Most Convenient & available to everyone in the continental US:

Planning from Your Home: Make a 90-minute appointment, online or in your local IKEA store. Allow time for you to measure your kitchen and select products before your appointment. A professional IKEA Kitchen Planner will work with you interactively online to plan your dream kitchen. You will be able to discuss every detail and view your plan being created. Your planner will follow-up with a second session to make any changes.

Visit an IKEA store: Planning from the Store: You can make an appointment online or at your local IKEA store for a two-hour in-store appointment with one of our professional IKEA Kitchen Planners. Allow time for measuring your kitchen and selecting products before your planning appointment.

Prior to your appointment, you will need to:

• Measure your space – The first step is getting your kitchen measurements. Instructions will be provided if you want to do this yourself. But if you live in an IKEA service area, a professional IKEA measurement technician can visit your home to measure your kitchen for you.

• Choose your products – Start browsing our kitchen products now to get a better understanding of what you want. You must know this before your planning session to make it productive.

Kitchen Measurement Service

It’s important to have your kitchen accurately measured before planning begins. An experienced IKEA Measurement Technician will come to your home, take all of the essential measurements, and enter the data in the IKEA Home Planner. Your Measurement Service fee is refunded when you have IKEA install your kitchen. Available for customers living within our service area.

Lighting and sound

A brighter kitchen life

Good lighting is an essential part of any kitchen. That’s why we offer integrated lighting products perfectly dimensioned to fit our kitchen cabinets. And they all contain long-lasting built-in LEDs which consume up to 85% less energy, produce much less heat and last up to 20 times longer than incandescent bulbs. Having IKEA integrated lighting installed in your kitchen is a great way to light your beautiful new countertops and pour light onto everyday tasks in the kitchen, as well as to show off your favorite dinnerware behind glass doors or to brighten up your utensils, spices, bowls and cookware in your drawers!

Planning and installing integrated lighting in your new kitchen is an investment you will enjoy for many, many years! Everyone agrees that great countertop lighting is a must for every successful kitchen. Adding lighting to your glass door cabinets is a great way to show off your most prized treasures, while also adding a wonderful sparkle to your space. And it may seem like a ‘nice-to-have’ at first, but when your integrated drawer lighting illuminates the instant you open a drawer, you’ll agree it’s a must-have that you deserve and will come to love! **Pre-planning is the key for easiest installation**

Get an even better kitchen experience with the ability to dim, turn off and turn on lights wirelessly. All you need is TRÅDFRI LED driver and remote control. Or, use the TRÅDFRI gateway and Home smart app to control every beam of light with your smart phone. We call it IKEA Smart Lighting.

KITCHEN INSTALLATION

If you want we can install all your kitchen lighting for you, as a part of our Kitchen Installation service. See more on page 5.

Drawer lighting simplifies finding what you need even during those midnight kitchen raids. Opening and closing the drawer turns the light on and off automatically.

Countertop lighting should give you a clean, clear view of all the work you’re doing in the kitchen.

Spotlights provide a focused light that is good for lighting smaller areas and behind glass doors.

Cabinet lighting illuminates your favorite kitchen doors and creates a cozy mood light in the entire kitchen.
**MITTLED series**

Countertops

Your kitchen is the heart of your home, it’s a room for everyone! How it performs and how it looks are two important factors. Even though doors and drawer fronts are the main style decision you make when updating your kitchen, your countertop can have a big impact on the overall look. However, the perfect countertop is not just about completing the look of your kitchen, it has an impact on its functionality too. When picking the right countertop there are many factors to consider, including your style, durability, maintenance, lifestyle and cost. Our countertops are available in pre-cut and custom made as well as in durable materials, finishes and thicknesses. Each surface has unique properties, with differing levels of water, wear and heat resistance.

How to choose your countertop:

1. What’s your budget? A stylish look does not have to cost a fortune, our countertops are available in wide range of materials and expressions, pre-cut as well as custom-made to perfectly fit your style, needs and wallet.

2. What kind of material do you prefer? When deciding on material, consider how robust you need your countertop to be, how much you are prepared to look after it, and how you want it to look in your kitchen environment.

3. Custom made countertops are made-to-fit your kitchen layout, you can order the exact size you need, as well as cut-outs for your sink, faucet and cooktop. Pre-cut countertops are available in different sizes, you can take them home today and cut to desired length.

Built to last
When we test our countertops we put them up against everything they’ll face in your kitchen: liquids, oil, steam, heat, thumps, bumps and scratches. Once we’re done we’re so sure our countertops will last for many years to come.

Countertops have a free 25-year limited warranty. Exclusions apply. See pages 108-109 or IKEA-USA.com/warranty for details.

Materials

Laminate
Laminate countertops are durable, affordable and easy to maintain, with lots of colors and expressions to choose from. Spills and grease are easy to wipe clean and the countertop keeps its beauty over time, making it a practical solution.

Wood
Countertops with a top layer of wood have all the qualities of solid wood, enhanced by modern technology. They are made with 1/4" layer of solid wood wrapped on particleboard. This increases the stability and makes them less likely to split or crack. They can be sanded down to remove minor scratches, and will keep their natural beauty over the years.

Quartz
Quartz is one of the hardest materials in nature, making the surface extremely durable and scratch resistant. Plus, the surface is smooth, non-porous and easy to keep clean.
We offer pre-cut laminate countertops in two lengths. Choose between the many colors and expressions to find the perfect look. The laminate countertops can be cut into the length you need and finished with the edge strip included in the package.

1⅛" countertops create a light, contemporary feel and are often used in modern style kitchens. They are all available to take home today.

6. Order
   To order your custom made countertop, please contact an IKEA co-worker in the kitchen department at your local store.

How to measure your countertop

Start by measuring your countertop from the corner where it attaches to the wall. Make sure to make your measurements alongside the wall and always start from the same point. When measuring the depth, start from the wall and measure out. Don’t forget to add 1½“ for an overhang too.

If you need to measure for a freestanding countertop (for a kitchen island for example), simply start from one end and add 1½“ extra for an overhang.

To measure for a sink start from the same point where you’ve taken your previous measurements and measure to the center of where you would like your sink to sit.
When you choose a quartz countertop you get a work surface that's extremely durable. It's scratch resistant and can withstand heavy impact. We construct our quartz countertops with natural quartz crystals (one of the hardest materials in nature) and high-quality polymer resins which make the surface smooth, non-porous and easy to keep clean for even the busiest kitchen. You can also order quartz backsplashes to complement your countertop.

**Good to know**

Clean using a soft cloth or sponge and warm water with a mild, non-abrasive detergent. Avoid using scouring products.

Sinks

A busy place in the kitchen
The sink and the area around it is one of the busiest places in the kitchen. You use it for everything from preparing food and rinsing vegetables, to storing dirty dishes and cleaning up. To make the activities as easy as possible, choose a sink and sink accessories that match your needs and the way you work in the kitchen.

How to choose your sink

01 How much space have you allocated for the sink? Our sink cabinets are 24, 30 or 36" wide.

02 Think about how you prepare food, but also how you clean up. Do you have a dishwasher or do you wash the dishes by hand? Do you need one bowl, two bowls or a sink with drainboard?

03 Complete your sink with sink accessories that help you organize the area in and around the sink, both when you prepare food and when you clean up (see page 94).

Our range of sinks

Single bowl sinks
If space is an issue, one single bowl is a good option. Plus, in a big single bowl you can easily wash large pots and pans. Combine with sink accessories to make the bowl as functional as possible (see page 94).

Double bowl sinks
Having two bowls is ideal if you have a lot going on at the same time. For example, if one of the bowls is piling up with dirty dishes, you can still rinse off vegetables and the like in the other.

1½ bowl sinks
A one and a half bowl sink gives you the same advantages as a double bowl sink, but in a smaller area.

Sinks with drainboard
A sink with a drainboard is ideal for drying dishes as the sloping surface makes excess water flow back into the bowl. Our sink with drainboard is reversible, so you can choose if you want the drainboard to the left or to the right.

Kitchen faucets

Saving water at every step
Earth may be covered in a lot of water, but very little of it is drinkable and even less is accessible. No organism can survive without it, and no new water is created. It’s constantly recycled, but our freshwater supply is overused; not evenly distributed; and impacted by pollution, contamination and climate change. That’s why we equip all our kitchen faucets with a water saving aerator that reduces water use up to 40%—while maintaining the same pressure. We didn’t invent aerators, but think they are an important example of how we can work together to save water for everyone’s benefit.

All IKEA kitchen faucets come with a free 10-year limited warranty. Find out more on page 108.
KITCHEN FAUCETS

Functions

Kitchen faucets with low spout
Kitchen faucets with low spouts always have the handle on top, and are ideal for small single bowl sinks.

YTTRAN Kitchen faucet*  

Kitchen faucets with high spout
The high spout makes it easier to wash dishes, including large pots.

INSJÖN Kitchen faucet*  

Kitchen faucets with pull-out spout
Rinsing dishes is easier with the pull-out spout. A counterweight makes the hose easily retract back into the kitchen faucet.

ÅLMAREN Kitchen faucet with pull-out spout*  

Kitchen faucet with sensor
