

# At-home kitchen measuring service

Need help measuring your kitchen space? Schedule an appointment with one of our IKEA Kitchen measurement technicians to visit your home and measure your space.

Our measurement technician will visit the site where the new kitchen will be installed, and document dimensions of the space for cabinet planning and installation. This paid service includes measurements of existing walls, windows, doors, ceiling height, locations of plumbing, electrical outlets, and other obstructions, as well as photos of each wall and overall kitchen space, made available on your customer portal following the appointment.

Customers who are scheduling an in-store or online kitchen planning appointment, be sure to schedule your measurement appointment at least one week before your planning appointment so, the measurements can be shared with your IKEA kitchen planning expert.

Measuring service does not include: Advice on kitchen design (unless the service is combined with an in-home planning service), removal of area to check the modernity of plumbing or electricity, advice on supplementary work.

For customers purchasing an IKEA installation service, the measurement fee is applied towards the cost of installation. Limit one per install project. For more details, visit [IKEA.us/services](https://www.ikea.us/services).
