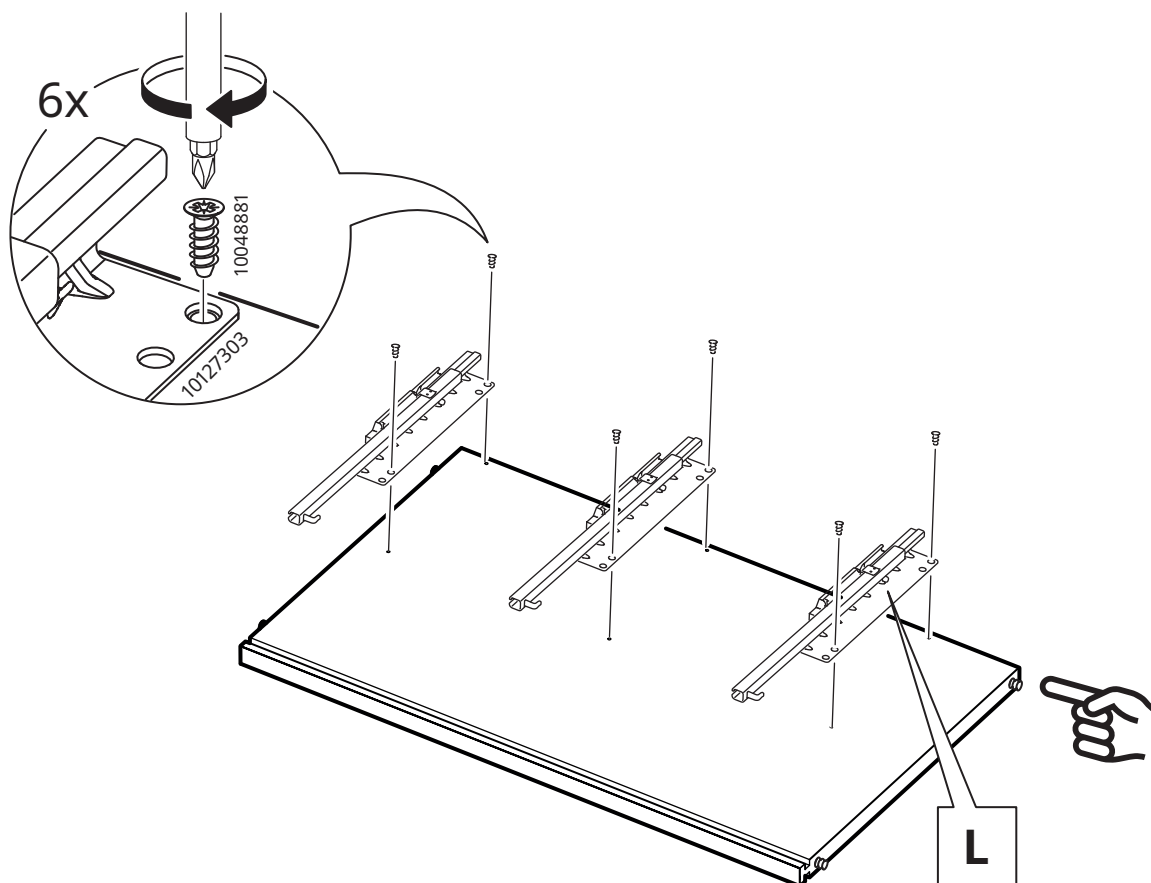

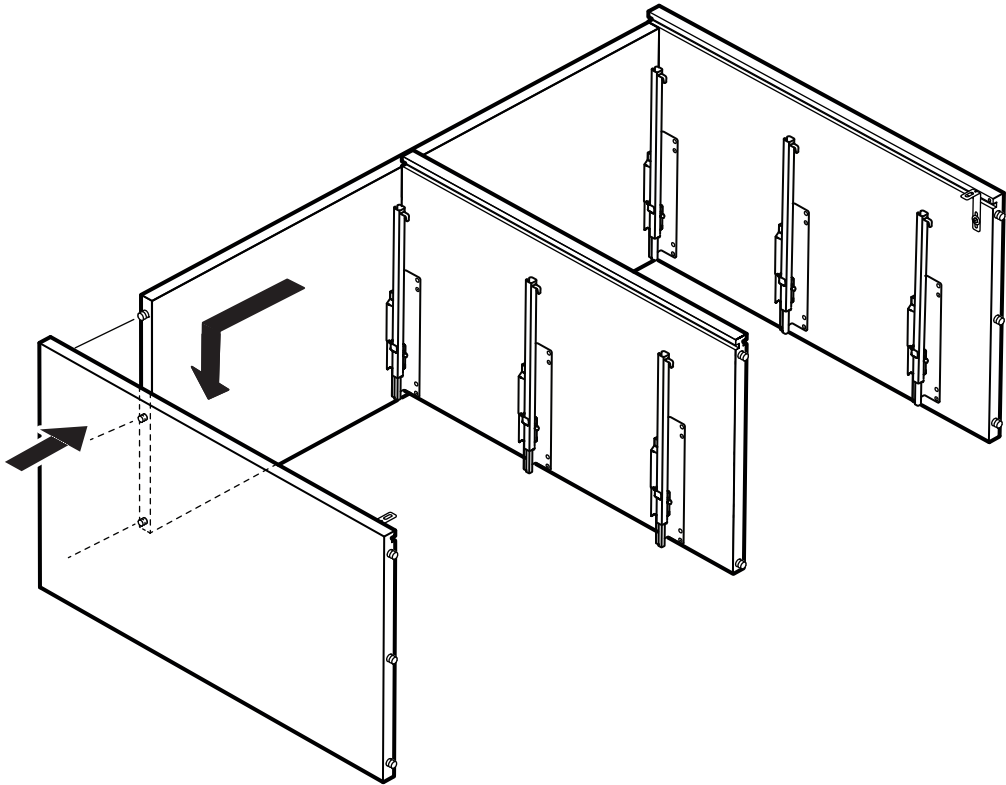

Diagram illustrating the assembly of the panel to the frame using clips. The process is shown in three steps:

- Insert the clip into the top of the panel.
- Push the clip down into the frame.
- The clip is fully seated, securing the panel.

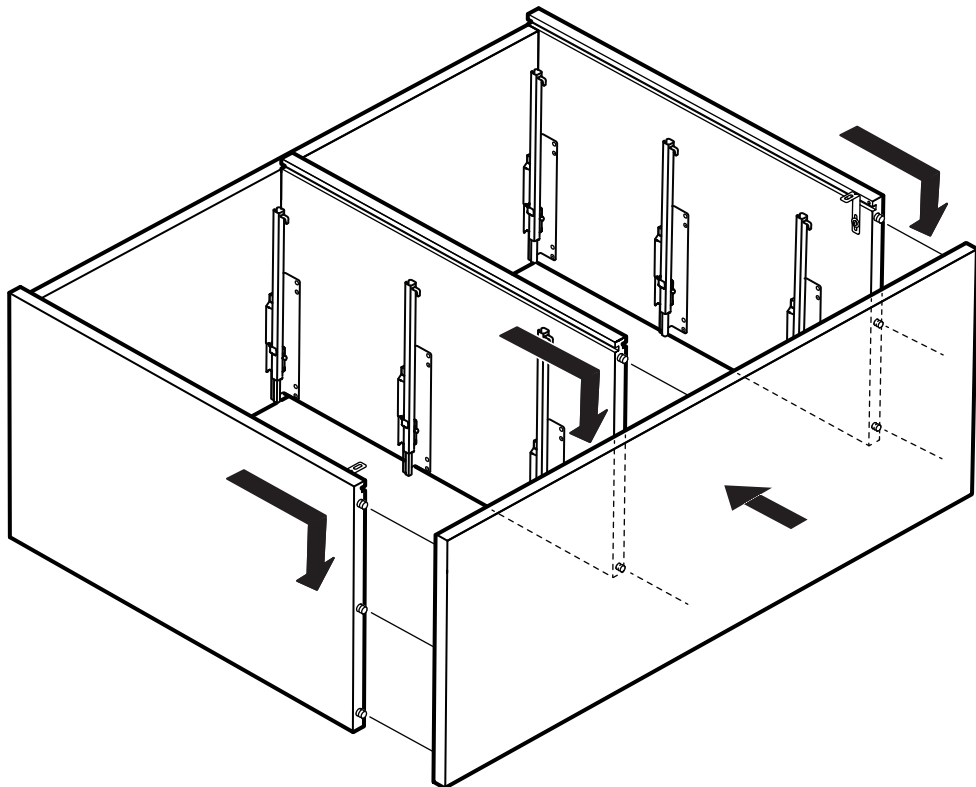

A callout shows the clip being inserted into the frame.

This diagram illustrates the third step of the assembly process. A third panel is being moved into the corner joint, guided by a large black arrow pointing downwards. The panel is shown being aligned with the existing structure, which now includes two panels. The panel features a top rail and a bottom rail, both equipped with rollers for smooth movement. The diagram shows the panel being positioned so that its top rail fits into the top track of the corner joint.
