikea.us/services) or talk to us in your local IKEA store.
